Montana State Capitol showing lawn from our famous Rocky Mountain Grass Seed and trees from our nursery

STATE NURSERY & SEED CO.
"Soving Montaine and the Morthwest for 46 years"

FIREST

FAMOUS STATE NURSERY LAWN GRASS SEED

The chief desire of almost every home owner, whether a town or rural dweller, is to possess a good lawn, and nothing adds to the appearance of a residence as much as a good lawn of thick growth and velvety appearance. A nicely kept sward, neatly trimmed, adds materially in beautifying any building or residence, and often, too, becomes one of the chief selling features.

BE SURE YOUR SOIL IS FREE OF DANGEROUS WEEDS BEFORE YOU SOW YOUR LAWN

(One pound will sow 200 square feet or 10x20; 10 pounds for 2000 square feet, or 40x50; 60 to 100 pounds per acre, or 43,560 square feet.)

White Dutch Clover

("PEERLESS")

This is frequently sown to cut green for chicks and fowls; also used largely in making lawns for which this variety is especially adapted.

Postpaid — ½-lb. 30c; 1 lb. 50c; 5 lbs. \$2.35; 10 lbs. \$4.25.

Special Mixtures

We shall be pleased to submit prices, or to prepare mixtures of grasses of the customers own formula or to suggest same adaptable for your needs. Write us telling what the nature of the soil, how drained, how much sun it gets, how much you intend to seed, etc.

Creeping Bent Grass (WEST COAST REGISTERED SEED)

Is particularly valuable for lawns that are to be used for croquet grounds or tennis courts on account of its compact creeping rooting stems; of rapid growth and spreading habit, forming a strong, durable turf, because it is benefited more than hurt by tramping and by its bright color adds to the beauty of the lawn.

Postpaid-1 lb. \$1.10; 5 lbs. \$5.00; 10 lbs. \$9.50.

Pamphlet on
The Preparation and Care of Lawns
Free

S. N. & S. Co.'s Rocky Mountain Lawn Grass

This famous lawn grass has proven itself in adaptability and hardiness and for quickly producing the finest permanent lawn. It is made from our own proven formula of the choicest of grasses recleaned by the most up to date machinery to reduce foreign worthless substances to a minimum and is noxious weed free. It produces a dense velvety green turf that any home will be proud of and contains the right amount of fancy white Dutch clover for a perfect sward. For those who want it without the clover we can furnish the seed this way.

Price Postpaid - Pint 25c; Quart 40c; 2 Quarts 75c; 5 lbs. \$1.85; 10 lbs. \$3.50.

Our Placer Grade Lawn Grass

This popular low priced lawn grass is adapted to various soil conditions and produces a beautiful and permanent lawn. It is a careful blend of recleaned grasses.

Price Postpaid $-\frac{1}{2}$ lb. 20c; 1 lb. 35c; 2 lbs. 65c; 5 lbs. \$1.50; 10 lbs. \$2.75.

Rocky Mountain Shady Place Lawn Grass

Usually it is quite difficult to establish a good rich lawn under trees and in parts that are shaded most of the day. The use of our Rocky Mountain shady place lawn grass insures a rich lawn under these conditions because it is carefully blended with selected grasses tolerant to shade and it blends beautifully with our other grass mixtures.

Price-Pint 30c; Quart 50c; 2 Quarts 95c; 5 lbs. \$2.35; 10 lbs. \$4.35 Postpaid.

Kentucky Blue Grass ("PEERLESS" GRADE)

We wish to call particular attention to the cleanliness of our Peerless Blue Grass; it's the cream of the market.

Price Postpaid-1 lb. 35c; 2 lbs. 65c; 5 lbs. \$1.50; 10 lbs. \$2.75.

Kentucky Blue Grass ("PLACER" GRADE)

Used extensively for lawns, parks, street parkings and large lawns for public buildings. Also used in meadow mixtures of grasses.

Price Postpaid-1 lb. 30c; 2 lbs. 55c; 5 lbs. \$1.35; 10 lbs. \$2.55.

Gatton Field at Montana State College, Bozeman, showing fine turf from our Rocky Mountain Grass Seed. Rocky Mountain Conference Coaches were high in their praise of this fine turf.

BEAUTIFUL NEW FLOWERS

All American Champions For Your 1936 Garden

Petunia-Dainty Lady

ANTIRRHINUM—Royal Rose (Special Mention 1936)

There is apparent in every flower that velvet sheen that reminds one of the texture of the Rose. It is the deepest and richest rose imaginable. The spike is dense and the individual flowers placed closely together. Must be seen to be appreciated. Pkt., 25c.

ANTIRRHINUM (Snapdragon) St. George (Special Mention 1936)

The color of St. George is orange cerise but of a new shade which makes it absolutely distinct from all other varieties. The spike is dense and the flowers are placed closely together. The individual flowers are very large. Pkt., 25c.

MARIGOLD Dixie Sunshine (See Color Plate) Award of Merit 1936)

Clear bright yellow flowers, about 21/2 inches across, composed of small five-petaled florets interlaced so as to give them the appearance of a pompon Chrysanthemum. Upright growth about 3 feet tall. Pkt., 25c.

ASTER—El Monte (Special Mention 1936)

El Monte is a deep glowing crimson. The flowers are large, full petaled and well formed, borne on heavy non-lateral basal branched stems. It is very early blooming, coming in before the California Giant varieties and remains in flower even Giant varieties and remains in flower over a long period. Pkt., 25c.

COSMOS—Sensation Mixed (Awards of Merit 1936)

Colors are pink and white on this very early giant flowered variety. Flowers are very large, 4 to 6 inches across. Two shades of pink usually appear. For best show leave plants 3 to 4 feet apart and disbud for exceptional flowers or long cutting stems. An exceptional variety. Pkt., 50c.

NASTURTIUM Dwarf Double Golden Globe (Awards of Merit 1936)

Identical in color with the popular Golden Gleam, coming true to type but uniformly dwarf and compact. Golden Globe is the first named color variety in the new gem type nasturtium. It is very free flowering and the well formed double flowers of deep golden yellow are delicately sweet scented. Pkt., 25c.

PETUNIA Single Fringed Dainty Lady (Award of Merit 1936)

Presenting the first true yellow fringed Petunia, Dainty Lady. Our remarkable Petunia introduction is a result of ten years' extensive work. The plants are neat, compact, semi-dwarf and free flowering, bearing generous quantities of the medium sized, delicately fringed light golden yellow flowers throughout the summer. Pkt., 25c.

PETUNIA—Rose Gem (Award of Merit 1936)

Rose Gem is a charming addition to the Petunia family. Rose Gem is the color which the public has been asking for. It is a rich, deep rose. The plants are neat and compact, five to six inches high and smothered with rich rose colored blooms about two inches in diameter. Pkt. 25c.

A. (Royal Rose)

PETUNIA Improved Rose King (Special Mention 1936)

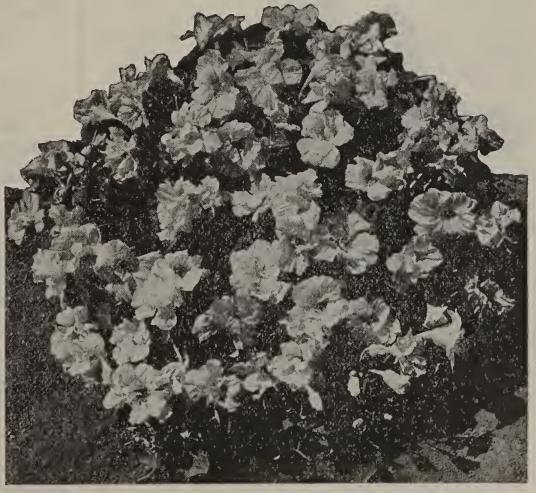

Everyone is immediately struck with the clearness of the bright rose pink color and the uniformity of the shade. The flowers are large, usually three inches in diameter and have a lovely golden throat. The plants are erect and very free flowering: Pkt., 25c.

PETUNIA Flaming Velvet (Gold Medal Winner 1936)

Flowers are a rich and brilliant velvety blood red or crimson, flow-ered hybrida variety, an outstanding color. Beautiful. Pkt., 25c.

ALL AMERICAN SELEC-TION MEANS

The All American selection of flowers and vegetables is a yearly competitive offering of new varieties from which a select group of competent judges choose the most outstanding. It's purpose is to present the best varieties of the year and to promote interest in the new and really worth while varieties.

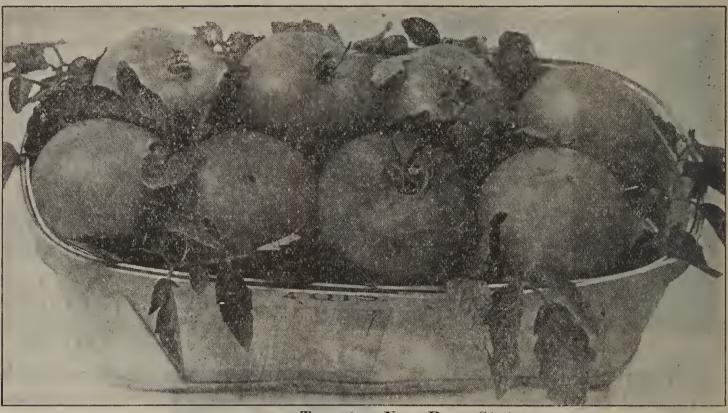

Dwarf Double Golden Globe

1936 Vegetable Seed Novelties

TOMATO New Penn State (Award of Merit) (1936)

A desirable medium sized, rather globular tomato, with a rich uniform scarlet color. The superior quality, with flesh is dark red of small core and few seeds, well adapted to both market and home use. Very valuable because of its earliness and shows every possibility of outyielding every other variety.

Pkt., 10c; 3 for 25c.

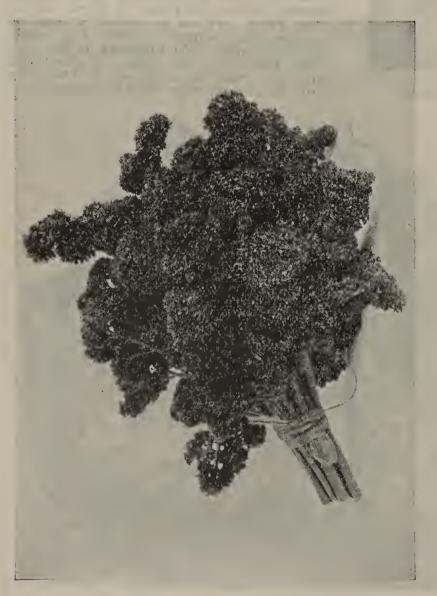

Tomato-New Penn State

PARSLEY—Paramount

(Award of Merit 1936)

Paramount Parsley is unusually rich dark green in color. The curl is generally described as the "triple curled," but is most uniform in this respect and the uniformity of plant type is also most striking. When thinned, the plants grow about twelve inches high with a spread of about twenty inches. The total length of stem and frond is about twelve inches with the length to first joint five inches. The frond is triangular in shape, the base being between four and five inches. Pkt., 15c; oz., 25c; ¼-lb., 75c.

Parsley-Paramount

BEET—Asgrow Canner (Award of Merit 1936)

Tops medium, erect, green and red. Root globe shaped, smooth with small neck. Dark maroon red in color. Flesh deep ox-blood red with very indistinct red zones. Exceptionally vivid and attractive when freshly cut. Holds quality well until roots are full grown. Especially desirable for home canning. Pkt., 15c.

KOHL RABI—Triumph of Prague (Award of Merit 1936)

A wonderful white variety very uniform in shape, size and color, short top, very slow in running to seed. Pkt., 15c.

RADISH—Zwaan's Comet (Award of Merit 1936)

The comet is globe to olive shaped, bright scarlet and stays in eating condition longer than any other early variety. It is very uniform, bright color, crisp and solid. A wonderful variety for commercial and market gardeners as well as for home use. Pkt., 15c.

RADISH—Jewel—(Special Mention 1936)

An excellent and extremely uniform, blunt rooted, red French Breakfast type without the white tip. Does not get pithy and every plant makes a good radish. Pkt., 15c.

SPINACH—Bloomsdale Dark Green Selection F.

A very dark glossy green, extra curled, savory type of compact habit. Pkt., 15c.

TOMATO— Burpee's Globe (Award of Merit 1936)

Wonderful new Tomato with rich pinkish red skin. Uniform globe shaped fruits of medium to large size grow in clusters of six to ten. Excellent for all purposes. — for home, market or forcing in greenhouse. The firm skin and thick flesh make it a good shipper. The flesh is unusually heavy and solid. The seed cavities are so small that the seed will always be expensive. Matures in about 100 days. Heavy and profuse bearer. Pkt., 25c.

Burpee's Globe-Tomato

Department of Plants for Home and Garden

Our 46 years' experience of dealing with plant life in the Northwest has enabled us to select for you types of plants that will thrive under conditions found in Montana and the Northwest.

HOW WE SELECT AND FILL YOUR ORDER

We use every care and precaution to select only plants that are in the best of condition and to pack them so that they are certain to arrive safely at their destination. Our various growing ranges, Nursery plots and packing sheds are in charge of experts in their lines and our patrons may be assured that every effort is made to make their dealings with us both pleasant and satisfactory. The size named in plants, such as 3-inch and 4-inch, etc., refers to the size of the pot in which the plant is growing. Plants are shipped out of pots.

OUR GUARANTEE ON POTTED PLANTS

All shipments of plants from this department are guaranteed to reach their destination in good condition. Our customers should advice us if delivery is not made within a short time after our notification card of shipment has reached you. Examine all plants carefully upon arrival and report immediately if any are damaged. After safe delivery in good condition we do not assume responsibility for future growth or failure.

Abutilon or Flowering Maple

Popular house plants, flowering profusely during the Winter and early Spring months.

Splendens-A handsome rose color.

Pink Beauty-Pale pink.

Savitzi-A variegated foliage.

Golden Fleece-Pure yellow.

Crusader-A brilliant red.

Snowdrift—A beautiful pure white sort.

Any of the above varieties, each, 3-inch, 25c; entire collection of 6 varieties, \$1.25; larger specimens, 50c, 75c, \$1.00.

Ageratum

An excellent potted Plant and fine for bedding and borders. Profuse flowers all season, in rounded terminal umbels, each floret a small round bur of protruding but soft bristles. Beautiful clear blue. Each, 15c; 3 for 40c; dozen, \$1.20.

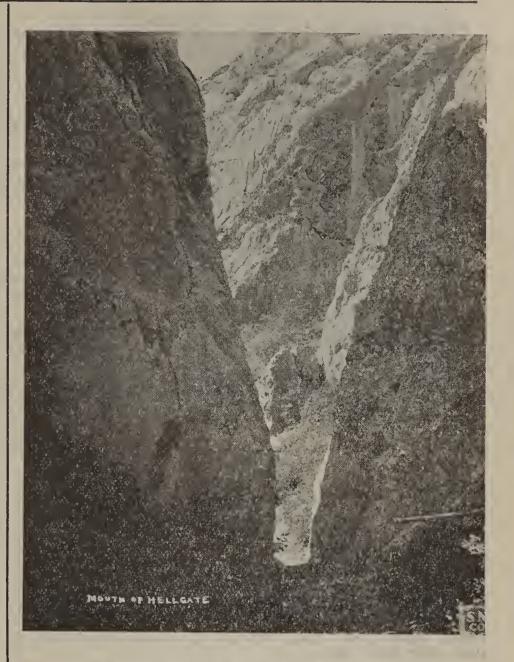

Aloysia (Lippia) Citriodora

Lemon Verbena—An old favorite and should be in every garden. Lemon scented foliage. .. Each, 35c and 35c.

Alyssum

(Ready about May 1)

Alyssum, Donble—An excellent variety for borders, window boxes, and urns.
2-inch Pot Plants, each, 10c; dozen, \$1.00.

As Rugged as the Mountains That Surround Us

Amaryllis-Hybrids

These plants produce blossoms which are wonderfully varied and of brilliant colorings.
Strong growing plants, each, \$1.00.

Antirrhinum or Snapdragon (Ready April to July)

The Snapdragon is well adapted for beds or borders and are fine for cut flowers. Our started Plants will bloom early.

Pot Plants, ready to bloom, colors, firey red, rose, light pink, orange, scarlet, yellow and white. Each, 20c; doz., \$2.00.

Transplanted seedlings, mixed or selection of the above colors, fine for bedding. Per doz., 50c.

Aspidistra

Aspidistra Lurida—One of the easiest decorative plants to grow. A most useful house plant, having large green leaves and thriving in a comparatively dark place in the room when nothing else will succeed. Each, \$1.00.

Aspidistra Lurida Variegata—Similar to Lurida but with white and green striped leaves. Each, \$1.00.

Snapdragon in One of Our Greenhouses

Asparagus Plumosus

Asparagus Plumisus Fern

Owing to its graceful foliage and ease of cul-ture, this is perhaps more in demand than any other house plant.

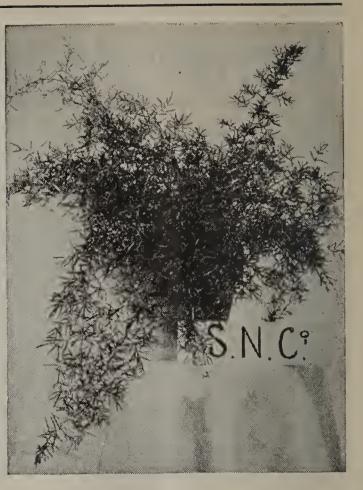

Each, from 3-inch pots, 25c: 4-inch pots, 50c; 5inch pots, \$1.00.

Asparagus Sprengeri (Emerald Feather)

Of great value for hanging baskets and for cutting. One of the best plants for window-boxes.

Of very easy culture. Requires only good soil and plentiful watering.

Prices: ..3-inch, 25c; 4-inch, 50c; 5-inch, \$1.00.

Asparagus Sprengeri

Asters (Ready in May)

Our strains of Asters are unsurpassed by any and are prize-winners wherever exhibited. While the early varieties may be grown successfully from seed, it has been found to be much more satisfactory to use plants that have been started inside. Care should be taken in setting out the young plants as the roots are tender and easily broken

plants as the roots are tender and easily broken.

We offer sturdy transplanted plants of the early,
mid-season and late-branching varieties. Colors,
Pink, Shell-pink. Red, White, Lavender, and Purple. Per doz., 50c.

Pot Grown Aster Plants

In addition to the plants listed we are again featuring pot-grown stock in the same colors. These plants will be of sturdy growth and will produce earlier flowers, a distinct advantage in districts subject to early frost. Per doz., \$1.00.

Begonia, Rex or Painted Leaf Begonia

Their wonderfully colored foliage never fails to awaken admiration, and they are of easy house culture. The varieties listed below are selected from the finest sorts known.

Vesandii—Very showy variety, thick velvety foliage, beautifully marked with bright green and silver with crimson stems.

Mrs. A. G. Shepard-Silver leaves marked with other pretty shades.

Walter Lamb—Rich green and silvery white.

Louis Closson—A beautiful bronze.

BEGONIA—Everyblooming—(Continued)

Chatelaine Hybrids — Very similar to the well known Chatelaine, with very large flowers of a brilliant rose color.

Albert Martin-A well known variety with bronze foliage.

Pink Profusion—A new introduction with slender growth, and small foliage of a light green tinted with brown. Flowers of rich rose borne in wonderful profusion.

Prima Donna-Beautiful rose colored blooms, shading to a carmine at the center.

Lucerne-One of the finest Begonias known. Foliage bronze, crimson reversed. Has immense trusses of salmon colored blossoms.

Wellingtoniensis—An old variety which is again becoming in great demand, with beautiful dark green foliage and pink flowers.

Sandersonii—Scarlet, a winter bloomer.

Argrenta—Guttata—Brilliant bronze green foliage spotted with white with white flowers.

Thurstonii—A great favorite with red veined foli-age on under side of leaves. Flowers a bright shell pink.

Rubra-Deep coral pink flowers, foliage green. Any of the above varieties, each, 25c and 50c.

L'Enfent De Nancy-The same as Magnifica leaves, somewhat lighter in ground color and of a silvery white tone.

Robert George—A beautiful variety with finely cut leaves having a silvery green center with the outside edge margined a green and bronze. Each of above varieties, 3-inch, 35c; 4-inch, 50c.

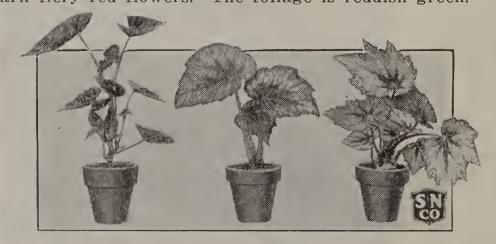

Baby Tears or "Paddy's Wig"

Dwarf growing plant with a clustering, trailing habit. Foliage small and compact. Ideal for fern dishes and miniature gardens. Each, 25c; 3 for 65c.

Begonia—Everblooming Type

This type of Begonia produces the greatest profusion of bloom of any in its family. They are of easy culture and make fine house plants.

Fire Sea—An exceedingly floriferous variety with very large dark fiery red flowers. The foliage is reddish green.

Rex Begonias

Everblooming Begonia

Begonia—Tuberous Rooted

Our display of Tuberous Rooted Begonias has created quite a sensation each year during the Summer season when the plants are in full bloom. With their giant and somewhat delicate blossoms ranging in colors of red, pink, white, yellow, orange and salmon, they are indeed an ideal house plant. We offer the tubers at 25c each; 3 for 65c.

Campanula Isophila or Star of Bethlehem

Beautiful star-shaped white flowering plants of a trailing habit. The plant is practically covered with blossoms all Summer. Fine for hanging baskets, vases, etc. Each, 25c and 50c.

Cannas

No other bedding plant is as showy as the Canna. It is very easily grown and attains large size in ordinary soil. For best results obtain started plants from our greenhouses and set out when all danger from frost is past, thus gaining additional time for their growth. Set the plants about 18 inches apart in a sunny location and supply with plenty of water and well rotted manure. Take plenty of water and well rotted manure. Take them up immediately after frost kills back the tops and treat as you would Dahlia tubers.

Ambassador — Bronze foliage — color poppy red. Flowers brilliant and borne in immense trusses on trong stalks well above the foliage.

Nokomis—Large, vivid crimson flowers with a rich silky sheen on the petals. Bronze foliage.

Mrs. Pierre S. Du Pont—This new Canna surpasses all other pink varieties. Color a vivid water-melon pink. The wavy or crinkled edge on the petal is a new departure in Cannas.

The President—A rich scarlet flower with green foliage. One of the best reds yet introduced.

Duke of Marlborough-Green foliage. Flowers a bright crimson maroon.

King Humbert—The best of the bronze leafed type -with scarlet flowers and beautiful rich bronze foliage.

Yellow King Humbert—Flowers a golden yellow spotted with red and green foliage.

PRICE—Fine large, 4-inch potted Plants, each, 35c; 6 for \$1.70.

Carex Japonica

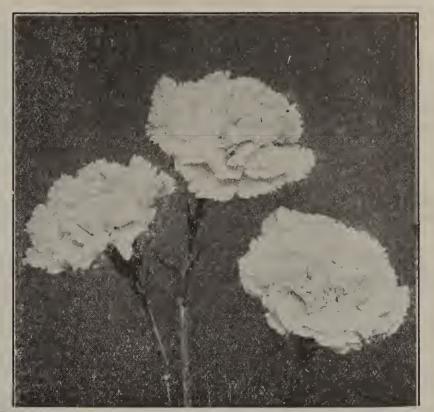

A very colorful grasslike plant of bushy growth having narrow and rather thick leaves which are dark green with a fine white border. Very suitable for fern dishes and for aquariums. Each, 3inch pots, 20c; 3 for 55c.

REMEMBER

that we prepay delivery on all Plants, Trees and Shrubs except Evergreens unless marked otherwise to your nearest Express Station or Postoffice.

Bed of Cannas

President Roosevelt's Favorite Flower

Carnations

We have the largest and best collection of Carnations in the Northwest. They should be grown in the garden in the Summer and removed to the house before frosts. Plants available from March 15th to July 15th only.

STANDARD VARIETIES

Belle Washburn—A red of extreme brilliance.

Hilda—The most wonderful pink Carnation of a decade. Awarded certificate of merit at the recent American Carnation Society's show.

Laddie—A variety of extreme size, 3½ to 4½ inches in diameter. Color, a beautiful warm salmon pink. Has long, strong stems.

Mrs. C. W. Ward—A very attractive deep pink; a free bloomer and the perfume delightful.

Mrs. C. W. Ward—(Variegated)—Another variegated variety, attractively blotched and striped with deep pink on white ground.

Matchless—A large pure white, long stemmed and a free bloomer and the perfume delightful.

Pecrless Pink—A very deep pink.

Pink Abundance—A new beautiful deep pink.

Pink Spectrum-A fine new pink which has proved very popular.

Senator—One of the newer varieties. A very prolific bloomer glistening white flowers which are exceedingly fragrant.

Spectrum-One of the very best reds on the market, having large well shaped blossoms.

The varieties listed above—each, 20c; 3 for 50c. STRONG 3-INCH POTTED PLANTS

SPECIAL CARNATION BARGAIN

- 11 1 - - 11

4 Named Varieties Our Selection Postpaid to You for Only 55c.

Centaurea (Gymnocarpa) or Dusty Miller

One of the white-leaved Centaureas. Fine for bedding, for vases, hanging baskets and pots; also used extensively for borders. Each, 20c; doz., \$2.00.

Calceolaria

The Calceolaria, commonly known as the 'Fisherman's Basket," is becoming one of the most popular plants for Mother's Day on the market. With its multitude of vari-colored velvet-like flowers it makes a most acceptable present. The season of the Calceolaria extends from early Spring until June.

In bloom, each, depending on size, \$1.00 to \$3.00. Packing 35c extra.

Calceolaria

Chrysanthemums

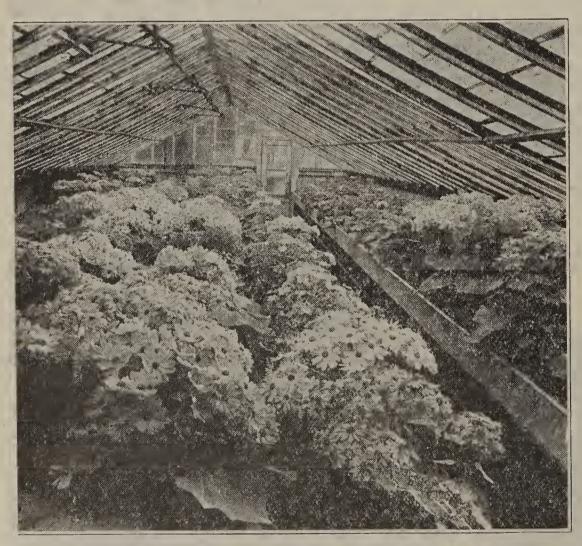

THE CHRYSANTHEMUM is, without doubt. the queen of Autumn flowers. Owing to the early frosts of this section, it is impractical to grow these most beautiful Fall plants to maturity in the open ground (except-see under Pom Pons). They can, however, be successfully grown in the garden until September when they should be lifted and potted. Then in the house they will give a wealth of bloom.

LARGE FLOWERING VARIETIES

Betsy Ross—A grand, early mid-season white, one of the finest yet introduced. Golden Measure—A beautiful Mum with a deep golden yellow hue.

One of Our Houses of Chrysauthemums

A House of Our Cinerarias

Gladys Pearson-A prolific bloomer, upper surface of petals apricot, underside a distinct buff.

J. W. Prince - A leader of the Dark Pinks.

Maj. Bonnaffon — A beautiful incurved glossy yellow. One of the best.

Silver Sheen-Large silvery white. November.

Price: Plants from 21/2-inch pots-15c each; 3 for 40c.

Pom Pon Chrysanthemums

These are often known as Baby Mums; flowers range from 1 inch to 2½ inches in diameter and are very compact, and borne in clusters on the stems.

TWO EARLY FLOWERING POM PONS which bloomed in our trial grounds before frost:

Aladdin (New Everblooming)—A fine double aster-shaped flower of a beautiful deep bronze color. A strong and continuous bloomer. Plants from 2½-inch pots, each, 20c; 3 for 55c.

Glada—A beautiful light silvery pink, an early and profuse bloomer. Plants from 2½-inch pots, each, 20c; 3 for 55c.

Pink Cushion—A fine new addition to this type bears a mass of beautiful dainty pink blossoms. Plants from 2½-inch pots, each, 20c; 3 for 55c.

SPECIAL CHRYSANTHEMUM OFFER

The Above 9 Assorted Varieties

From 21/2-inch Pots Including the Three Everblooming Pom Pons

ALL SENT POSTPAID for \$1.10

Cineraria

(Season December to April)

Cineraria Hybrids Grandiflora-Cinerarias are magnificent and truly beautiful plants with rich colorings. Our strain is noted for its large flowers of exceptional beauty. The plants are sturdy and covered by massive flower in a variety of bright colors. Fine blossoming specimens, 75c, \$1.00, \$1.50 and \$2.00.

Cereus—Night Blooming

Nocturno-Greggii -- A very fine, very rare, night blooming cactus variety. The flower opens after sundown and closes before sunrise. It resembles a water lily somewhat and is pure white in color and very delicate in structure, having a most delightful odor. Water plants only once a week and expose them to full sunshine. Price, each, from 35c to \$1.50.

Unless Otherwise Directed We Shall Ship All Plants for Outside Planting at the Proper Time to Be Set Out

REMEMBER—We Pay Delivery Charges to Nearest Postoffice or Express Station Unless Otherwise Stated

One of Our Specimen Cyclamen Plants

Cyclamen

The Cyclamen has become the most treasured of winter blooming plants. Our fine specimens range in color from the purest white to white tipped with pink, through the various shades of pink to the reds. We can supply these plants in bloom from October 1st to March 1st and for gift purposes they cannot be excelled. We select our own seed from the finest in color. size of bloom and most free flowering specimens. Specimen plants in bloom and bud sent anywhere for \$1.00, \$1.50, \$2.00 and \$2.50. The larger sizes are better shipped by express wherever possible.

DORMANT CYCLAMEN BULBS We can supply the above from March to July 1st at 25c each, 3 for 65c.

Cutbank, Montana, Sept. 28, 1935.

S. N. & S. Co., Helena, Montana.

Gentlemen:-Just a line to let you know that the seeds and plants did very nicely that we bought from you and we are well pleased with all of them.

We extend you an invitation to come

and see our oil fields here.
Wishing you the best of luck with everything, we are,

Sincerely, V. O. W. and FAMILY.

Cuphea or Cigar Plant

This plant is covered with bright scarlet flowers and makes a very attractive house plant. They are especially useful for vases or basket decorations. Each, 20c; 3 for 55c.

Cyperus Alternifolius or Umbrella Plant

An unusually fine plant for decorative purposes of extremely easy culture. Requires plenty of water and may be grown as a semi-aquatic. A splendid plant for aquariums and lily pools. Each, from 3-inch pots, 25c; 3 for 65c; from 4-inch pots, 50c; 3 for \$1.30.

Coleus

Christmas Gem-A beautiful variety with large red and maroon-colored leaves, often 5 to 7 inches in length. It attains its full beauty in winter—thus differing from other varieties.

Trailing Queen—A beautiful trailing variety, highly colored and very suitable for hanging baskets. Dazzling Gem-Rose pink center, margin of chocolate green, dwarf compact grower, stocky plant variety.

Lord Palmerston-An excellent beautiful dark velvety maroon center with dark crimson ribs. Queen Victoria—Remarkably handsome, bright cardinal red with distinct bright golden border. Verschaffeltii-The standard crimson bedding variety.

Crimson King-Strikingly handsome, velvet blood red, robust grower, splendid both as pot plant and bedder, does fine in winter boxes placed in sunny locations. Any of above varieties, each, 25c; 3 for 65c; larger sizes, 50c.

Coleus

Umbrella Plant

PEERLESS DAHLIAS

OUR DAHLIA ARISTOCRATS

PRINCE OF PERSIA

I. D. The immense blooms, frequently 12 inches are of the deepest, glowing crimson, with an even darker iridescent sheen, giving the flower the appearance of velvet. Plants very robust, dark foliage, stems long, stiff and straight hold the bloom well out of the foliage. This dahlia fills the bill for both size and beauty. **Each 95c; 3 for \$2.60.**

GOLDEN GOBLIN

I. D. A rich gold of perfect formal type. Good large blooms, not over size. A grand flower, on good stems, and every one should have it. **Each 50c; 3 for \$1.35.**

WHITE WONDER

I. D. .. A giant pure white with twisted and curled petals. A great prize winner, a healthy grower and a good root maker. You will like this one. **Each \$1.00; 3 for \$2.75.**

JANE COWL

A deep massive bloom of bronzy buff and old gold. A stem of unusual length and seldom bothered by insects. **Each, 45c; 3 for \$1.20.**

POP STEWART

Beautiful rose and lilac blooms produced on strong stems. Potted Tubers, each, 50c; 3 for \$1.35.

SATAN

A cactus variety that is well known because of its ability to win prizes. Flaming red with slight touches of gold at the center. An unusually sturdy grower and truly a great dahlia. **Each**, \$1.50; 3 for \$4.00.

CONGRESSMAN WOLVERTON

A giant decorative type. A sensation beyond our expectations in our Trial Grounds. Beautiful salmon pink flowers with lighter base. **Each**, **50c**; **3 for \$1.35**.

KENTUCKY

This dahlia has the same ideal characteristics as Jersey Beauty, of which it is a sport, and apparently a stronger grower. Its color is the Jersey's Beauty pink with yellow and gold blended, making it more of a salmon pink. Plants are tall, stems strong and straight. Excellent for cutting. **Each 35c; 3 for 90c.**

KENTUCKY RED

I. D. A vivid scarlet red dahlia that will not burn or fade. The attractive and insect-resisting foliage of this variety adds to its beauty. Stems are upright and strong. **Each**, \$1.25; 3 for \$3.50.

PRIDE OF CALIFORNIA

Without doubt the best of the red decoratives. A vigorous grower and a very free bloomer. The large deep crimson red flowers are borne high above the foliage. **Each 25c; 3 for 65c.**

PETER PAN

A wonderful new Dahlia, a bright rich luminous lavender pink color, flowers borne on long strong stiff stems. **Each 75c; 3 for \$2.10.**

TREASURE ISLAND

A striking Dahlia of exquisite petal formation. The color is apricot and gold and it attains a wonderful size. **Each, 50c; 3 for \$1.35.**

JERSEY'S BEAUTY

One of the finest of the pink sorts, having large perfect flowers of erosine pink, carried high above the foliage. Under Montana conditions we consider this to be the perfect Dahlia. Price, each, 25c! 3 for 65c.

MRS. I. DE VER WARNER

Decorative. A blossom of soft orchid coloring. A charming color, large blossoms and very long strong wiry stems. Very free bloomer. Each, 20c; 3 for 50c.

WE SHIP YOUR DAHLIA ORDER AT THE PROPER TIME FOR PLANTING UNLESS
OTHERWISE SPECIFIED

Dwarf Dahlias and Special Collections

Unwins Dwarf Hybrids

DAHLIA UNWINS, DWARF HYBRIDS

Their freedom of flowering is remarkable; they are semidouble, require no stakes, may be planted 18 to 20 inches apart and average between 18 and 24 inches in height. Excellent for Rock Gardens. Wonderful color shades. Price, each, 15c; 6 for 75c.

ASSORTED DOUBLE DWARF POM PONS

These dainty little Dahlias have a place in every garden. They bloom most profusely from early in the season until frost. The flowers are excellent for cutting, and are extremely popular for interior decoration, lasting from two to three times that of the larger flowered types. We are offering assorted lots only of fine adaptable varieties that will please you. 3 for 35c; 6 for 60c; 12 for \$1.00.

Our Special Offer of Mixed Large Flowering Dahlias

LARGE FLOWERING MIXED DAHLIA SPECIAL

We are offering this year a wonderful bargain in this collection of Dahlias which contains an assortment of types and colors. You are getting much more than your money's worth as many of the varieties in this collection are of the newer and more expensive types that have become mixed in handling. For all who would like to have dahlias in their garden here is a great chance to have fine hardy adaptable types and save.

DECORATED JAPANESE TUBS FOR MEMORIAL DAY

Showing Some of the Hundreds of Japanese Tubs Made Up and Ready for Delivery for Memorial Day

Decorated Japanese Tubs

"Beautiful All Summer Grave Decoration"

Our decorated Japanese Tubs are becoming more popular each year. They are filled with combinations of blooming plants, ferns and vines to your instructions or left to our judgment. A beautiful all-season decoration in the cemetery and fine for porch pillars. Three beautiful arrangements at \$5.00, \$6.00 and \$7.50, F. O. B. Helena.

Empty Japanese Tubs at \$1.50 each, F. O. B. Helena. Crating and Packing Free.

Order your tub early, we will have it filled and completely established for you for Memorial Day. Take advantage of a pleasant drive to Helena to get yours or we can ship by express.

One of Our Cemetery Tubs

Boston Ferns

Nephrolepsis Bostoniansis—(Boston Fern)—This is the general favorite with all lovers of house Ferns.

To meet the constant demand for plants suitable for presentation to friends, we have a "SPECIAL" in this type for \$1.25.

Nephrolepsis Whitmani—(Ostrich Plume Fern)—Unquestionably a valuable Fern of its type. They are graceful beyond description, feathery, plumy and nothing describes them better than Ostrich Plume. Prices of the Above Two Ferns: From 3-inch pots, 30c; 4-inch pots, 50c; 5-inch pots, \$1.25.

Pteris Tremula—Commonly called "Lace Fern." This is one of the best known of the family, and the strongest grower, the fronds on a well-developed speciment often attaining a length of three feet. Each, from 2½-inch pots, 30c; from 3-inch pots, 45c; from 5-inch pots, \$1.00; from 6-inch pots, \$1.75.

Old Favorite Boston Fern

Dracenas

Indivisa—This variety is used extensively as a center plant for vases, porch and window boxes, etc. Each, 50c and \$1.00.

Wolsley—One of the very finest highly colored varieties, having deep bronze and red broad foliage. Each, \$1.00 and \$1.50.

Terminalis—Ribbon-like leaves of richest shades and colors. Enjoys the sun and excellent for baskets, vases and boxes. Each, \$1.00.

English Daisies

Bellis Perennis—Like Pansies, the Daisies for beds or borders in the garden or cemetery are very much in demand. Blooming size plants in pink or white ready May 1st. Dozen, 50c.

One of Our Table or Dish Ferns

Ferns for Dishes

Pteris Wimscttii—A very pretty green foliage and crested Pteris.

Pteris Argyrea—The Peteris are among the easiest grown house Ferns, and the wonderful range of variegated foliage and form render them invaluable. Pteris Argyrea is of a dwarf habit with fronds prettily decorated with white.

Pteris Victoriae—This is considered by many to be the handsomest of the Pteris. The fronds are rich deep green. It is a vigorous and healthy grower.

Pteris Multiceps—One of the most strikingly variegated forms of the Pteris family.

Prices of Above Ferns: From 3-inch pots, 30c; 3 for 80c.

FERN DISH COLLECTION

Four beautiful table ferns suited especially

Four Distinct Varieties of Our Choice

Feverfew

Dainty milk-white double spherical flowers. Very free flowering and blooms from Spring until Fall. Excellent as a bedding plant and good for cutting. An old-time favorite. Each, 20c; 3 for 50c.

Aureum or Golden Feather —A fine sort with golden yellow foliage. Each, 20c; 3 for 50c.

Genista Racemosa

Flowers are very small, pea shaped, borne in close racemes. When in full bloom the entire plant is a solid ball of the brightest yellow, emitting a delicious lemon fragrance. 3-inch pot plants, each, 30c; 4-inch pot plants, each, 50c.

Fuchsias

favorite with grandmothers and a favorite still. Their color com-binations are wonderful, and their easy culture and free flowering proclivities make them exceptional sellers both for Summer and Winter blooming. We can highly recommend all of the following listed be-

Forget-Me-Not

Forget-Me-Not or Myosotis

Susanne-Of recent introduction. A great improvement on the older varieties, being earlier and a very prolific bloomer. Each, 20c; 6 for \$1.00.

Ficus or Rubber Plant

Elastica (India Rubber Tree)—This is the old re-liable thick leaved variety. A substantial house plant. Its foliage of a beautiful dark green, shiny appearance. Each, 50c and \$1.00.

Repens — Directly opposed in character to the upright growing varieties, being really a creeping or trailing vine. Fine for an indoor trellis. Each, 50e; 3 for \$1.25.

Grevillea or Silk Oak

A beautiful plant for decorative purposes of quick growth and easy culture. Foliage fern-like and graceful. Used extensively in grave decorations. Each, 20e; 3 for 55c; 6 for \$1.00.

New Black Prince—This is an improvement on the famous Black Prince. The flowers are much larger, having the same color markings. The plant is stockier. This is perhaps the most beautiful of the Fuchsias. Price, each, 3-inch pots, 30c; 4-inch pots, 50c.

Trailing Queen—A handsome trailing type exceedingly floriferous with purple corolla and flesh-colored tube and sepals. A most effective plant for hanging baskets and window hoves

kets and window boxes.

Phenomenal—The largest flowering Fuchsia, with long stems, petals red and center bright purple.

Black Prince—Red, single. A fine variety.

Little Beauty—Beautiful red sepals with purple corolla.

Pride of Orion—A fine new Fuchsia. Strong vigorous upright grower, flowers are white and extremely double. The bloossoms do not drop and it is a very early bloomer.

Van-der Strapp—A new superior white and pink Fuchsia. Prices, except New Black Prince, 3-inch pots, 25e; 3 for 65c; 4-inch pots, 40c; larger plants, 75c.

Fuehsia

Our collection of Geraniums is the largest in the Northwest. We devote several greenhouses to the culture of their many types and add new varieties as we find them worthy.

A Glimpse Into One of Our Geranium Houses

GERANIUMS

These old-time favorites offer an uninterrupted display of bloom over an extended period. Their ease of culture and clean growth hold them in the front rank among house plants and for cemetery decoration. We are listing varieties which we have found adaptable to Northwest conditions.

OUR DE LUXE HOME GERANIUM OFFER

Four large 4-inch pot plants, our selection of colors, all different.

Value \$1.80—Sent Postpaid to You for \$1.40

See Our Mail Bag Special for 3-inch Pot Plants

Our Geranium Aristocrats

Lindberg-A wonderful new sort with dazzling double dark pink crimson flowers. Each, 30c and 50c. Michell's Scusation-A new scarlet Geranium, an improvement on the famous Helen Michell. Flowers are double of the clearest possible shade of scarlet. A wonderfully heavy bloomer and it has no equal as a pot plant or bedding plant. Price, each, 3-inch pot, 30c; 4-inch, 50c.

Louisa-A darker crimson than Michell's Sensation; large double flowers, stock plants. The foliage is extremely beautiful on this variety. Price, each, 3-inch pot, 30c; 4-inch pot, 50c.

Anna Jelenick—This is by far the best Winter bloomer that we have seen. The flowers are a rich rose color and are double. The foliage is marked very prettily. A fine type. Price, each 3-inch pot. 30e: 4-inch pot, 50e.

Special Collection of the Above 4 Varieties from 3-inch pots, 95c; from 4-inch pots, \$1.50.

SINGLE VARIETIES

Mme. P. Morlan-Rosy salmon, free bloomer. Sentinel—Dark crimson, round flowers. Scaramouche—Salmon, shading to white.

Vera Oulianesk—White, clear, perfect flowers.

Yvette Prost—Rosy pink, fine for window boxes.

IVY LEAVED GERANIUMS

This class of Geraniums is rapidly growing in popularity. They are of easy house culture.

James Atfield—Large pink double flowers. Leopard—Lavender pink dotted with crimson. Souvenir de Chas. Turner—Deep bright pink.

Achievement—Rose with white eye.

Wm. Tracy—Double, light pink, a rather short habit of growth, very fine.

La Eleganta—Beautiful variegated foliage, white and green at first; later the white spots turn to scarlet.

SCENTED GERANIUMS

Lemon-The small foliaged old-fashioned Lemon

Geranium. Very fragrant. Rose-Scented—Very popular. Flowers pink. Apple—A variety in great demand for its refrshing apple perfume.

Another of Our Geranium Honses

VARIEGATED GERANIUMS

Happy Thought-Leaves yellow, center bordered with green, flowers rose.

Madame Salleroi-Bushy variety, used for borders, fine with Lobelia. Foliage green and white.

Mountain of Snow-Fine foliage variety, silver edge, flowers red.

Mrs. Pollock-Foliage yellow, green and red variegation; flowers red.

STANDARD VARIETIES (Double)

Helen Mitchell—A fine semi-double type of a clear scarlet color, with very large florets and truss. Early and free bloomer.

La Favorite—White, one of the best.

Louis Madeline-A deep pleasing rose color.

Marquis de Castellaine—Crimson, with immsene trusses of bloom.

Jean Viaud—Grand pink bedder.
Madonna—Snow white, good bedder.
M. Paul Blondeau—Bright rose, very large flower.
Mrs. R. Gloide—A semi-double—with bright deep pink flowers.

> Red Barney—This variety has broad, velvety, distinct foliage and vigorous habit—a full large round truss of double petals—a brilliant crimson red.

> Pink Barney—An excellent pink having all the outstanding features of the Red Barney.

> Beautie Poitevine—A beautiful type of semidouble Geranium. Exquisite salmon pink flowers.

A Glimpse in One of Our Pelargonium Houses

Pelargoniums or Martha Washington Geraniums

Our stock of Pelargoniums is beyond reproach and like our Geraniums we devote several houses to their culture and careful selection.

Mons Herzog—This has proved to be the most popular Pelargonium. Beautiful reddish salmon pink flowers borne freely and it retains its blossoms longer than any other variety and is a strong sturdy grower.

Easter Greeting - Its flowers, which are borne in great profusion from March until late Fall, are a fiery amaranth red, each petal bearing a blotch of deep brown or black and very large. It is of a very compact and bushy habit, and of easy house culture.

Gardeners' Joy—Nearly white, with an apple blossom pink at base of flower, the two upper petals blotched with deep brown. Produces one of the largest clusters of bloom of any known variety.

Wolfgang Goethe-Flowers large and slightly crimped, ground color dark red, with five well defined violet black spots. Considered the best dark variety.

Wilhelm Hauff-Flowers and clusters very large and strongly crimped. Ground color a purplish pink, with large brownish blotches on the upper petals. A profuse bloomer.

German Glory—Ground color an apple blossom pink with large dark brown blotches on upper petals; flowers and clusters are large; free bloomer and dwarf, robust branching habit.

Eastern Star-A light salmon color, with five large reddish brown spots. Has a long period of bloom, and is a dwarf compact grower.

W. C. Boyce—A beautiful shade of salmon.

Madam Layal—(The Pansy Geranium)—Small delicate pansy-like blossoms. Of easy house culture and a most profuse bloomer.

California Hybrids—Fine stock plants in this class with mixed colors involving all shades except those of the famous Easter Greeting.

Springtime—An improved beautiful very light pink; a real Spring color.

PRICES OF PELARGONIUMS—Each, from 3-inch pots, 25c; 3 for 65c; each, from 4-inch pots, 45c; each, from 5-inch pots, 75c and \$1.00. Specimen plants, large, \$1.50 and \$2.00.

YOU WILL WANT PLANTS THAT GROW IN MONTANA AND THE NORTHWEST WE OFFER YOU OUR 46 YEARS' EXPERIENCE IN MONTANA

Hanging Baskets

You will want a hanging basket or perhaps two for your porch or entrance at the prices we are able to offer them for this year. Our baskets can be filled with your choice of color scheme or left to our judgment. Prices range depending on the size of the basket and the number of plants used. Prices, each, \$1.25, \$2.00, \$3.00, \$4.00 and \$5.00. Not prepaid.

Porous Pottery Hanging Baskets

Hanging porous pottery baskets are rapidly becoming more popular owing to the fact that they hold moisture much longer than the moss-lined wire baskets, and are much more durable. We can supply these in 8-inch and 10-inch sizes. These pottery baskets are supplied with attached saucers to eliminate dripping.

Empty, each, 8-inch, \$1.50; 10-inch, \$1.75.

Filled, each, 8-inch, \$3.50; 10-inch, \$4.50. Express extra.

Heliotrope

Heliotrope will succeed in or out of doors. Their exquisite perfume makes them a favorite everywhere. Centifleur—One of the newer forms of medium lavender color, with enormous heads of bloom.

Elizabeth Dennison—A very compact large flowered form, almost violet in color.

Florence Nightingale—A lavender colored type, very floriferous. Prices, each 25c, 35c, 50c.

Hydrangea

A wonderful plant for Easter decoration, but they are becoming more popular each year for use on porch, lawn, or garden during the Summer. Our Hydrangeas are of the new French types and of easy culture.

During the Winter the plants should be kept in a cool light cellar without freezing. Only enough water supplied to keep the roots from drying out.

Colors are pink, blue, and white. June. (Available March to May.) Season is April to June. Prices, fine plants in blossom, \$1.00 to \$3.00.

Hepatica

Hepatica Triloba—Leopard Plant—Also called Liver Leaf. A novel plant with handsome foliage having bright yellow spots. A sturdy grower and of easy culture.

Each, from 3-inch pots, 25c; 3 for 65c.

Hibiscus

Well known Evergreen tender shrub which may be grown either in a pot or tub, or planted out during the Summer. In salmon and scarlet. Each, 50c.

Hoya Carnosa or Wax Plant

An old-time favorite indoor climber, bearing trusses of flesh-colored, star-shaped, delightfully perfumed, wax-like flowers. Rich green foliage. Each, 30c; 3 for 75c.

Impatiens Sultani

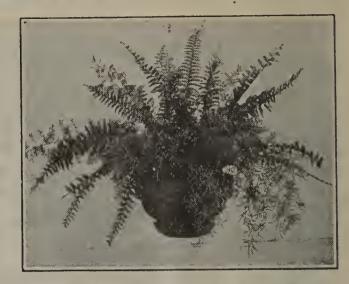

(Periwinkle)

The everblooming Sultani should be in everybody's collection. The dainty little flowers which cover the plant in a mass are a bright pinkish red in color. It makes an ideal house plant and is popular as a bedding plant, especially for shady nooks. Price, each, 3-inch pot plants, 25c; 3 for 65c; 4-inch pot plant, 40e; 3 for 90c.

Kalanchoe—Blossfeldiana

(The Ideal Table Centerpiece)

A beautiful new house plant. Easy to grow, makes a neat bushy plant; low growing, bearing brilliant red flowers. Every little growth produces flower stalks and blooms last for two months. Strong blooming size plants from 3-inch pots. Each, 40c; 3 for \$1.00; large specimens, \$1.25.

One each of above 5 varieties, \$1.00.

Achillea Boule de Neige

Our collection of Perennials, which affords such a wonderful and colorful display every Summer and Fall, is the largest and best in the Rocky Mountain region, and we are continually adding to our stock. For our climate in the Northwest there is no question but that they are by far the best class of plants for those who desire a profusion of bloom with the lest expenditure of effort. Do not confuse our perennial plants with the many seedlings so often on the market at such seemingly low prices. Our plants are grown in pots and are all blooming size and have passed at least one winter in our outdoor perennial frames. When you buy perennial plants buy the best and proven acclimated strains and varieties for they are a permanent planting.

Arenaria

Caespitosa—Plants form a dense velvety green carpet and very much in demand for planting between flagstones and cavities in the rockery. Each, 25c; 3 for 65c; 6 for \$1.25.

B. Comte—Brilliant, rich French purple, amaranth red, or wine color.

Bridesmaid—A pure white with large crimson-carmine eye. A beauty.

Elizabeth Campbell—Soft rose pink with lighter shadings and with a dark rose colored eye.

Ethel Pritchard—A beautiful rose mauve.

Firebrand — One of the newest varieties. Very bright red with deeper center. Trusses large.

Jules Sandeau—Flowers are extremely large and are a soft lilac pink color.

J. G. Von Lassburg—The purest and largest white on the market.

Milly—(Miss Milly Van Hoboken)—A good bright pink with soft mauve suffusion.

Miss Lingard—One of the easiest to grow and still one of the very best whites on the market—blooms two weeks ahead of other varieties.

Thor—This is one of the best of the salmon pink sorts.

R. P. Struthers—Bright rosy-carmine, with claretred eye.

Rheinlander—A rare shade of salmon pink intesified by a distinct claret-red eye.

Von Hindenburg — This is a comparatively new variety. Its color is a brilliant deep crimson red with slightly darker eye.

Any one of the above varieties, each, 25c! 6 for \$1.25. Large field grown clumps, each, \$1.00 and up.

Phlox Subulata — "Mountain Pinks" — An early flowering type with pretty moss-like evergreen foliage, which during May and June is hidden under the masses of pink bloom. Unexcelled for the rockery. Each, 25c; 3 for 65c; 12 for \$2.50.

Phlox Coernlia—Same as the Mountain Pinks except the flowers which are a pretty blue color. 3-inch pot plants, 30c; 3 for 75c.

\$1.85

Platycodon

Platycodon

Balloon Flower-or Japanese Bell Flower The Platycodons are closely allied to the Campanula or Canterbury Bells. They form neat branched bushes of upright habit, growing about eighteen to twenty-four inches in height. They bear blue or white flowers in great profusion from July to September. Splendid for the hardy border. Each, 25c; 3 for 65c.

Primula or Hardy Primrose

Auricula Alpina—One of the treasures of the rock garden. Attractive growth, rosette of thick leaves. Flower stalks rise to a height of 6 to 8 inches bearing heads of bloom of various colors. Large strong plants, each, 35c; 6 for \$1.75.

Primula Polyanthus Veris Hybrids — With colors ranging from lilac purple and violet to buff orange and red. Strong 3 and 4-inch stock, each, 35c; 6 for \$1.75.

Rudbeckia or Golden Glow

Is too well known to need a lengthy description. Perfectly hardy, and will succeed anywhere. Rich golden yellow flowers. Each, 20c; 3 for 50c.

Saponaria

Ocymoides—A very pretty border and rockery plant. During the Summer months it produces a mass of small bright rosy pink flowers. Price, each, 25c; 3 for 65c.

Sedum

Spectabile—It attains a height of 18 inches with broad light green foliage, and bears immense showy heads of rose-colored

flowers. One of the best plants to stand dry weather. Fine for the border garden and especially useful for cemetery work. Each, 25c; 3 for 65c.

Kamschaticum—Bright orange-yellow flowers with prostrate green foliage turning golden in Autumn. Each, 25c; 3 for 65c.

Album—Dwarf and spreading variety, thick waxy round foliage, white flowers; good rock plant. 3-inch pot plants, each, 25c; 3 for 65c.

Coccineum—A beautiful rosy crimson variety, good rock plant. Each, 25c; 3 for 65c.

Sweet Wivelsfield

Dianthus Allwoodi—Crossed with Sweet William (Dianthus Barbatus). Few plants can compare with it for wealth of color and length of flowering season. It is distinct in habit and freedom of growth. Wonderfully colored flowers in trusses and perpetual flowering. Plants, each, 25c; 3 for 65c. Field grown clumps, \$1.00.

Statice, Great Sea Lavender or Limonium

S. Latifolium—A noble plant for the hardy border. Produces clumps of leather-like leaves, with heads of bloom covered with small lavender flowers and lasting until frost. The flower sprays when cut and allower to dry will keep in almost their fresh appearance for months. It has a fine appearance in the hardy border. In great demand for making garden bouquets. Each, 25c; 3 for 65c. Field grown clumps, \$1.00.

Scabiosa

Caucasica—One of the handsor est of the Hardy Perennials, bearing on long wiry stems beautiful artistic lavender blue flowers. A fine cut flower, 18 to 24 inches. Each, 25c; 3 for 65c.

Shasta Daisy—(See Chrysanthemum Maximum, Page 25) Sweet William—(See Dianthus, Page 25)

Trollius

Globe Flower or Giant Buttercup

Mixed Hybrids-Desirable free flowering plants. Colors ranging from pale yellow to a deep orange. Succeed well in a half shady location and they are wonderful for cut flowers and a gem for the rockery. Mixed colors only. Each, 30c;

Our Perennial Plants Have Been Made to Live Outdoors for at Least One Winter

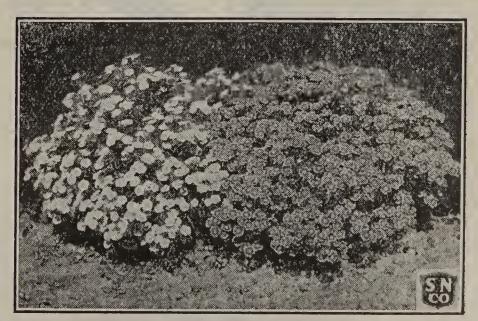

Sedum Spectabile

Statice

Sweet Wivelsfield

Thalictrum-Meadow Rue

Salvia

Azurca-Rocky Mountain Species. A fine Hardy Perennial averaging 3 to 4 feet in height. Produces late in the Summer pretty spikes of sky-blue flowers. Each, 25c; 3 for 65c. Strong field grown clumps, \$1.00.

Sweet Rocket or Hesperis

A Perennial that will succeed in any location, producing large spikes of blossoms from white to lilac. Grows from 3 to 4 feet high. Price, each, 25c: 3 for 65c.

Thalictrum Dipterocarpum or Meadow Rue

This beautiful hardy plant should be in every garden. It is a real gem for the hardy border, and its graceful sprays of lavender flowers, brightened with a bunch of yellow stamens, are invaluable for cutting; 4 feet, each, 25c; 3 for 65c. .. Field clumps, \$1.00 each.

Tritoma or Red Hot Poker

A very handsome and showy border plant with rush-like foliage. The blossoms are unique in shape, the lower petals being tinged with orange, ultimately becoming a brilliant flame red at the top. Flowering season July to September. Must be carefully protected during Winter. Each, 30c; 3 for 75c.

Valeriana Officinalis or Hardy Garden Heliotrope

A fine hardy plant, with very showy heads of bright rose flowers, produced in great numbers on stems about three feet high, heliotrope scented. A constant bloomer until frost. Each, 25c: 3 for 65c. Field grown clumps, \$1.00.

Variegated Grass or Eulalia

A very handsome, hardy, variegated grass which gives a touch of color to any hardy border. This plant is also especially useful for hedge purposes. Each. 20c; 3 for 55c; 6 for \$1.05; 12 for \$2.00.

Veronica Spicata

This well known "Speedwell" is one of the best of the genus, bearing long spikes of blue flowers from July until the early frosts. One to two feet. Strong plants, each, 25c; 3 for 65c. Large field clumps, each, \$1.00.

Incana-A gem for the rockery in every way. Each. 25c; 3 for 65c. Repens—A fine rock or carpeting plant with beautiful light blue flowers. Each, 25c; 3 for 65c.

Viola

Jersey Gem-One of the most valuable Violas yet introduced. The plants are of compact, sturdy growth, bearing pure violet flowers on good stems, thus making it a splendid subject for cutting as well as a good border plant. Blooms early in Spring to the end of the season. Each, 30c; 3 for 75c; 6 for \$1.40.

Helena Violet

A remarkably hardy type. The flowers are very large and borne on long stems, a very profuse bloomer and very fragrant. Fine for the rockery and that rather shady location. Each, 25c; 3 for 65c.

Water Lily-M. Albida

Water Lilies

We offer you the most adaptable varieties for Northwest conditions for your Lily pool.

M. Albida—A large sparkling white variety; vigorous grower. Each, \$1.00.

Odorata Gigantia-A fine gigantic white Lily. Each, 60c.

Cape Cod Pink-A fine pink Lily. Each, \$1.00.

M. Chromatella-A charming canary yellow variety. Each, \$1.00.

Our Hardy Rock Garden Plants

How to Make a Rock Garden

The rock garden should be constructed in a spot that is subject to full light and to good aeration. Any natural slope in the ground can also be used to good advantage. Take advantage of any natural outcropping of rock on your grounds.

Rocks will usually be gathered from the nearest and most easily accessible source. Weatherworn rocks produce a pretty and natural effect, and on rather sharp sloping ledges the use of porous and water-holding rocks is much in order because it is in these positions that the conservation of moisture is a large factor. Go to both extremes in choosing rock sizes as too many rocks of either a large or small size tend to make the effect unnatural.

A good well drained garden loam is fine for a majority of rock garden plants.

The soil should be thoroughly prepared first and then the existing grades and the desired contours should be laid out in proportion. The bottom rocks should be placed first and anchor the standard first land and anchor the standard first land and anchor the standard first land and anchor the standard first landard first la the rocks firmly by thorough tamping. Arrange rocks on slopes so that erosion by water is checked and so there will be plenty of light and air for the plants.

A Model Rock Garden at Our Nursery

The best time to plant is in the Spring, although many of the hardy pot grown rock plants can be transplanted equally as successfully in the Fall under Montana conditions. If you are in doubt as to which plants to use for Fall planting just drop us a line and we shall be glad to advise you.

We are ready to help you at any time with your rock garden ventures. Our 46 years' experience of growing and selection under conditions found in Montana and the Northwest gives you something no other firm can offer you. Following is a list of rock garden plants which are adaptable to conditions in Montana and the Northwest and for complete descriptions turn back through the Perennial section of this Year Book to the pages indicated.

Our Hardy Rocky Mountain Peonies

Grown and Selected in Our Nursery at the Foot of the Rocky Mountains

One of Our Peony Fields

CULTURE:

Peonies may be planted either in the Fall or Spring. Dig the soil deeply and cover the eyes or new buds to a depth of not more than three inches. Too deep planting causes poor growth and prevents blooming. Their cheif requirements are good rich soil and a sunny or partly shaded location. Give a liberal supply of water during the growing season. Do not disturb extensively by cultivation.

Delivered Prepaid to You

Department of Hardy Trees, Shrubs and Vines

Our forty-six years' experience in Montana has enabled us to select and grow only such Trees, Shrubs and Vines that we have found to be hardy and adaptable to conditions found in Montana and the Northwest. This is something no other institution can offer you.

CARE IN WATERING

Growth should be encouraged during the early Summer months and ample water should be applied at this time. Do not merely wet the surface but give several successive applications, so that the water goes to the very lowest root extremeties. About the last part of August and during September water should be gradually withheld so that the Trees and Shrubs will have a chance to mature up properly for the Winter. After the leaves have fallen and the Trees have gone into their Winter wormant state, it is well to soak with water again.

NOTICE

We endeavor to send out only stock that will grow with proper care and attention. We should be advised BEFORE AUGUST 1 should any Trees, Shrubs, etc., fail to grow so that our representative may have an opportunity of calling and inspecting same. We will replace any of our nursery stock at one-half price that does not start growth by August 1.

The New Truehedge Columnberry

(Hardy-Drouth Resistant)

This new variety of Japanese Barberry (Plant Patent No. 1190) is a beautiful upright grower, pyramidal in shape, requires very little trimming to make a perfect hedge, bears dense, much heavier foliage than the old Jap barberry. ..Of a glossy green distributed right to the ground, has berries very similar to the old Jap barberry. Can be grown as a specimen into perfect spires and pyramids to a probable height of five feet and is rust immune. Price 9-12 inch size, only 35c; 5 for \$1.35; 25 for \$5.50; 60 for \$11.00; postpaid.

The New Truehedge Columnberry

Japanese Barberry

Barberry or Berberis

Not the Rust Bearer

Berberis Thunbergi—This is the Japanese green Barberry. It is very beautiful, dense and low growing. The leaves are small, light green and towards Fall assume rich brilliant colors of red, orange and yellow. The Japanese Barberry is not a host for the wheat rust.

Each, 35c; 3 for 90c; larger sizes, 75c to \$1.50.

Write for Prices on Barberry hedge stock.

Red Leaved Barberry (B. Thunbergi Autropurpurea)—A fine variety which is similar in all respects to the green variety except that the foliage is a rich lustrous bronzy red all through the growing season. Bears brilliant scarlet berries. Each, 40c; 3 for \$1.00; larger sizes, 75c to \$1.50.

Buckthorn

A good hedging plant which may be held into a sheared fence of from three to five feet or grown into a tall screen of fifteen feet. A quick growing hardy Shrub.

12-inch to 18-inch, doz., 90c; 100, \$6.50. 18-inch to 24-inch, doz., \$1.10; 100, \$8.00.

When planning on the artistic arrangement and planting of your grounds, we cordially invite you to consult our experienced staff of nurserymen who are at your service at all times to give information on the most desirable Trees. Shrubs and Plants and to furnish cost estimates.

To those who are anxious to make an immediate showing on their property, we have a fine stock of extra large specimens of most of our Trees and Shrubs. Drive out to our Nursery and see them growing. Make your own selection.

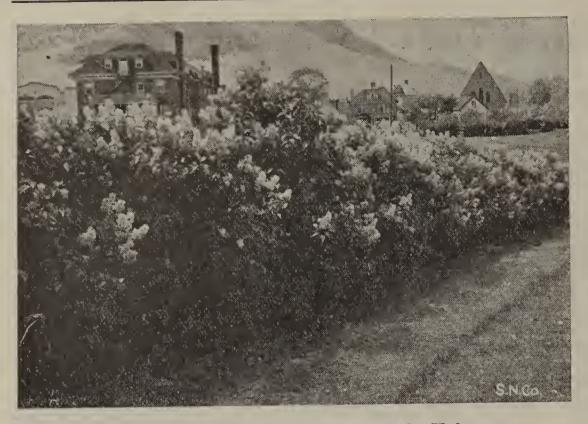

Cotoneaster

Peking Cotoneaster —

A beautiful low
Shrub with dark
green leaves; flowers are pinkish
white and berries
are black. One of
the hardiest Shurbs
we know of and will
tolerate considerable
shade. Each, 18-24
inches, 50c; 3 for
\$1.35; larger sizes,
75c to \$2.00.

Cotoneaster

A Hedge of Our Lilaes in Hill Park, Helena

Cornus or Dogwood

Because of the distinctive color of its bark and its attractive flowers and fruit the Dogwood is suitable either for planting as an individual Shrub or in a hedge or foundation planting.

Native Red Dogwood — Noted for its beautiful reddish bark; bears white flowers, followed by white berries. Each, 2-3 ft., 45c; larger Shrubs, 75c, \$1.00 and up.

Golden Dogwood — Another ornamental variety, but with yellow wood. Fine for either specimen or foundation planting. tion planting. Each, 50c, 75c and \$1.00.

Silver Blotched — Variegated Dogwood — A very beautiful Shrub and becoming very popular for foundation planting. It adds color and zest to shrubbery groupings with its leaves of green blotched and striped with silvery white. Each. with silvery white. Each, 60c, 85c and \$1.00.

Philadelphus-Virginal

Lilacs

Nowhere do they succeed better, produce more beautiful foliage and flower more profusely than in Montana and the Northwest. We have an exceptional stock of this general favorite with a fine selection of the most adapted varieties.

Purple—This is an old-time favorite very hardy and of rapid growth. Excellent for specimen purposes or for hedge use.

White—The companion to the purple, very hardy and fragrant and producing large trusses of beautiful flow-

Prices of the above two varieties, 11/2 to 2 ft., 35c each, 3 for 90c; 2-3 ft., 50c, 3 for \$1.25; 3-3½ ft., 75c, 3 for \$2.00. Larger sizes, \$1.00 up.

Persian Lilac—This is quite distinct, with small foliage, graceful growth.

Color, the true Lilac shade. Each, 2-3 ft., 75c, 3 for \$2.00. Large Specimen, \$1.00 and up. .;

Villosa—This is a most beautiful species. Bears its purple flowers about a month later than the other varieties and they turn nearly white when fully open. Excellent for a shady exposure. Each, 18-24 inches, 40c, 3 for \$1.00; 2-3 ft., 50c, 3 for \$1.35. Larger sizes, \$1.00 and up.

French Hybrid Lilacs

Pres. Grevy—A very fine double, producing trusses of pale blue flowers.

Charles X — Deep purplish
Lilac flowers in large
trusses. Flowers in May.

Madame Lemoine — Magnificent panicles of large double white blooms.

Ludwig Spaeth—Single. Very dark crimson purple. One of the darkest shades known.

Belle de Nancy - Beautiful rose, white center.

Prices of French Lilacs— Each, 2-3 ft., 85e, 3 for \$2.40; larger specimens, \$1.00 and up.

High Bush Cranberry or Viburnum Opulus

Hight Bush Cranberry—A highly decorative tallgrowing Shrub bearing white blossoms in broad cymes. Scarlet fruit; very showy Shrub. Each, 2-3 ft., 75c, 3 for \$2.00; larger specimens, \$1.00

Lilac Rooted Cuttings

Suitable for the planting of hedges and windbreaks. Well rooted cuttings of the Purple and White varieties. Per 50, \$4.00; 100, \$7.50.

Philadelphus, Mock Orange or Syringa

Native—A selected type with white fragrant flowers and very hardy Each, 50e; 3 for \$1.25.

Pyramidal—This is a tall pyramidal grower bearing beautiful double white

flowers.: Each, 60e; 3 for \$1.65.

Philadelphus—Virginal—A medium sized Shrub with beautiful fragrant semi-double flowers. The flowering season lasts somewhat longer than on the other two types. Each, 2-3 ft., 60c; 3 for \$1.65.

Privet

Vulgare—European Privet—We have searched many years for a Privet that would withstand Montana Winters and we are now offering you this variety which has proven hardy in our Nursery. For those in extremely high altitudes we would not recommend it. Prices—25 for \$2.50; 50 for \$5.50 100 for \$10.00.

Honeysuckle—Tartartian

Tartarica Alba-Flowers are a bluish white. A hardy bush of very dense growth.

Tartarica Rubra—Bears light crimson flowers on a fine shapely bush. The darkest color of all Honeysuckles. Pink Tartarian—Develops a tall bush with large pink flowers; fine sturdy

growers. Prices of above three varieties of Honcysnekles-Each, 50c and \$1.00; larger bushes, \$2.00 to \$4.00.

Sambucus or Elderberry

A very valuable Hardy Shrub of quick growth and branching habit. When in the bloom the Shrub is a perfect bower of beauty over a long period and again in the Fall when burdened with its black fruits. Each, 2-3 ft., 60e; larger Shrubs, \$1.00 and up.

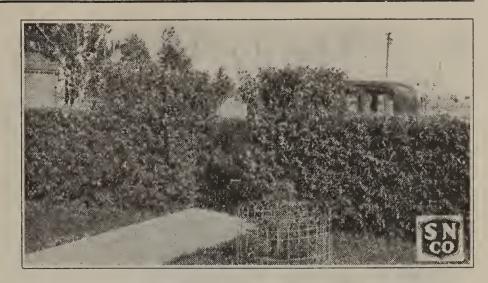

Sambucus or Elderberry

WRITE US FOR QUOTATIONS ON LARGER SIZES AND QUANTITIES THAN ARE LISTED

Russian Olive

Elaeagnus Augustifolia-There is a greater demand each year for this fine hardy Shrub. It has proven to be a great drought resister and is a fast, vigorous grower. Foliage is a beautiful green above and silvery white below. Bears fragrant yellow blossoms. Makes a beautiful trimmed or untrimmed hedge and may also be grown as a specimen and we have some fine large specimens to offer.

Price-12 to 18-inch stock, per doz., 85c; per hundred, \$6.00; 18-24 in., per doz., \$1.10; per 100, \$7.00. Write for prices on larger stock.

Russian Olive Hedge in Helena

Snowball or Viburnum

One of the hardiest of Shrubs and a favorite everywhere. During May and early June it is a perfect mass of blooms producing large globular pure white flowers. It is ideal for landscape work. Each, 2-3 ft., 75c; 3 for \$2.00. Large specimens, balled and burlapped, \$3.00 to \$5.00.

Siberian Pea or Caragana

The caragana or Siberian Pea is a great drought resister amongst Shrubs and is the variety recommended to our farmers and ranchers in the treeless regions of Montana. For wnidbreak purposes in exposed situations, for specimen tree planting or for Shrub use we cannot voice the praises of this variety too strongly. Has fine clean foliage, and rich golden blossoms, with the flowers hanging in regular clusters. It is especially useful for hedge purposes.

Prices—12 to 18-inch stock for hedge purposes, \$5.00 per 100; 50 at 100 rate. 18-24-inch stock for hedge purposes, \$7.00 per 100; 50 at 100 rate. 3 to 4-ft. Shrubs, each 50c; 3 for \$1.35.

SPECIMEN SHRUBS OF CARAGANA \$1.00 to \$10.00 F. O. B. Helena These Shrubs are extra fine stock, balled and burlapped at the root, thus insuring arrival of the Shrubs in the best pos-

sible condition.

VISIT OUR NURSERY See Our Trees and Shrubs Growing

Hardy Vines for the Northwest

Clematis Jackmanii

Silver Lace Vine

Polygonum Auberti-A rapid growing climber with small foliage producing a wealth of creamy white flowers borne in foamy sprays. 2-year-old Vines, each, 75c; 3 for \$2.10.

Virginia Creeper

American Ivy-Woodbine

This Vine is, without doubt, the very best and most hardy variety for this section. Everywhere it has been planted it has succeeded wonderfully. It produces masses of rich dark green foliage deeply cut, which assumes brilliant shades of yellow, crimson and scarlet in the Fall. It is the ideal Vine for covering fences, walls, trees, rocky slopes, etc. Our stocks are clean, hardy and of sturdy growth and we feel safe in saying, are some of the finest in the country. country.

Each, 75c; 3 for \$2.00; each, extra large Vines, \$1.50; 3 for \$4.00.

Hop Roots

For quickness in covering residence fences, arbors, etc., the Hop Root leads. The peculiar shades of its foliage, extreme hardiness and quick growth make it a very desirable Vine. 3 for 75c; 6 for \$1.40; doz., \$2.75.

Clematis

One of the most popular of all trailing Vines. When in bloom the dense sheets of blossoms, with their most pleasing fragrance, give a beauty indescribable.

To obtain good results they must have rich soil, perfect drainage and an abundance of water and most important of all they must be planted with the crowns about 3 inches beneath the surface of the soil.

Heretofore it has been difficult for many to transplant these plants with success, so this season we are again featuring pot-grown stock of A1 quality which will come with a ball of earth and are sure to give satisfaction.

C. Jackmanii—The popular rich purple variety with large flowers and very hardy. Each, \$1.00; 3 for \$2.75.

Mme. Eduard Andre-One of the very finest red varieties on the market; very effective. Each. 1.00; 3 for \$2.75.

Rocky Mountain—A sweet-scented rapid grower, extremely hardy and producing magnificent foliage and great masses of flowers. Good strong roots. Each, 40c; 3 for \$1.10.

The Main Drive Through Our Trees and Shrubs

IMPORTANT TO TREE BUYERS—In buying shade and fruit Trees or other Nursery Stock from THE STATE NURSERY AND SEED CO., you are also getting free of charge the experience of FORTY-SIX YEARS of production of these goods in Montana. This can not be offered you by any other house at any price.

We are proud of our great fields of Trees which we have tested and tried so thoroughly and we invite you to see them growing in our Nursery high up on the eastern slope of the Main Range of the Rocky Mountains.

We have larger specimens of nearly all Trees listed and if interested we invite you to write about them.

We take special care to send out only such stock that we know with proper attention will grow.

Ash

American White—The best hardwood Tree for Montana, being extremely hardy and growing into a most beautifully formed head. We can not recommend this Tree too highly for this section, either for parking purposes or for planting as individual specimens.

as individual specimens.

Each, 6 to 7 ft., \$1.50; 6 for \$7.50; each, 7 to 8 ft., \$2.00; 6 for \$10.00; each, 8 to 9 ft., \$2.50; 6 for \$12.50. Larger specimens, \$3.00 to \$5.00.

Green Ash—A fine hardy variety of this clean-growing Shade Tree, in great demand. 5 to 6 ft. size only. 6-8 feet, each, \$1.25; 3 for \$3.25.

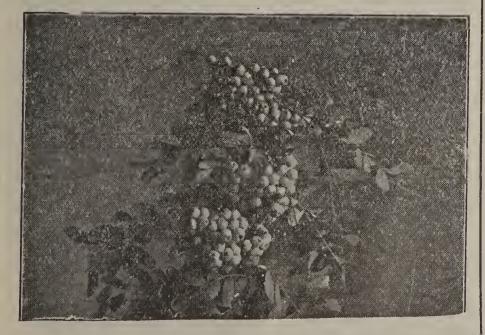

European Mountain Ash

This is without doubt one of the very best ornamental Trees, and because of its outstanding beauty and hardiness, together with its fine foliage and lovely blossoms, followed by massive clusters of beautiful berries from July till Winter, is always in demand.

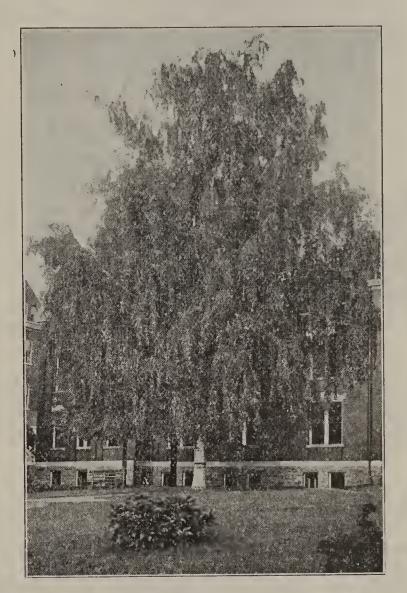

5-6 ft., \$1.75; 3 for \$5.00; larger specimens \$2 up.

Oak Leaved Mountain Ash

Another very handsome Tree equally as showy as the Ash leaved variety and producing immense clusters of bright red berries. Foliage dark lobed and oak shaped—a very hardy Tree of pyramidal habit. Each, 5-6 ft. \$1.75; 3 for \$5.00.

European Mountain Ash Berries

Cut Leaf Weeping Birch

Birch

Canoe Birch—A very hardy and beautiful American Tree of fine shape and delightful bark. An excellent specimen for lawn or other decorative purposes. 6 to 8 ft., \$2.50 each.

Cut Leaf Weeping Birch

Very beautiful form of the European White Birch; the main trunk, with snow white bark, grows as straight as an arrow. Branches spread slightly, while the fine slender shoots hang vertically. Foliage fine and deeply cut. One of the most beautiful of deciduous Trees. Each, 5 to 6 ft., \$3.00; 3 for \$8.00; 6 to 8 ft., \$4.00; 3 for \$11.00.

Box Elder or Manitoba Maple

Often called the Ash Leaved Maple. Requires but moderately rich soil, and is of a vigorous growth. Has been so popularly planted that it needs no description. Each, 5 to 6 ft., 85c; 3 for \$2.25; 6-8 ft., \$1.25; 3 for \$3.25; 8 to 10 ft., \$1.50; 3 for \$4.00.

Horse Chestnut

A very handsome and beautiful Tree producing spikes of white flowers in great profusion and sweetly scented. May be frequently seen in many towns of the state. Well worth trying. Each. 4 to 5 ft., \$1.50.

Horse Chestnut Trees in Our Nursery

American Elm

FEED YOUR OLD TREES PLANTONE

Elm

Ulmus Americana — A noble, native American Tree, attaining a large size, with wide spreading head and graceful drooping branches.

Each, 6 to 8 ft., \$1.25; 3 for \$3.50.

European Larch

A tall, handsome deciduous conifer, with pyramidal head. Covered with soft feathery foliage of a delicate green. It is very graceful, resembling the Spruce. In the Autumn its needles turn a golden color before falling. Prices, \$3.00, \$4.00 and \$7.50, balled and burlapped, F. O. B. Helena.

Linden, American

A stately and well shaped Tree. It makes a fine shade Tree with bright shining leaves. Bears blossoms in July. A vigorous grower in the Northwest. 5-6 ft., each, \$1.75; 3 for \$5.00.

Maple

Hard Sugar Maple-An excellent shade Tree. The foliage in the Fall assumes very striking tints of yellow. It is one of the most handsome of the species, of very hardy nature. Each, 6 to 8 feet, \$2.00; 3 for \$5.50.

Soft Maple—Of easy culture and rapid growth, forming well shaped Trees when given sufficient room to develop. Splendid stock. Each, 6 to 8 feet, \$1.50; 6 for \$7.50.

Acer Schwedler-Purple Leaf Maple-A red and purple variety. In midsummer the leaves are purplish green, in Autumn a golden yellow. A rare variety. Each, 6 to 8 feet, \$2.75; 3 for \$8.00.

American Linden

A Block of Our Fine Silver Leaf Poplars

Honey Locust

One of the hardiest of the Locusts. Produces blossoms in long white racemes, very fragrant. Resistant to borers and drought. 5 to 6 feet, each, \$1.50; 3 for \$4.25.

Poplars

These hardy Trees thrive in almost any soil, and as a class are unequaled for this section.

Silver Leafed Poplar — We especially recommend this beautiful hardy member of the Poplar fam-The under sides of the leaves are a beautiful silvery gray, giving it a mark of distinction among the Poplars. It is very resistant to disease and a fast, vigorous grower, developing a beautiful shade head. We offer fine 6 to 8 foot Trees at, each, \$1.00; 6 for \$5.00; 8-9 feet, each, \$1.25; 6 for \$6.50; 9-10 feet, each, \$1.50; 3 for \$4.00.

Balm of Gilead—Native—A variety that does remarkably well in most parts of Montana, especially the exposed prairie lands of Eastern Montana, and should be extensively planted.

Bolleana—A tall, columnar, rapid growing Tree which is an improvement over the Lombardy, being more hardy. Foliage a bright green above and silvery underneath.

Canada Poplars—This is one of the hardiest and fastest growing Trees for the Northwest. Farmers living in the treeless sections of the Northwest can add materially to the appearance and value of their property, in addition to deriving a great deal of pleasure by a systematic planting of these Trees.

Lombardy Poplar—This variety is a very rapid grower—very erect, forming living pillars of handsome green foliage. Subject to winter killing in some sections.

Price of Any of the Above Varieties of Poplars

Except Silver Leaf Each, 4 to 5 feet, whips, 40c; 6 for \$2.00; 25 for \$6.25. Each, 5 to 6 feet, 75c; 6 for \$4.00. Each, 6 to 7 feet, \$1.00; 3 for \$2.50. Each, 8 to 9 \$2.50. Each, 8 to 9 feet, \$1.50; 3 for \$3.75. Each, 10 feet, \$2.50; 3 for \$6.50; 12 to 14 feet, each, \$4.00. Whips of Canada Poplars only, 1 year, 2 to 4-foot whips, per doz., \$3.00; 50, \$7.50; 100, \$15.00.

Plum, Flowering

Prunus Cistena-Veryhandsome form with rich purple leaves. Covered in Spring with beautiful white flowers, later with wine red fruit. Each, 2-3 ft., \$1.25; 3 for \$3.50.

Prunus Triloba-One of the finest and hardiest of early Spring-blooming Shrubs. The flowers appear very early in the Spring and are very double and of a beautiful light pink. Each, 2-3 ft., \$1.00; 3 for \$2.50.

Bolleana Poplar

A Beautiful Specimen of Russian Willow

Willows

Among the best hardy Trees for our Northwest climate, are the Willows. They are handsome and ornamental in any location and are very hardy. Our stocks of these cultivated varieties of Willows are perhaps the largest and best to be found in any section, and produced as they are—at an altitude of over 4,000 feet—on the eastern slope of the main range of the Great Continental Divide, are the hardiest that can be produced anywhere.

Golden Willow — Golden colored bark, makes a handsome specimen Tree anywhere, and hardy under all conditions.

Russian Willow—A very strong growing, tall variety, extremely valuable for windbreaks, very hardy and of very rapid growth and of great value also for specimen Trees.

Each of the above two varietics, 3-4 ft. whips, 25e; 3 for 65c; 4 to 5 ft., 50c; 6 for \$2.50; 5 to 6 ft., 75e; 6 for \$3.75; 8 ft., \$1.00; 6 for \$5.00; 10 ft., \$2.00; 6 for \$10.00.

Laurel Willow-One of the very best Willows for ornamental planting. Leaves very large and shining. Fragrant when bruised; produces in Spring large rich-colored pussy willows. Each, 6 to 8 ft., \$1.00; 8-9 ft., \$1.50 and \$2.00 and up.

Tree Cuttings

We sell quantities of cuttings of the following varieties: Poplars, Willows and Native Balm of Gilead, for the rancher or farmer who wishes to buy quantities of Trees but does not wish to invest in rooted Trees. 100, 85c; 1,000, \$7.00; 500 at 1,000 rate.

TREE PAINT—A specially prepared product with asphalt base to prevent decay. A penetrating paint that is not affected by heat or cold or moisture. Used by the country's leading tree surgeons. Prices—½-pint, 50c, postpaid, 60c; pint, 75c, postpaid, 85c; quart, \$1.20, postpaid, \$1.40; by express, F. O. B. Helena, gallon, \$3.25.

Our Mr. T. E. Mills, Jr., and C. W. Hoffman, inspecting some dormant nursery stock in our fields.

Pfitzer Juniper

PROTECT YOUR BIG TREES WITH TREE TANGLEFOOT

From the ant cow or common aphis by keeping ants out of the trees, also all other forms of crawling insects. Apply Tree Tanglefoot Early in the Season and you have complete protection for the rest of the year. Price, pound, 65c, postpaid, 75c; 5 lbs., \$3.00, postpaid \$3.19.

Colorado Blue Spruce

Colorado Blue Spruce — Picea — Pungens—Here is the culmination of Nature's highest effort to produce the beautiful. It is a perfectly shaped Tree with heavy foliage of rich, glistening blue, which flashes and sparkles in the sun.

Price, 12 to 15 inches, \$3.00; 15-18 inches, \$3.50; 1½ to 2 ft., \$5.00; 2 to 2½ ft., \$8.00, F. O. B. Helena. For prices on larger sizes, please write.

Colorado Green Spruce

The green variety of this fa-mous Spruce which has the same graceful shape and quality but exhibits a bright green coloring of the needles.

Price, 15-18 inches, \$2.50; 1½ to 2 feet, \$3.50; 2½ to 3 feet, \$5.50.

White Fir

White Fir-Abies Concolor-One of the most popular and picturesque of the Evergreens. Both the upper and under sides of the needles are a beautiful grayish blue. It retains a distinct pyramidal outline. Each, 2 to 2½ feet, \$5.50; 3 to 4 feet, \$8.00.

Black Hills Spruce

Black Hills Spruce—The hardiest of all Spruce, being symmetrical, compact and bushy in habit of growth. The foliage varies from green to bluish tint. Price, each, 15-18 inches, \$2.50; 2 to 2½ feet, \$4.50; 3 to 3½ feet, \$7.50.

Pines

Mugho Pine—A very short stout and bushy Evergreen, very popular for low border plantings and foundation work. It never grows over 4 to 5 feet tall but spreads out 6 to 8 feet in diameter. 18-in. x 18-in., \$4.00; 10-in. x 12 in., \$2.50.

Austrian Pine-Pinus Nigra-The leaves are two in a sheath, straight and slender, from 4 to 5 inches long and of such a deep rich green color that it is known as the "Black Pine." 2½ to 3½ feet, \$5.00; larges Trees, \$6.00-\$10.00.

Junipers

Pfitzer—The shape and the size may be readily controlled by shearing, and it is shade tolerant, being used extensively on the north sides of buildings. It is a low-growing and very bushy type of Evergreen. Each, 1 to 1½ feet spread, \$2.50; 1½ to 2 feet spread, \$4.00.

Silver Juniper—Juniperus Scopulorum—This is a select form of striking blue foliage. It is the whitest Juniper obtainable. The silvery foliage is magnificent as it sparkles in the sun. Each, $1\frac{1}{2}$ to 2 feet, \$2.75; 2 to 3 feet, \$4.00.

Red Cedar

Juniperus Virginian-It is a compact, pyramidal type. As Winter comes on, the the new foliage present a pinkish appearance. The early Spring color is very bright green, gradually darkening during the Summer. Each, 1½ to 2 feet, \$2.50; 2 to 2½ feet, \$3.50; 3 to 3½ feet, \$5.00.

NOTE—All our Evergreens are shipped with a large ball of earth, securely burlapped. When received, great care must be exercised not to break this ball of earth. At planting time loosen only the top of burlap, then thoroughly pack the soil around the ball of earth, before satarating with water.

WE PAY DELIVERY CHARGES

Apples

Duchess of Oldenburg—One of the hardiest and most productive of our large Apples. Fruit streaked red (Fall variety).

Haralson—A dandy Winter Apple, originating at the Minnesota fruit breeding station. It is a sturdy, hardy grower and is resistant to fire blight. Bears a good crop of handsome red Apples early.

Hibernal—A splendid Fall variety, very hardy. A really good Apple for exposed situation.

McIntosh Red-Too well known to need description.

Yellow Transparent—Earliest, of splendid quality, and does well in an exposed situation. Fruit light yellow.

Wealthy-Leading Winter variety for Montana; red

Pattens Greening—Has proven hardier and a better variety than the Northwest Greening. Fruit large, green, becoming yellowish green. Flesh yellow, firm, good flavor.

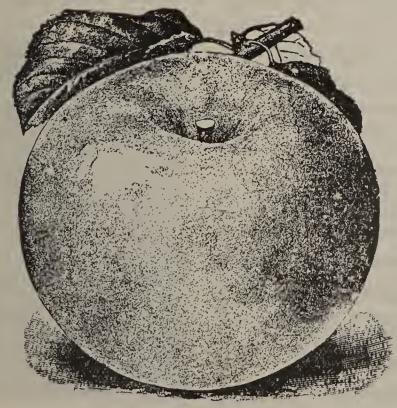

Red Astrachan-A large deep crimson Summer Ap-

Prices of Apple Trees—Each, strong, 4 feet and up, \$1.00; 3 for \$2.75; 6 for \$5.25. Larger specimens \$1.50 and up.

Crab Apples

Hyslop—Fruit medium to large, yellow grounded with heavy shadings of deep crimson. Flesh firm, yellow and astringent.

Florence—A Crab of high quality for Northwestern conditions.

Wealthy Apple

Whitney — Bears quantities of very large fruit. Good both for eating and cooking. Very hardy.

Transeendent—Very productive; fruit yellow with red cheek. The variety generally used for jelly. Prices of Crab Apple Trees-Each, 4 feet and up, \$1.00; 3 for \$2.75; 6 for \$5.25.

> (Larger Apple Trees of any of the above \$1.50 to \$4.00)

Cherries

Cherries do very well in some parts of Montana, while in others they will not succeed. We advise our customers, where Cherries are not grown, to test a tree or two before attempting to plant on a large scale.

Early Richmond—A splendid variety in dark red.

Montmorency—A good hardy red variety.

English Morello—A good hardy red variety.

Prices of Cherry Trees—Each, $3\frac{1}{2}$ feet and up, \$1.00; 3 for \$2.75; 6 for \$5.25.

Rocky Mountain Cherry

A distinct Hardy Shrub and its load of white blossoms in Spring is followed by quantities of black fruit that ripens into fruit valuable for preserving; one or more should be in every garden.

Each, 18-24 in., 35c; 3 for 90e. Each, 2-3 feet, 75e;

Compass Cherry

Compass Cherry—A cross between a Cherry and a Plum. It is very hardy and will thrive where many other trees will hardly grow. In the Spring it is covered with a dense mass of blossoms. It bears enormous quantities of fruit, ripening late in the season, which is fine for jelly-making. Each, 3-4 feet, 75e; 3 for \$1.85.

Chokecherry

This native Tree may be trained to a bush or tree form. It produces an abundance of fruit and it is becoming most popular for ornamental use on the landscape. Each, 3-4 feet, 50c; 3 for \$1.35. Larger sizes, 75e; \$1.00, \$1.50 and \$2.00.

WE CAN SUPPLY APPLES, CRAB APPLES AND PLUMS IN MANY LARGER SIZES From \$2.00 to \$5.00

We Will Fill Your Order to Full Value OUR FRUIT TREES ARE SHIPPED PREPAID

Another Block of Young Fruit Trees in Our Nursery

Plums

For fruit and ornament Plum Trees stand in the first rank. The Plums we offer are the best for the Northwest.

Bradshaw—A fine large dark red Plum with green flesh and very juicy and of the finest quality.

De Soto-Large oval, light yellow and red, sometimes mottled; juicy, good quality. An early and regular bearer, producing large crops.

Opata—A cross between Sandcherry and Gold Plum. Fruit dark red with blue bloom, flesh green, fine flavor.

Terry — Another American Plum originating in northern Iowa, and has proven very hardy. A large fruit, color red over yellow, round shape, thick skin, yellow flesh of splendid quality.

Underwood—Very hardy and very prolific. Fruit large, red, juicy, good quality. An early and regular bearer. Quality excellent.

Waneta—The most delicious of all Plums. Extra large size, two inches in diameter. Hardy anywhere in the Northern States.

Price of Plum Trees, $3\frac{1}{2}$ feet and up, each, \$1.00; 3 for \$2.75. Larger trees \$1.50 and \$2.00.

Pears

Kieffer—Probably the hardiest of all pears not especially good table fruit but excellent for canning.

Mendel—We have found that the Mendel Pear gives fine satisfaction and is suitable for many parts of the Rocky Mountain region. It is a good sized Pear of fair quality and resistant to blight.

Prices of Pears, 4 feet, \$1.00: 3 for \$2.75.

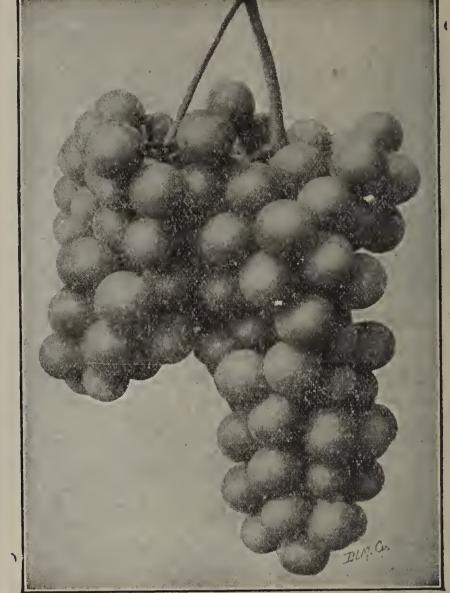

Gooseberries

Gooseberries grow and fruit exceptionally well in Montana, and should be more generally grown.

Oregon Champion — A splendid green variety, hardy, of good size and flavor. This variety is more generally grown on the Oregon fruit farms than any other for market purposes.

Industry—This is a fine hardy berry. The fruit is exceptionally large and of excellent flavor and quality. This has proven to be the most popular berry of recent years.

Price of Gooseberries, each, 35c; 3 for 90c.

Concord Grape

Grapes

The two varieties below are the most adaptable:

Beta—A hardy northern hybrid, deep purple in color, medium size, and considered one of the best varieties for jelly and similar uses. Vigorous grower, does well anywhere and is especially adapted to the Northern States. 2-year-old vines. Each, 35c; 3 for 90c; doz., \$3.25.

Concord—A most popular, very hardy, vigorous and productive variety. 2-year-old vines. Each, 30c; 3 for 75c; doz., \$3.00.

Currants

Currants are hardy, very prolific and their qualities for jelly making appeal to every housewife. Our stocks are good—in the best possible condition.

Perfection—This is perhaps the best variety of Red Currant that was ever introduced. It is a prolific yielder, with a rich sub-acid flavor. The fruit is very pulpy and contains but very few seeds.

Red Cherry—Very productive, color a bright red, in profuse clusters. Large fruit, fine for jelly making.

White Grape—The best white variety, of very bushy habit of growth, yielding large quantities of large white fruit.

PRICES OF CURRENT BUSHES

Blackberries

We recommend very highly our famous Hardy Blackberries. The bushes make a fine sturdy growth and bear large quantities of good sized fruit. The berries are sweet and mild and excellent for table purposes, jams, pies and jellies. Price, 6 for 45c; 12 for 85c; 25 for \$1.50.

Latham—A large dark red berry which has proven to be ideal for the Northwest. It is a hardy, vigorous grower, a heavy yielder, and a good keeper and shipper. It combines all the good qualities asked for in a Raspberry. Price, 6 for 45c; 12 for 75c; 25 for \$1.25.

Gregg—The best of the black Raspberries, and a splendid yielder. This is the variety of black Raspberry generally grown for market purposes. Price, per dozen, 85c; 25 for \$1.40.

FAMOUS SEVEN-MINUTE JAM Made to Perfection with the Thousand Dollar Raspberry

For 14 pints of Raspberries have enough boiling water to cover them.

Put berries in and let boil for two minutes then drain most of the water off and add one cup of sugar. Then cook for two minutes and add one cup of sugar, cook for three minutes more then remove from the fire and place in a wooden or earthenware crock. Let stand until the next day, stirring at intervals with a silver or wooden spoon. Can cold and seal. Place additional berries in the drained off juices and repeat or make jelly from them. Why not start some of our hardy Thousand Dollar Berries this year? They are the king of all jam makers.

St. Regis Raspberry—Known as the Everbearing Raspberry because of its long season. Berries large and a bright crimson; a prolific yielder and a fine, adaptable variety. Per dozen, 65c; 25 for \$1.15.

WINTER PROTECTION

After the first freeze and when the plants are free of leaves throw a covering of coarse straw around the canes or lightly earth-up with soil.

Latham Red Raspberries

Vegetable Plants and Garden Roots

One of Our 3-inch Pot Tomtato Plants

Asparagus Roots

Asparagus is very easily grown, and a bed when once established will more than repay any house-wife who loves to have this de-lightful vegetable for her table in the early Spring, and also for canning for Winter use.

Washington Rust Resistant—A new variety, above all others in size, vigor, quality and tenderness. Prices: Doz., 1-year-old, 40c; 100, \$2.50; 2-year-old, doz., 60c; 100, \$3.25; 50 at the 100 rate.

For the home garden plant Asparagus Roots 18 inches apart in rows 2¼ feet apart, 100 roots for a patch 20x20 feet.

Horse Radish

Strong, vigorous Roots of this popular spicy relish—Each, 15c; doz., \$1.25.

Tomato Plants

Our list of Tomato Plants is made up of adaptable varieties for Montana and the Northwest. They have been tested and tried in our seed testing grounds and the plants are from the most select seed. We are offering strong three-inch pot-grown plants which start bearing two to three weeks before the transplants and also the strong transplants, all carefully hardened off.

New Tomato Aristocrats

New Penn State—Received award of merit for 1936 Medium sized globular tomato of rich scarlet color, fine quality with small core and few seeds. Well adapted to both market and home use.

Asgrow Scarlet Dawn—1935 All America Winner. We are offering strong potted plants from 3-inch pots of this sensational Gold Medal Winner. Fruit is medium large, red, with thick wall structure. Very desirable for the home garden, shipping and canning. Vines of medium growth. Prices of above two varieties, from 3-inch pots, 6 for 75c; 12 for \$1.40.

Our Selected Standard Tomatoes

Market King—A variety that has met with much favor. A medium sized fruit, and a heavy cropper.

Yellow Queen-A fine yellow variety. A free fruiter of medium size.

Our Victoria Rhubarb

Break-O-Day-A fine new early Tomato producing large, meaty smooth globular red fruits. It is resistant to fusarium wilt of vines and to neilhead rust of fruits and also to several blights.

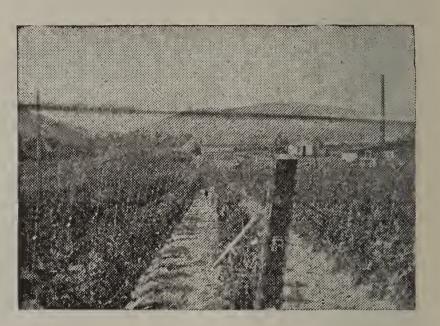

John Baer-One of the earliest varieties for Montana, of splendid color and flavor. A heavy yielder and good sized fruit.

Bonny Best-Another good early

Earliana-Fruit large.

Marglobe—A deep scarlet variety introduced by the U. S. Department of Agriculture. It is noted for its great productivity, deep globe shape and table qualities.

Prices of ståndard varieties: Strong plants from 3-inch pots, doz., \$1.00; 6 for 55e. Strong transplants, doz., 45e; 50 for \$1.50; 100 for \$2.50.

Tomato Trials in Our Nursery

Mint

Spear—For mint sauce and flavoring. Fine, hardy, high quality. Plants from 3-inch pots. Each, 25c; 3 for 65c.

Parsley

A valuable herb used for seasoning and garnishing. Each, 10c; 6 for 55c.

Chives or Snittlauch

Small, hardy perennial plants, resembling the onion in appearance and growing in clusters. They are grown for the young leaves, which give a mild onion flavor to sausages, salads, etc. Clump, 25c; 3 for 65c; 6 for \$1.10.

Pepper

(Ready about May 20th)

Large Bell or Bull Nose—The variety for Montana.

Large early variety. Flesh is thick, of a mild flavor and desirable for filling. Cayenne Long Red-The real red hot kind.

Harris' Earliest—The earliest Pepper in cultivation. Splendidly adapted to the Northwest.

Pimento — The mildest flavored of all Peppers, Grown extensively for pimentoes, pickles, etc.

Prices of any of the above four varieties: Per doz., 50c; 25 for 85c.

Rhubarb or Pieplant

33 to 100 feet of row—5,000 to acre—5-3 feet.
Requires a deeply cultivated and thoroughly manured soil. Our VICTORIA strain is not surpassed by any for its fine grain, its early propensity and delicious flavor.

Our Victoria Strain-Large red stems. Each, 2year-old, 30c; 6 for \$1.50. If wanted in quantities—write for prices.

Sage

A valuable herb used for seasoning. Strong plants from pots, each, 25e; 3 for 65c.

Tomato-John Baer

Cabbage Trials in Our Nursery

Cabbage

Our Cabbage Plants are grown in cold frames and are carefully hardened off. Should the season be normal we shall be ready to ship by May 1st; if it is late we shall ship accordingly. We offer only varieties which have proven the best in vigor, quality and weight.

Our Cabbage Plants can be successfully planted up to the middle of June.

NEW NOVELTIES IN FLOWER SEEDS

WE OFFER a wonderful list of beautiful new novelties. They will add new beauty, new colors to your garden. You will enjoy watching the development of some flowers you have never seen before. Select now the varieties you want and order promptly before the supply is exhausted.

Marigold-Yellow Supreme

Santa Barbara Poppy—Hunnemannia, Sunlight

Award of Merit, 1935. Clear canary yellow "Tulip Poppy," which is semi-double, is pretty and does well, Cut-flowers are lasting and produced over a long season. Easily grown and quick to bloom after a slow germination. Plant after soil becomes warm. Pkt., 15c. which is semi-double, is pretty and does well,

Calendula-Orange Shaggy

Marigold—Yellow Supreme "GOLD MEDAL 1935"

Visualize, if you can, a large, fluffy, well-rounded bloom of delicately mild honey fragrance, with broad, loose, frilled petals of a rich, creamy lemon-yellow color, and you have a fair conception of the new "Yellow Supreme" Marigold. You'll truly enjoy its dazzling beauty. Unsurpassed as a cut flower. Holds decided freshness fully a week to 10 days. In water it takes on an even more delightful color. Plants are vigorous and free branching with foliage which is practically free from that objectionable Marigold odor. For a real thrill grow it this year. You will have a delightful surprise.

Pkt., 15c; 1/16-oz., 30c; 1/8-oz., 50c; 1/4-oz., 85c.

New Petunia MARTHA WASHINGTON RUFFLED

Martha Washington is ruffled and frilled. It grows nine inches high and forms a perfect ball effect, literally smothered with lovely frilled blooms about three inches in diameter. Its neat, compact habit has never before been seen in Petunias. The color is remarkable, the flower is a beautiful bluish pink, the center is strongly veined a rich wine red, deepening in the throat veined a rich wine red, deepening in the throat, which is large, to dark violet. The veining is so unique that the blooms resemble a Pelargo nium, forming a striking contrast of colors. Pkt., 25c.

Nasturtium

Double Glorius Gleam Hybrids, Mixed—A sensational new double Nasturtium with a magnificent color range. To even the most critical observer they leave nothing to be desired. In habit of growth they closely resemble the famous Double Golden Gleam. Pkt., 15c; ½-oz., 50c; oz., 85c.

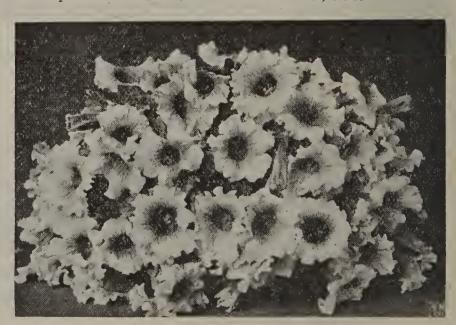

Scarlet Gleam—A bed of it is like a carpet of fire—so dazzling, so rich, so impressive. Scarlet Gleam is more or less plain petalled and deeper throated than Golden Gleam but its doubleness is caused by the overlapping of small petals toward the center which, if well grown give a perfectly double flower. grown, give a perfectly double flower. A real marvel for the garden and for cutting. **Pkt.**, **15c**; ½-oz., **50c**; oz., **85c**.

Calendula—Orange Shaggy "GOLD MEDAL 1935"

In Calendulas "Shaggy" is probably the most distinct. The closely set, irregularly placed, long narrow petals are beautifully fringed or laciniated, giving the flowers the frilled or shaggy appearanse of some Chrysanthemums. The large, flat, rich orange flowers shade slightly lighter towards the medium closed center, the two-tone coloring being quite effective. Flowers two-tone coloring being quite effective. Flowers are freely borne on long stems. Its informal shape adds greatly to its effect as decorative

cut blooms, and is unusual in form. 1½ feet tall.

We feel sure "Shaggy" will prove a welcome
addition to the Calendula class either as a garden plant or as a cut flower. Pkt., 15c.

Petunia-Martha Washington

NEW NOVELTIES IN FLOWER SEEDS

Rust Proof Antirrhinums—(Snapdragons)

Zinnia

Chrysanthemum Flowered or Fantasy
(See Color Plate)

Fantasy is the most fascinating new Zinnia type introduced to the flower world in many years. The very informal, shaggy appearing flowers are graceful and interesting, quite distinct from the stiff, formal Zinnias to which we are accustomed. The rounded medium sized flowers are composed of a mass of shaggy ray-like petals which give a delicate and refined appearance, large enough to satisfy the desire for mass of soler yet small enough. isfy the desire for mass of color, yet small enough to lend themselves gracefully to flower arrangement. The color range includes the brightest shades of reds, yellow and orange, as well as the popular pastel pinks and cream. Mixed, pkt., 20c; 3 pkt., 50c.

Zinnia—Fantasy

Antirrhinums (Snapdragon) Rust Proof

All America Selection 1935

(See Color Plate)

After years in an attempt to produce a strain of Rust Proof Antirrhinum, we are glad to announce that this has been achieved. The Deluxe Mixture we are proud to offer contains a higher percentage of the more desirable light colors than will be found in other mixtures now on the marketic. will be found in other mixtures now on the market. Prominent among these shades are the popular Canary Yellow, Rose Pink, Salmon Pink and White, with the usual run of Red and Orange shades. Then additional colors make a wonderful show. Deluxe Mixture, large pkt., 25c; 1/16-oz., \$2.

Cosmos Early Klondyke Orange Flare All America Selection 1935

Orange Flare is one of the most admired novelties on the market today. Orange Flare is a new variety; the fact that it may be had in full bloom in so short a time is unprecedented in the flower world. The color is vivid orange, but the attractive light green foliage is much less abundant, giving a plant which is a mass of color. The stems are long and wiry, well adapted for cutting. Large nkt.. 20c.

Giant California Sunshine Asters

The Most Beautiful Aster in the World
Plants of this new race grow 3 feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous, 4 to 5 and 6 inches in diameter. The grace and beauty with cushiony centers of tubular bifurcate petals and the rim of exquisitely poised out-guard petals surrounding the central disk, make for a lace-like perfection and daintiness of form and contour that must appeal to the most aesthetic taste. We offer this magnificent strain of Asters in Mixed Colors—Pkt., 15c; 4-oz., 50c; 4-oz., 90c.

Petunia—Pink Gem

SECOND GOLD MEDAL—1935

The first of a charming new race of miniature Petunias. It forms a neat, very compact plant only six inches high, quite covered with two-inch flowers in shades of pink. Indispensable for bedding, edging, window boxes, pots and rock gardens. Pkt., 20c.

Larkspur—Blue Bell

The first of a wonderful new race of the giant type, a clear light blue. It is decidedly upright with long branching flowering spikes. Pkt., 20c; 1/4-oz., 50c.

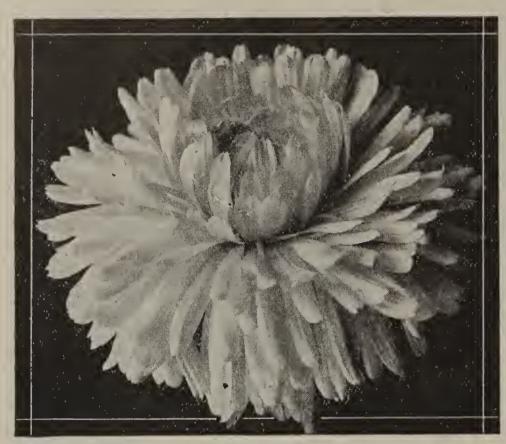

Marigold—Dwarf Monarch Mixed

Award of Merit. Dwarf French double type, one foot high, with mixed combinations of orange, yellow and mahogany flowers. The stock is uniformly dwarf, making an excellent low border or edging plant where these colors may be used. Pkt., 15c; 1/8-oz., 45c; 1/4-oz., 80c.

Aster—California Sunshine

S. N. & S. Co's NEW FLOWER SEEDS

Calendula—Chrysantha or Sunshine

WE OFFER a wonderful list of beautiful new novelties. They will add new beauty, new colors to your garden. You will enjoy watching the development of some flowers you have never seen before. Select now the varieties you want and order promptly.

Calendula—Chrysantha or Sunshine FIRST GOLD MEDAL-1935

This valuable addition is distinctly different in flower form. It has wide petals, loosely arranged, incurved at center and reflexed at edges, somewhat like a Chrysanthemum. Flowers four inches across are clear buttercup yellow on long stems for cutting, about thirty inches tall. Pkt., 10c; 1/4-oz., 35c; 1/2oz., 60c.

Linaria—Fairy Bouquet

Light and airy plants growing eight inches tall with flowers that appear like miniature Snapdragons in a great variety of colors. such as rose, yellow, pink, lavender, carmine, red, violet, white and salmon. A splendid filler for bouquets, useful for bedding, pots and boxes. Very quick to bloom after planting. Pkt., 15c; 1/8-oz., 75c; 1/4-oz., \$1.25.

Imbricated Pompon Asters

Canterbury Bell—Liberty Bell

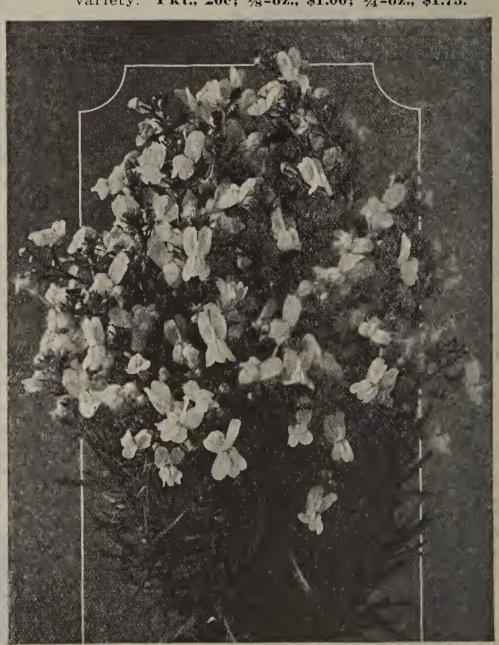

Award of Merit. Dark violet-blue annual Canterbury Bell, blooming in six months from seed. A decided improvement over the popular biennial form, though blooms may not be quite as large. About two feet tall, with about six spikes of flowers. Brings Spring into the Fall garden. Pkt., 20c; 1/2-oz., 75c.

Aster—Los Angeles

Award of Merit. A new Super Giant type, three feet tall with exceptionally large flowers. The color is a serenly pure shell pink. The flowers are full petaled, deep and artistic, with feathery interlacing petals. Pkt., 20; 1/8-0z., \$1.00; ¼-oz., \$1.75.

Aster—Silvery Rose

This is a fine long stemmed variety of true peony flowered type, with immense flowers of deep lavender pink, which darken as they age, leaving the silvery white, a very striking new variety. Pkt., 20c; 1/8-oz., \$1.00; 1/4-oz., \$1.75.

Linaria-Fairy Bouquet

Imbricated Pompon Asters

A charming, rather early-blooming type of Aster. The plants, which are of upright growth, average 15 in. in height and lend themselves admirably to bedding and cutting. The small round, pompon flowers are produced freely over a long period.

Crimson Light Blue White Any of the above separate colors, Pkt., 15c.

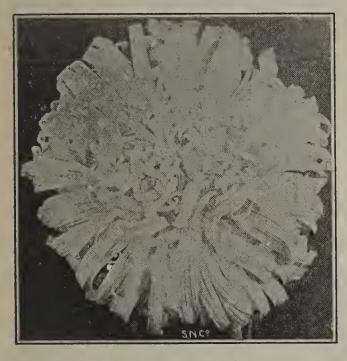

Imbricated Pompon Asters, Mixed Colors

A charming mixture of the above and some other colors. Pkt., 15c; 1/8-oz., 60c; 1/4-oz., \$1.00; 1/2-oz., \$1.75.

> Special Collection Offer 4 Imbricated Pompon Asters

Contains one Pkt. each of the 4 separate colors offered in this class (value 60c) for....50c

S. N. & S. Co's. FAMOUS ASTERS

S. N. & S. Co's. Montana Tested Flower Seeds

We wish to again remind you that all our flower and vegetable seeds are tested and tried in our large seed testing grounds; a distinct protection and assurance of only the best and highest quality in seeds and a service which only the very largest of American seed houses offer. We invite you, our friends and customers, to visit our extensive seed testing grounds and see the thousands of varieties of flowers and vegetables being grown and tested to qualify for the high ideals which they must meet before they are ready for you as our PEERLESS Seeds.

Abronia Umbellata or Sand Verbena

Very pretty trailing plants with numerous clusers of sweet-scented flowers. Is excellent for growing in baskets, rockeries or the open border. Rosy pink. Does well in light soil. Hardy annual. As the hull on this seed is exceptionally hard it should be broken when planted. Pkt., 5c; ¼-oz., 30c; ½-oz., 50c.

Acrolinium or Everlasting Flower

A very pretty half-hardy annual, producing white and rose-colored double Daisy-like flowers. These are known as "Immortelles" and are desirable for wreaths and Winter bouquets. Double mixed. Pkt., 10c; 1/4-oz., 25c; 1/2-oz., 40c.

Arctosis Grandis

Blue-Eyed African Daisy—The Daisy-like flowers measure 2½ inches across. They are silvery white with a sky-blue eye surrounded by a narrow yellow zone. The under part of the petal is lilac-blue. Borne on long stems. One of our most attractive annuals. Pkt., 10c; ¼-oz., 30c; ½-oz., 50c; oz., 90c.

African Gold Daisy

African Gold Daisy (Dimorphotheca Aurantiaea)

The single Daisy-like flowers are 2½ inches in diameter, and of a unique glossy terra cotta orange, which brilliant coloring is rendered the more conspicuous by the dark disc surrounded by a black zone. The plants grow from 8 to 12 inches high and are very profuse flowering, especially in dry situations. Hardy annual. Pkt., 10c; ¼-oz., 40c; ½-oz., 70c.

Asperula

Azurea—Blue—Grown for its fragrant leaves and stems, when dried have a sweet odor, and are used for putting among clothes, etc. Pkt., 5c; 1/4-oz., 25c.

Tinctoria — (Sweet Woodruff) — And old-fashioned hardy perennial plant, greatly loved for its fragrance when dried, resembling the sweet odor of new-mown hay. Bears small white flowers. Eighteen inches. Pkt., 10c; 1/4-oz., 30c.

Amaranthus Tricolor or Joseph's Coat

These plants afford brilliant contrast of colors, being useful for borders and groups; also, where foliage effects are desired. The leaves and stems are of different shades of red, blended with green. Half-hardy annual. Mixed. Pkt., 5c; ¼-oz., 30c.

Alyssum

A fragrant, free flowering hardy annual, bearing small flowers in great profusion. Useful for border or early bedding flowers. Succeeds anywhere

Sweet Alyssum—Pure white flowers. Pkt., 5c; ½-oz., 20c; oz., 35c.

Lilae Queen—Hardy annual. Deep lavender lilac. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 75c.

Sweet Alyssum

Little Gem—Three to four inches high, pure white. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 70c.

Alyssum Saxatile Compacta—or (Basket of Gold)—A hardy dwarf perennial, very useful for rock work, literally covering itself with yellow flowers. Blooms first season if sown early indoors. Pkt., 10c; 1/4-oz., 40c; 1/2-oz., 70c.

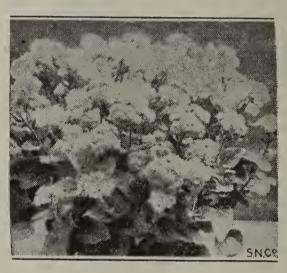

Anchusa Italica—Dropmore Variety

These hardy plants are very vigorous, the rough-leaved stems growing to a height of four feet. The flowers are a beautiful, clear, bright blue, and blooms all Summer. Perennial. Pkt., 10c; 1/8-0z., 30c.

Anchusa Capensis

A new, showy compact type with indigo blue blossoms. Blooms all Summer. Annual. Pkt., 10c; ½-oz., 20c; ½-oz., 50c.

Ageratum or Floss Flower

Blue Perfection

Ageratum—Blue Perfection — A hardy annual of easy culture, especially valuable for bedding, as it is literally covered with blue blossoms all Summer. They make fine house plants in pots during Winter time. Pkt., 5c; 1/8-0z., 25c; 1/4-0z., 40c; 1/2-0z., 70c.

Antirrhinum or Snapdragon

S. N. & S. Co's. Tall Giant Flowering Varieties

Of dwarf spreading habit. It is well adapted for border or pot culture. The flowers are exquisitely colored. Sow in Spring and thin to foot apart. Mixed. Pkt., 5c; 1/8-oz., 20c; 1/4-oz., 39c.

Oenothera Evening Primrose

Oenothera **Evening Primrose**

This widely known freeflowering annual produces brightly colored single flowers which open on approach of twilight. A combination of red stems with red buds and yellow flowers make it a beautiful and striking plant. Hardy annual. Pkt., 10e; 1/4-oz., 25e; ½-oz., 40e.

S. N. & S. Co's. Giant Flowering Pansies

Pansies thrive best on a cool, moist, well drained soil enriched with rotted fertilizer or bone meal. Seeds sown early will produce fine plants for Autumn blooming. Best to sow in July or August and protect the plants during the Winter when they will flower continuously the next Spring and Summer. Our Pansies are renowned as the most beautiful in the world for size and color. In germinating allow plenty of ventilation. Keep beds quite moist but not soaking wet. Never allow beds to become dry.

Pansy, Swiss Giant

If you really want extraordinary Pansies sow the new Swiss Giants. They are without exception the most gorgeous Pansies we have ever seen. Immense in size and of thick velvety texture, and the range of colors includes many of the deep red and brown shades. The Swiss Giants have now proved the standard of the standard formula shades. brown shades. The Swiss Giants have now gained the reputation of the world's most brilliant and magnificent of all Pansies. Mixed. Pkt., 25c; 1/16oz., \$1.00; ½-oz., \$1.75; ¼-oz., \$3.25; ½-oz., \$6.25.

PANSY COLLECTION Contains the following varieties: Golden Queen, Adonis, Madam Perret, Lord Beaconsfield, Prince Henry, Prince Bismarck. One packet each of these six fine Giant-flowering Pansies (value 60c) mailed

	,, /-

Hogeland, Montana.
August 16, 1935.

Dear Sirs:

The plants I bought from you this Spring were the nicest plants I ever got from any Nursery.

Yours truly, MRS. R. B.

Salpiglossis, Painted Tongue or Velvet Flower

One of the greatest favorite annuals, of easy culture; has exceedingly showy flowers of large size. Blooms freely; 2½ feet tall.

Light Blue and Gold Scarlet and Gold Velvety Red Velvety Violet

Any of the above, pkt., 10c; ½-oz., 35c; ½-oz., 60c

Finest Mixed — Pkt., 5c; ½-oz., 25c! ½-oz., 45c.

Salpiglossis

Saponaria

Ocymoides — An unusually pretty border or rock garden plant, producing masses of small bright rose flowers and blooming all during Spring and Summer; 6 inches tall. Hardy perennial. Pkt., 10c; ½-oz., 25c; ½-oz., 35c; ½-oz., 60c.

Stocks or Gilliflower

The stock is one of our very best annuals for bedding purposes or for pot culture. Their wonderful colors and unequalled fragrance make them extremely valuable. Halfhardy annual; 12 to 18 inches. Sow outdoors about May 1st.

Large Flowering 10-Weeks Stocks

Blood Red....Pkt., 10c
Canary Yel.
lowPkt., 10c
WhitePkt., 10c
BluePkt., 10c
PurplePkt., 10c
PinkPkt., 10c

Any above named, 1/8-0z., 50c; 1/4-0z., 90c.

Mixed — All colors, Pkt., 10c; ½-oz., 50c; ¼-oz., 80c.

Stocks

STOCK—Evening Scented—(See Mathiola Bicornis)

Virginia Stocks or Malcomia Maritima

An early flowering small flowered annual, largely grown for edging border. Height about 6 inches, and blooms continuously during cool weather. .. Finest mixed. Pkt., 5c; ¼-oz., 25c; ½-oz., 40c.

Venidium Fastuosum

A striking new variety from South Africa. The brilliant orange-like flowers are 3 inches across, with dark center and a reddish brown zone. Two feet tall and blooms over a long period. A hardy annual. Pkt., 15c; 1/16-oz., 50c; ½-oz., 85c.

Sunflower

Mammoth Russian — Extra large heads. Pkt., 5c; oz., 10c.

Double Chrysauthemum Flowered—Hardy annual, growing from 3 to 5 feet. Large densely double golden flowers. Fine long stout stems for cutting. Pkt., 5c; ½-oz., 25c; oz., 40c.

Sanguineus — Shades of red, purple, and reddish brown combinations; 5 to 6 feet tall. Very showy. Pkt., 10c; ½-oz., 30c; oz., 50c.

Scabiosa

Schizanthus

Schizanthus, Butterfly or Fringe Flower

Called the "poor man's orchid" on account of their easy culture and resemblance to the orchid. Hardy annual. One to two feet. Mixed. Pkt., 5e; 1/16-oz., 25e; ½-oz., 40c.

Strawflowers or Helichrysum

These flowers, with their rich, bright colorings, are most valuable for Winter bouquets. The blooms should be cut as soon as they open, tied in small bunches, and dried slowly in a cool, shady place. Hang the flowers downward.

Fire Ball—Fire Ball is a popular variety with rich bright blooms. They are an intense and vivid crimson. The flowers are large.

Canary Yellow—Ball shape and of a rich, golden yellow color. They are borne profusely on strong robust plants.

White Queen—Is a favorite on account of its pure white flowers. White Queen is easily dyed to any desired color. The blooms are of largest size and quite double.

Rose Queen—The color is a bright and cheerful rose, a shade that is always greatly admired. Blooms are double and of remarkarble size.

Violet Queen—The color is rich violet and intense. Violet Queen has become one of the most favored of all Strawflowers. The dried blooms are particularly rich and life-like.

Any of the above, pkt., 10c; ½-oz., 20c; ¼-oz., 35c; ½-oz., 60c.

Mixed — Those who have not room enough to grow separate colors will get a fine display from this mixture. Pkt., 5e; ½-oz., 20c; ¼-oz., 30e; ½-oz., 50e; oz., 75c.

Strawflower

COLLECTION OF STRAWFLOWERS

We will mail one packet of the five fine Strawflowers (value 50c), postpaid for 45c

We will mail 1/8-oz. each of these five fine Strawflowers (value \$1.00), postpaid for 75c

Statice Latifolia or Sea Lavender

These plants bear puplish blue everlasting flowers that last a long time after cutting and are of very easy culture. Hardy perennial. Two feet. Pkt., 10e; 1/8-0z., 40e; 1/4-0z., 70c.

Sweet Wivelsfield

This new race of hardy plants is a cross between Dianthus Allwoodii and Sweet William, with large flowers and a wonderful range of colors. Few plants can compare with Sweet Wivelsfield for wealth of color and length of flowering period. An outstanding novelty of the easiest culture. Pkt., 10c; ½-oz., 30c; ¼-oz., 50c. See page 31 for plants. SHASTA DAISY—(See Chrysanthemum, Page 56)

SNAPDRAGON—(See Antirrhinum, Page 54)
GARDEN COLLECTION OF HARDY PERENNIAL
FLOWER SEEDS—(See Color Page)
SIBERIAN WALLFLOWER—(See Page 70)
SNOW ON THE MOUNTAIN—(See Euphorbia,
Page 58)

Statice

Sweet William or Dianthus Barbatus

A beautiful sweet-scented old-fashioned annual and perennial. Grows one to two feet high and bears flowers in clusters; a wonderful bedding plant and of easy culture.

Single—Mixed—The flowers embrace a great variety of extremely rich and beautiful colors. Perennial. Pkt., 5c; ½-oz., 25c; ¼-oz., 40c.

Double Mixed—An excellent double flowered strain perennial. Pkt., 10c; 1/8-oz., 25c; 1/4-oz., 40c.

Annual Flowering — Mixed — A new strain that blooms the first season. Flowers large, borne in great profusion and in beautifully assorted colors. Pkt., 10c; 1/8-oz., 25c; 1/4-oz., 40c.

Thunbergia or Blackeyed Susan

A beautiful climber, 3 to 5 feet high, with pale yellow or orange-yellow flowers having a black center. Of quick growth, blooming profusely. Tender annual. **Pkt.**, **5c**; ¼-oz., **30c**; ½-oz., **50c**.

Veronica or Speedwell

A beautiful species, with rich deep blue flowers. Pkt., 10e; 1/8-oz., 40c.

Viola Cornuta (Tufted Pansies)

While the flowers of the Violas are not so large as the Pansies, yet they bloom very freely and for a longer time. The colors are clear and distinct and very effective in the rock garden.

Viola—Cornuta—Mixed — Pkt., 10c; ½-oz., 35c; ¼-oz., 60c.

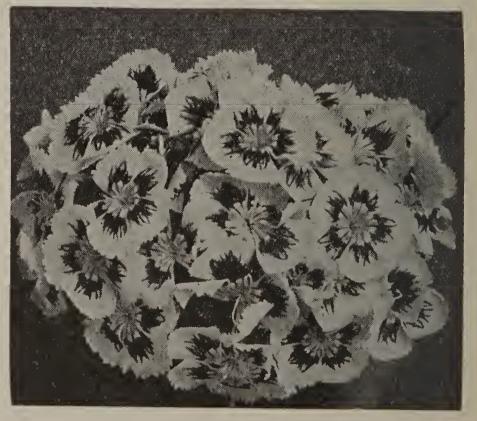

Viola Odorata (Sweet Scented Violets)

Every garden should include sweet-scented Violets; dark blue. Pkt., 10e; 1/16-oz., 55c; 1/8-oz., \$1.00.

Vinca or Periwinkle

Dark green, glossy foliage and bright single blossoms of striking beauty; grows 12 inches tall! excellent for beds, borders and window boxes. Seeds are sometimes slow to germinate.

Mixed Colors-Pkt., 10e; ¼-oz., 35e; ½-oz., 60e.

Sweet William

Sweet Rocket

Sweet Rocket or Hesperis

A hardy perennial growing two feet high. A beautiful fragrant flower of the easiest culture and bearing clusters of white and purple blossoms. Flowers from June to September. Mixed. Pkt., 5c; ¼-oz., 20c; ½-oz., 35c; oz., 60c.

Wild Flower Garden Mixture

These annual flowers can be grown easily. Simply raked in a corner of the garden will make a pretty display of flowers and will resemble a wild flower garden. We have made a mixture of seeds of the hardiest annual flowers that will bloom from early Summer until late in the Fall. These are not wild flowers. Pkt., 5c; oz., 25c; ¼-lb., 70c; ½-lb., \$1.30; 1 lb., \$2.40.

Plan to Visit Our Seed Testing Grounds This Summer

Mammoth Verbena

GLADIOLUS BULBS—(See Page 72)

Wallflower or Gold Lack

These half-hardy perennial and annual sorts should be sown in Autumn and carried over in cold frame; annual sorts may be sown indoors in March and will flower the first year from seed. Very pretty and fragrant.

Annual Single Mixed-Pkt., 5c; 1/8-oz., 20c; 1/4-oz.,

Early Paris Market—A beautiful single golden yellow variety which may be treated as an annual, flowering through the Summer from seed sown in the Spring. Pkt., 10c; \(\frac{1}{3}\)-oz., 25c; \(\frac{1}{4}\)-oz., 40c.

Blood Red—This is a much improved and selected stock of the Annual Wallflower brought out some years ago. We have ever since been carefully selecting this, and each year getting nearer to a blood red. Pkt., 10c; 1/8-oz., 25c; 1/4-oz., 40c.

Wallflower, Siberian

Cheiranthus Alloni—This beautiful early-flowering perennial Wallflower has gorgeous orange flowers, and is a splendid little plant for the rock garden or border. Will bloom through the Summer if seed-pods are removed. May be sown in the open ground in September where required to flower the following Spring, or will bloom first season from seed, if sown in a hot-bed in March and transplanted outdoors in May. Pkt., 10c; ¼-oz., 35c; ½-oz., 60c.

MARIGOLD—NEW GUINEA GOLD—(See Page 61) PANSY—NEW SWISS GIANTS (See Pages 19 and 63)

Verbenas, Mammoth

A very showy class of large flowering Verbenas including a number of splendid rich colors which are truly outstanding. Magnificent planted in beds or border. The large individual blooms combine into immense showy flower heads that stand out sharply from the rich green foliage. They bloom continuously from midsummer until fall.

VERBENAS — MAMMOTH — Pink, White, Blue shades. Defiance, brightest scarlet; Firefly, bright red with small white eye; Lutea-Yellow, a unique color among Verbenas. Very fine.

Any of the above—Pkt., 10c; 1/8-oz., 40c; 1/4-oz.,

Fine Mixed—All colors. Pkt., 5c; 1/8-oz., 30c; 1/4-oz.,

Pecrlcss Mixed—Embracing a wide range of beautiful colors, the blooms being of mammoth size. Pkt., 10c; 1/8-oz., 40c; 1/4-oz., 70c.

WOOLFLOWER—(See Celosia Childsii, Page 53)

Caragana, or Siberian Pea Tree

A very hardy shrub bearing clusters of golden yellow fragrant flowers early in the Spring. Foliage dark green, while the bark is light green or silvery in color, making it very ornamental for hedges. Oz., 30c; 1/4-lb., 85c; 1 lb., \$3.00.

Wild Cucumber

Ornamental climbing cucumber with curious fruit; remarkable for its luxuriance and rapidity of growth. Sow in the Fall. Pkt., 5c; 1/2-oz., 20c; oz., 30c; 1/4-lb., 95c.

YOU WILL WANT SOME OF OUR NEW FLOWER NOVELTIES IN YOUR GARDEN

S. N. & S. CO'S. FAMOUS ZINNIAS

A half-hardy annual growing from 1 to 2 feet high. The colors are in great variety and very bright. Probably no flower has such an assortment of shades, tints and colors, and no bedding plant is more effective for a brilliant show. Sow in boxes early and transplant or sow directly in the garden after May first.

Zinnia—Dahlia-Flowered

New Dahlia-Flowered Zinnias are distinct. The flowers are of immense size and are made up of many small sized petals. The individual petals stand well apart, giving an attractive grace and looseness to the flowers. They are strong growers, blooming profusely all during Summer and Fall.

ZINNIA New Dahlia-Flowered OUR TEMPLE MIXTURE

We wish to call special attention to this mixture which is composed of precisely the same variety of seeds as sown by us on the grounds at the Shrine Temple, Helena, and which create such a sensation each year. This mixture contains all the newest shades in Zinnias and will give very satisfactory results. Large packet, 40c; 1/4-oz., 65c; 1/2-oz., \$1.15; 1 oz., \$2.00.

Crimson Monarch—A bright and attractive shade of crimson-scarlet. The blooms are immense and borne in great profusion.

— # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # — # # —

Exquisite—A pleasing shade of reddish rose with deeper rose in the center. One of the most attractive.

Golden State-Rich golden yellow, shading to orange as the flower ages. Brooms are large.

Scarlet Flame—Rich orange-scarlet. A dazzling color; is one of the brightest. Blooms profusely.

Dream-The large flowers are a distinct shade of deep lavender, shading to purple as they age. A free bloomer of strong and sturdy growth.

Polar Bear—The flowers are of great size and pure The flowers are borne on fine strong white.

Oriole—A bright, glistening orange, shaded with liquid gold. As the flowers age they show a coppery cast, but the effect is beautiful.

Luminosa—Bright deep pink with a lige suffusion of salmon; an entirely new shade.

Any of these Dahlia-Flowered Zinnias-Pkt., 15c; $\frac{1}{8}$ -oz., 35c; $\frac{1}{4}$ -oz., 60c; $\frac{1}{2}$ -oz., \$1.00; oz., \$1.75.

COLLECTION OF DAHLIA-FLOWERED ZINNIAS

This collection contains one packet of Crimson Monarch, Golden State, Dream, Exquisite, Oriole, Polar Bear.

Dahlia-Flowered Mixture—This is a complete mixof Danna-Flowered Zinnias, including the above seperate colors and many other beautiful and rich shades. Pkt., 15c; 1/4-oz., 60c; 1/2-oz., \$1.00; oz., \$1.75.

Cut-and-Come-Again Dwarf Double Zinnias

This we consider the best Zinnia for bedding. They form bushy, compact plants not over 2 feet high and bear large perfectly double flowers in good clear distinct colors.

Canary, Flesh Pink, Orange, Scarlet, Salmon-Rose, White—Any color: pkt. 10c; 1/4-oz., 30c; 1/2-oz., 50c.

Collection—One packet each of the above 6 sorts. 40c.

Finest Mixed—This will give a colorful bed or border. Pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 70c.

Scabiosa—Flowered

A distinct break in that the plants bear medium size flowers which have a great resemblance to the annual Scabiosa. They have broad outer petals and small center petals clustered together into a distinct cushion. There are many different and lovely colors represented. 24 to 30 inches high. Mixed colors. .. Pkt., 15c; 1/8-0z., 30c; 1/4-0z., 50c.

Zinnia-New Dahlia-Flowered

California Giant Double Zinnias

Our special strain of this grand favorite produces flowers of colossal size. Should be spaced 12 inches apart to allow development. They bear numerous semi-globular, mostly double flowers of the largest size, making them of great value in large beds, borders, etc. They remain in bloom large beds, borders, etc. They refrom early summer to late autumn.

Grenadier—Deep crimson-scarlet blooms.
Lemon Queen—Primrose or canary yellow.
Miss Willmott—Charming bright rose-pink. Orange King—Rich golden orange. Purity—Magnificent large white flowers. Rose Quecn—A lovely shade of deep rose.

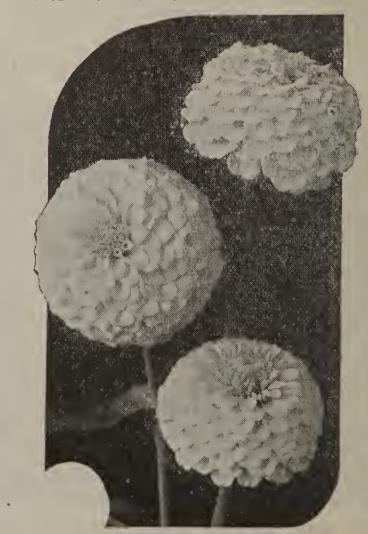

Salmon—Large rich salmony rose flowers.

Collection—One packet each of the above seven

California Giant Mixed—Includes the above seven varieties and some others to add still further to the color effect. Any of the above: Pkt., 15c; $\frac{1}{8}$ -oz., 35c; $\frac{1}{4}$ -oz., 60c; $\frac{1}{2}$ -oz., \$1.00.

ZINNIA—LILLIPUT

Also Called Baby or Pompon A beautiful dwarf branching type, 12 to 18 inches tall, blooming continuously and most profusely; the double conical flowers are 1 to 11/2 inches across. Highly effective for borders, especially desirable for table decorations. Mixed colors. Pkt., 10c; 4oz., 30c; ½-oz., 50c; oz., 85c.

Zinnia—Lilliput

S. N. & S. CO'S. GIANT SPENCER SWEET PEAS

Our Giant Spencer Sweet Peas have been selected and reselected for type, large flowers and long stems and are the best to be had anywhere. They are quickly and easily grown from seed and adaptable to the gardens of the Northwest. We have selected the newest choicest and most up-to-date Sweet Pca varieties known in each color class.

Thousands inoculate their Sweet Pea seed with Nitragin. Spray thoroughly and often to prevent infection by aphis. We recommend spraying with Biack Lef "40" or Evergreen for this purpose. Leaf-

let on Sweet Pen Culture Frce.

Spencer Sweet Pea

SWEET PEA NOVELTIES

Begonia Rose

Is a rich begonia rose, ruffled and duplexed. The mammoth standard and wide spreading wings have the same rich color and it has an amber base, the shade enriches its attractiveness as a cut flower. The stems are long and carry four and five well placed duplex flowers. The plants are strong and vigorous and the flowers are really beautiful. Pkt., 25c; 5 pkts., \$1.00.

Lady Macbeth

Lady MacBeth is a new and distinct color. It is a dazzling spinel red with golden salman shadings which makes this variety outstanding. The flower is massive with beautifully waved standard, nicely spread wings and a bold keel, with not the slightest trace of sunburn.

Lady MacBeth is a strong, vigorous grower, producing long stems with four and five mammoth flowers. Pkt., 25c; 5 pkts., \$1.00.

SIX VARIETIES OF REAL MERIT

Smiles

A really new and exquisite sade. .. A clear glistening salmon, shaded shrimp pink; a most pleasing color and absolutely sumproof. The blossoms are so clear in color that people have been amazed. The stems are long with four grand flowers beautifully waved and fluted. Pkt., 15c; ½-oz., 25c; oz., 40c.

Red Boy

We offer Red Boy as the best crimson Sweet Pea. The shade is pure, rich, distinct and standard and wings are alike in color. The stems are long, carrying four magnificent flowers. We strongly recommend Red Boy; richer and brighter than any other crimson. Pkt., 15c; 1/2-oz., 25c; oz., 40c.

Welcome

The most brilliant and dazzling scarlet Sweet Pea year introduced. It is absolutely sunproof, and the wings are exactly the same shade as the standard; the deepest and brightest scarlet Sweet Pea ver introduced. Pkt., 15c; ½-oz., 25c; oz., 40c; 1/4-lb., \$1.00.

Debutante

A magnificent new shade. It is a lovely soft salmon shaded coral or peach pink. It is quite a distinct shade, a color all its own. Flowers are large and bold. Pkt., 15c; ½-oz., 25c; oz., 40c.

Ripples

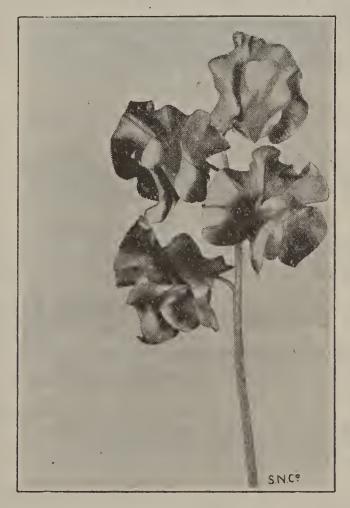

A charming rose pink. The flushed rose on deep cream ground appears intensified in the center and edges of the wings. The standard has a margin of lighter pink which brightens the flower. The flowers are large, well waved, with a tendency to duplex. Pkt., 10c; ½-oz., 25c; oz., 40c.

Winnie Morse

Is the largest and one of the most beautiful Sweet Peas. The flowers are mostly duplexed and delightfully frilled, giving the blossoms a fine light, wavy effect in spite of their large size. The color is cream ground, lightly flushed, soft rose pink. Pkt., 10c; ½-oz., 25c; oz., 40c.

One packet each of the above six varieties (value 80c) will be mailed to any address postpaid for 65c. 1/2-oz. each (value \$1.50) postpaid for \$1.25.

1 oz., each (value \$2.00) postpaid for \$1.65.

Our Giant Spencer Sweet Peas for Northwest Gardens

THOWER BELLES (Continues)

S. N. & S. CO'S. GIANT SPENCER SWEET PEAS Are the Largest and Most Beautiful Shades

CRIMSON

Crimson King—Undoubtedly the most glorious crimson Sweet Pea yet introduced. Flowers of large size and of rich deep crimson color; free from sunburn. Pkt., 10c; ½-oz., 20c; oz., 30c; ½-lb., 90c.

CERISE—DEEP

Hero—Is a beautiful shade, because in sunshine or artificial light it appears to be suffused with salmon. "Hero" is an entirely new shade. The flowers are large, nicely waved, on strong stems. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

What Joy—A charming rich deep primrose-yellow shade. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Mary Pickford—A cream pink with a faint suffusion of salmon. Flowers exceptionally large and beautifully waved. Pkt., 10c; ½-oz., 20c; oz., 35c;

PICOTEE EDGED PINK
Youth—Clear, waxy white with pink edging; large blooms. Beautiful and delightfully fragrant.
Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Supreme—This is the best clear pink known. A soft and delicate color. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

PINK—DEEP

Pinkic—Is larger than any other variety in the deep pink class. The pink flowers are free from the blueness of other deep pinks and are glorious; flowers nicely waved. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Royal Purple—The best rich royal purple. The color deepens as the flower ages, a desirable quality in a purple variety. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Rosabelle—A very rich bright rose. Flowers beautifully waved or fluted and of extra large size. Pkt., 10c; ½-oz., 20c; oz., 35c; ½-lb., 90c.

Barbara—A superb salmon-colored sort that makes a telling bunch for exhibition or table decoration. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Hawlmark Scarlet—A really wonderful bright scarlet. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Avalanche—Glistening white of great substance. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Tangerine — Brilliant tangerine - orange flowers. Very popular. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

MAROON—DARK
The Sultan—The best rich black velvety maroon.
Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Chieftain—The most beautiful shade of pure sating mauve. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

Austin Frederick—Flowers of largest size. Color a true lavender, the best yet introduced. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

BLUE

Heavenly Blue—A most beautiful shade of delphinium blue. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 90c.

BLUE-LIGHT

Gleneagles—Flowers beautifully waved with frilled edges. Color lavender blue, slightly deeper at center. Pkt., 10c; ½-oz., 20c; oz., 30c; ¼-lb., 90c.

Giant Spencer Sweet Pea

Spencer Sweet Peas-Mixed

Composed of Giant Spencer varieties, blended in proper proportion and including several new exquisite colors and shades. The varieties in this mixture will produce from three to four flowers on a stem. Pkt., 10c; ½-oz., 20c; oz., 30c; ¼-lb., 75c; ½-lb., \$1.25; lb., \$2.25.

Special Offer of Spencer Sweet Peas
We will send you one 10c package each of 20 varieties listed for \$1.65

Your choice of any 15 varieties (not including 15c or 25c packages) 10c packages only, for \$1.25.

Our choice of any 15 varieties (10c packages) for \$1.00

Grandiflora Sweet Peas

The over shadowing size and beauty of the Spencer Sweet Peas have gradually reduced the demand for the Grandiflora types, so that we now offer only the mixed varieties.

Peerless Mixed—The best Grandiflora Mixture; colors well proportioned. Oz., 10c; 1/4-lb., 30c; lb., \$1.00.

Lathyrus, Everlasting or Perennial Sweet Peas

A hardy perennial climber. Sow the seed in rich ground one inch deep. The plants start slowly but make a strong growth and bear large compact clusters of flowers resembling those of the Sweet Pea but without fragrance, and give profusion of bloom all Summer.

Red, pkt., 10e; ¼-oz., 35e; ½-oz., 60e; oz., \$1.00. White, pkt., 10e; ¼-oz., 50e; ½-oz., 85e.

Pink. pkt., 15c; ¼-oz., 35c; ½-oz., 60c. Mixed, pkt., 10c; ¼-oz., 25c; ½-oz., 40c; oz., 70c.

S. N. & S. CO'S. SWEET PEAS

Early Giant Flowering Spencer Varieties

Early Flowering Sweet Peas are particularly adapted to sections where the Summer flowering varieties have not proved satisfactory. They are now very popular and in great demand for early Spring blooming, for outdoor culture, coming into flower three weeks earlier than the regular Giant Spencer flowering varieties, and if the flowers are keep picked will continue to bloom over a long period. The flowers are large and are beautifully waved or frilled. We offer the following carefully selected varieties.

Thousands inoculate their Sweet Pea Seed with Nitragin. Spray thoroughly and often to prevent infection by aphis. . We recommend spraying with Black Leaf "40" or Evergreen.

NOVELTIES

Shirley Temple

The color is softer and more beautiful than Pinkie. The flowers are the largest we have ever seen on any Sweet Peas and it has long stems with four very large blooms on each stem. This new Sweet Pea is so charming and dainty that it deserved the most appropriate name. With the kind permission of Mr. and Mrs. Temple, it is named in honor of their daughter, the charming and lovely little cinema favorite Shirley. Pkt., 25c; 5 pkts., \$1.00.

Annie Laurie

Annie Laurie constitutes the richest tone of pure rose pink ever produced in a Sweet Pea. It is several shades richer than any other rose and is a marvelous improvement; a vigorous grower, with four large flowers on long stems; an abundant, prolific and continuous bloomer. Pkt., 20c; ½-oz., 40c; 1 oz.,

WHITE

White Harmony-The stems are long, flowers large and pure white. Four large flowers on each stem; the best white Sweet Pea yet introduced. Pkt., 15c; ½-oz., 30c; oz., 55c; ¼-lb., \$1.65.

Superior Pink—A pleasing shade of glowing pink with a soft suffusion of salmon. Large, beautifully waved flowers. Pkt., 15c; ½-oz., 30c; oz., 50c! ¼-lb., \$1.50.

CRIMSON

Queen Crimson—The brightest and richest Crimson; large flowers, long stems. Queen Crimson is in great demand on account of the brilliant coloring. Pkt., 15e; ½-oz., 35e; oz., 65e; ¼-lb., \$2.20.

SCARLET

Grenadier—The large flowers are a rich Poppyscarlet. Borne profusely on long stems. Pkt., 15c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.50.

Zvolanek's Rose—This is a widely known variety with large flowers and bold stems. Color a rich rose. Pkt., 15c; ½-oz., 30c; oz., 50e; ¼-lb., \$1.50.

ORANGE

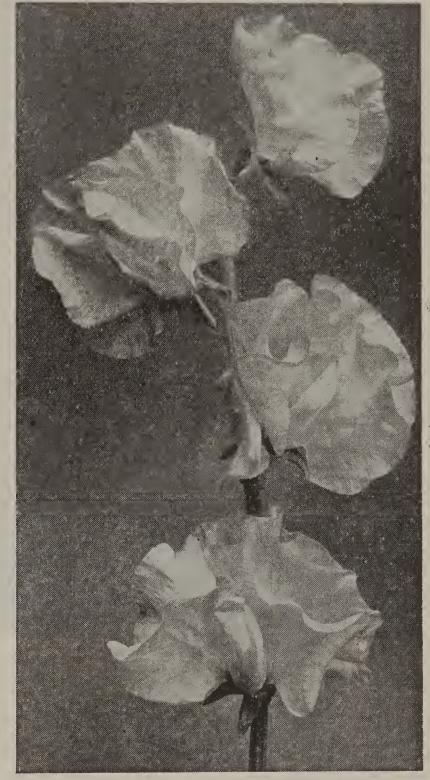

Orange King—The most outstanding orange Sweet Pea. It is a clear intense orange. Pkt., 15c; ½oz., 30c; oz., 50c; ¼-lb., \$1.50.

LAVENDER

Sweet Lavender—A beautiful shade of lavender. Pkt., 15e; ½-oz., 30e; oz., 50e; ¼-lb., \$1.50.

PURPLE

Amethyst-The color is a rich warm purple, younger flowers having a slightly softer color tone. Pkt., 15c; ½-oz., 30c; oz., 50e; ¼-lb., \$1.65.

Early Flowering Sweet Peas

BLUE

Silver Blue—The large flowers are a pleasing delicate shade of silver blue. For a light blue Silver satisfactory a most ½-oz., 30c; oz., 55e; ¼-lb., \$1.80.

Early Flowering Spencer Mixed—A choice mixture of the foregoing named Early Flowering Spencer varieties. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25; ½-lb., \$2.00; lb., \$3.50.

EARLY FLOWERING SWEET PEA COLLECTIONS

The early Flowering Sweet Peas are most valuable for our Northern States. They are now in great demand for early Spring blooming, coming into flower three to four weeks earlier than the Summer flowering varieties. A very acceptable gift. The collection contains the following eight

Amethyst—Rich warm purple.

Superior Pink—Beautiful shade of glowing pink.

Orange King—Glowing orange.

Sweet Lavender—Beautiful shade of lavender. Grenadicr—Rich Poppy scarlet. Zvolanek's Rose-Rich rose.

Silver Blue—A charming shade of silver blue. White Harmony—Large waved pure white.

One-half ounce each of these eight fine Early Flowering Sweet Peas (value \$2.75) will be dress for \$2.25 sent postpaid to any ad-

S. N. & S. Co's. Peerless Gladiolus Bulbs

All Postpaid—Mammoth Flower Spikes—Glorious Array of Colors—All Postpaid

No other Summer flowering Bulb is enjoying such great popularity as the Gladiolus. Their adaptability to garden decoration or as cut-flowers is surpassed by no other flower. Plant the bulbs 6 inches apart and 2 inches deep. Gladiolus like plenty of water, particularly when buds begin to show color.

Our Peerless Gladiolus

Eleven Newer Varieties

Betty Nuthall—A magnificent, large, coralpink flower with large orange throat. Each, 10c; 3 for 20c; dozen, 60c; 25 for \$1.10.

Dr. F. E. Bennett—A vivid, fiery scarlet, so bright that it is hard to imagine anything brighted. One of the finest red Gladioli with many massive blooms. Each, 10c; 3 for 20c; 12 for 65c; 25 for \$1.10.

Early Sunrise — Flowers are extra large, bright salmon-scarlet in color, and extremely early. Each, 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Golden Dream—The richest pure golden yellow Gladiolus yet introduced. Fine large flowers. Each, 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Herada—Blooms of immense size are pure mauve, glistening and clean, with deeper marking in the throat. Each, 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Mrs. Van Konyenburg—A matchless shade of brilliant blue. The flowers are of largest size, opening up without fading to the very top of the tall spikes. Each, 10c; 3 for 25c; 12 for 70c; 25 for \$1.25.

Mrs. Leon Douglass—Enormously large flowers of beautiful begonia-rose striped with flame-scarlet; the lower petals pale lemon, speckled ruby. Considered one of the largest Gladiolus in existence. Each, 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Minuet — A clear lavender; considered by many the best in this color. Each, 12c; 3 for 30c; 12 for 90c; 25 for \$1.65.

Pfitzer's Triumph—Unquestionably one of the largest and finest Gladiolus ever introduced. The blooms are bright salmon-orange, with small velvety red blotches. It has been a sensation wherever shown. Each, 10c; 3 for 25c; 12 for 75c; 25 for \$1.50.

Picardy—A most sensational flower of delicate apricot-pink. Extremely large and slightly ruffled. Has created a sensation every time exhibited. Each, 10c; 3 for 25c; 12 for 85c; 25 for \$1.50.

W. H. Phipps—La France pink with lovely salmon-pink stripes. Huge flower-like stripes. Each, 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Special Offer—One each of the 11 newer varieties, 85c; Three each of the 11 newer varieties, \$1.95

TEN BLUE RIBBON VARIETIES

The following ten outstanding blue ribbon varieties won the blue ribbons at the National Gladiolus Show at South Bend, Ind., and the Michigan Gladiolus Show and created much interest last season.

Cadillac—Tallspike, flowers well placed and of good form. Five to seven open at one time. Color golden apricot fading to apricot-rose toward edge of petals, no throat markings, stamens and pistils creamy white. A pleasing shade. Each, 20c; 3 for 50c; 12 for \$1.75; 25 for \$3.25.

Coppersheen—A very attractive primulinus novelty. It contains a blending of colors difficult to describe, but which gives the flower a bronzy orange effect. The florets are round, well hooded, and spaced separately on the spike. Each, 10c; 3 for 25c; 12 for 75c; 25 for \$1.45.

Dearborn—Immense florets of deep flesh color light coral reflex, lip amber yellow, blending to flesh, marked with a feathering of deep crimson. Tall, straight spike with twenty or more florets, four to six open at a time, measuring five to six inches in diameter. A giant gladiolus that blooms early. Each, 15c; 3 for 40c; 12 for \$1.20; 25 for \$2.25.

Grand Rapids—Light lavender with a white throat marked with a small blotch of lilac, anthers pure white, reflex of darker lavender, flowers well placed. Best lavender. Each, 12c; 3 for 30c; 12 for 90c; 25 for \$1.65.

Edith Mason—Delicate geranium pink. Beautiful. Each, 10c; 3 for 25c; 12 for 75c; 25 for \$1.50.

Kalamazoo—Large, compact flowers of beautiful violet-purple, with a creamy white throat. Each, 12c; 3 for 30c; 12 for 90c; 25 for \$1.65.

Martha Phillips—Dark solid red. Each, 12c; 3 for 30c; 12 for 90c; 25 for \$1.65.

Rosa Raisa—Long spike, flowers well placed and of very good size. Color, lower 3 petals blotched with violet, upper petals pale mauve shading to violet edge. Flowers larger, contrast between upper and lower petals more intense. Each, 15c; 3 for 40c; 12 for \$1.50; 25 for \$2.75.

Tawny—Color deep rose-apricot faintly laid with pale rose-violet at the edges. Remarkably silky texture. Very large flowers well placed, stamens and pistils white. An outstanding flower. Each 10c; 3 for 20c; 12 for 60c; 25 for \$1.10.

Peerless White—Many large flowers of satiny white open at one time. It is vigorous in growth, and very prolific. Without doubt it is the best white yet introduced. Each, 15c; 3 for 40c; 12 for \$1.20; 25 for \$2.25.

One each of our ten Blue Ribbon Varieties (Value \$1.30) for \$1.10 Three each of our ten Blue Ribbon Varieties (Value \$3.30) for \$2.75

S. N. & S. CO'S. PEERLESS GLADIOLUS MIXTURE

A mixture of the best Giant Flowered sorts in a wide range of shades and colors

VEGETABLE NOVELTIES AND SPECIALTIES

TOMATO

Ascrow Scarlet Dawn Awarded Gold Medal 1935

This new variety is a cross of Clark's Early and Marglobe; considerably earlier than either parent. Vines of medium growth and very prolific. Fruit medium large with thick wall structure. Globular, smooth, free from flat sides and puffiness. Bright scarlet—especially attractive. Very desirable for home garden, shipping and early canning. Pkt., 15c; ½-oz., 35c; oz., 60c.

Parsley

Peerless—Of good bunching size, very dark green, fine curled type, about eight inches tall. Its characteristics are hardiness and holding its color through the winter, which makes it excellent for market gardeners as well as for home gardeners. A good strain of good quality and fair uniformity. Pkt., 10c; oz., 20c; ¼-lb., 60c; lb., \$2.00.

Radish

Glowing Ball—First gold medal winner in 1934. A round, forcing, short-top Radish, very bright scarlet with almost an orange glow. It can be used for greenhouse plantings as well as for the open. It has a very attractive color and a smooth, silky skin, short topped, very small tap roots, ball shaped and one inch or less in diameter. Pkt., 10c; oz., 20c; ¼-lb., 65c; lb., \$2.00.

Endive

Batavian Full Heart—Judges' reports on this show that it grows off slower than Giant Batavian but increases its full heart after approaching its large full size. It has short, wide leaves of good quality, and is very attractive. About six inches high and rather uniform. Pkt., 10c; oz., 20c; ¼-lb., 55c; lb., \$1.50.

Sweet Corn

Kingcrost—The new Hybrid Corn. An early and uniform Sweet Corn, 4½ to 5 feet tall, yellow grained; judged to be earlier, more uniform and of better quality than Golden Bantam. Pkt., 10c; 1/4-lb., 25c; 1/2-lb., 40c; lb., 70c.

Asgrow Wonder—Gold medal winner. A deep red, large, semi-flat Beet with rounded bottom. Very uniform, exceptionally dark interior, glood flavor and a fine smooth exterior, medium tops and collar and good tap root. Pkt., 10c.

Little Marvel—A dark red, early flat forcing variety with shortest foliage, resembling Early Egyptian but darker, earlier and shorter topped. Pkt., 10c.

Cucumber

The Barteldes—From 8 to 12 inches long, of a very dark green color which does not fade in shipping. This is of greatest importance to the growers and shippers who want their cucumbers to be attractive when they reach the market. The flesh is firm. white, thick and with few seeds. Pkt., 10c; oz., 20c; 14-1b., 65c.

Cabbage

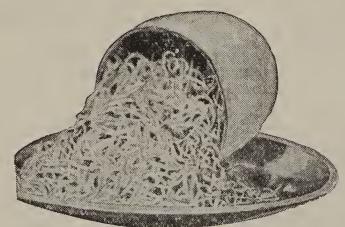

Penn State Ballhead—It is a short-stem, dark bluish green Ballhead type, twelve inches high, produced by the Pennsylvania State College, Dept. of Horticulture. It is claimed that it will outyield in weight other varieties in sections adapted for a heavy late Cabbage, that heads are extremely heavy and hard with small core. Pkt., 10c; oz., 40c; ¼-lb., \$1.15; lb., \$3.25.

Carrot

Morse's Bunching—A gold medal winner. A cylindrical, half-long Carrot, of ideal size, and shape for bunching. Color is a fine deep orange throughout, cores small and indistinct. Tops are short, rather bushy and strong, but not coarse at the neck. Quality fine, flesh tender and sweet. It was developed as a bunching Carrot for long-distance shipment, but is equally desirable as a home garden variety. Pkt., 10c; oz., 20c; 4-lb., 60c; lb., \$2.00.

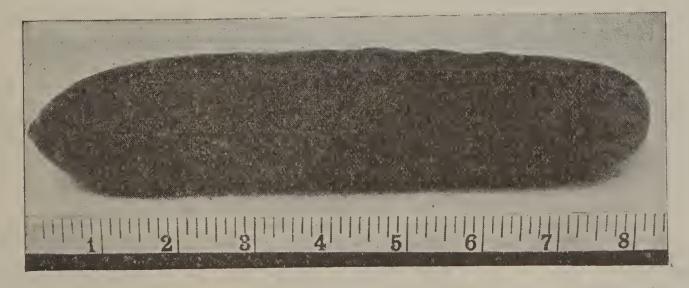

Vegetable Spaghetti

A most unusual vining squash with creamy white fruits about 8 inches long and 4 to 5 inches in diameter. When mature boile whole for about 30 minutes, not longer. Cut open, remove the center seed core and season the flesh that appears as tightly wound spaghetti-like threads or strings with salt and butter. Of a most delicious, mild, and pleasing flavor. Easily stored for winter use. Pkt., 15c; oz., 30c; ¼-lb., 85c.

Vegetable Spaghetti

CUCUMBER, STRAIGHT EIGHT-Gold Medal Award 1935

This new outstanding variety Straight Eight produces symmetrical, almost cylindrical fruits, well rounded at both ends, quite straight, regularly eight inches in length and from 1¾ to 2 inches in diameter. The color is deep green and free from objectionable pale striping. Vines are vigorous, remarkably productive and of fine quality. Makes and ideal slicing variety for the home garden or market. Pkt., 10c; oz., 35c; ¼-lb., \$1.00; lb., \$3.00.

Collections of Flower and Vegetable Seeds

Every one loves to "grow things." Doctors advise that we eat more vegetables; that we grow the food we eat. Vegetables are healthful. They contain vitamins. Digging, hoeing and planting furnish the finest kind of exercise. No vegetables are like those gathered fresh from the garden. The time spent in the garden is an actual gain in health and money saved.

Many people think that seeds can only be planted successfully during the Spring months of April and May. The wide-awake planter sows "successive crops" throughout the Summer of Beets, Carrots, Endive, Lettuce, Peas, Radishes, Spinach, etc. A space 50x50 will produce more vegetables than the average family can consume and if purchased would exceed \$60.00 to \$100.00. Therefore the cost of the family's food can be reduced by having your own vegetable garden. Flowers also make the home more enjoyable.

TESTED SEEDS

In our vast Seed Testing Grounds all of our Vegetable Seeds are tested and tried and only after exhibiting all the factors that bring them as near perfection as possible are they offered to you, our friends and customers, as State Nursey and Seed Company's PEERLESS SEEDS.

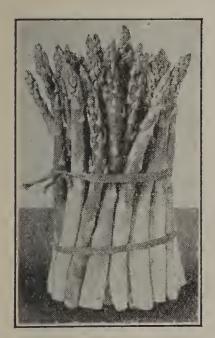

The maintenance of our Seed Testing Grounds which assures you of only the best Seeds is a service which only a few of the very largest seed houses in America offer, and added to this you have our firty-six years of experience in Montana and the Northwest, something which no other firm can offer you.

Asparagus

Ger.—Spargel.

Scand.—Asparges.

1 oz. to 50 feet of drill-5 lbs. to the acre

Sow early in the Spring in drills 2 inches deep and 12 inches apart if to be cultivated by hand. When the plant are one or two years old transplant to rows 5 feet apart, and 18 inches apart in the row. Cover the soil 4 to 5 inches deep with well rotted manure and disc well - then plow as deep as possible and Turn furrows 5 harrow. feet apart, about 6 inches deep. Place plants in rows about 18 inches apart, with roots well spread out. Turn a light furrow back over them and level by cross harrowing.

Asparagus

Mary Washington-Rustproof-The Washington is ary Washington—Rustproof—The Washington is a rust-resistant, vigorous, high-yielding strain of Giant Asparagus. Plants grow rapidly and produce uniformly long shoots of superior table qualities. It produces large straight shoots of a dark green color. The tips are tight and firm and do not open out or begin to branch until well out of the ground; a very valuable feature. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

ASPARAGUS ROOTS—(See Page 46)

Asparagus Knife

This Asparagus Knife is made of the best steel; cutting edges are hardened and tempered to stand long tap-rooted weeds such as dandelions. Each, 45c; postpaid, 53c. rough usage. Used also as digger and weeder for

Forcing Growth-Nitrate of Soda is a very strong stimulant for young growing plants. Vegetables grown for their leaves and stems, like Lettuce, Cabbage, Celery, etc., can be improved by a light appli-cation or two of Nitrate of Soda in the early growing period. Nitrate of Soda is readily soluble. Use one ounce to three gallons or one pound to fifty gallons of water. Apply this in small amounts some little distance from the plant. Repeat in from 20 to 40 days. See Index.

Great Falls, Montana.

State Nursery & Seed Co.,

Helena, Mont.
Dear Sirs:—I am pleased to tell you that I won upwards of thirty prizes at the North Montana Fair and the Flower Show held here in Great Falls last year.

I am sincerely yours JOHN R. COULTER.

We handle Hudson Sceders and cultivators, also sprayers and insecticides, seed sowers and plant setter, potato and corn planters, also small garden tools for the garden. See last pages of the catalog.

Collection—Salad Greens

Very few people are acquainted with salad vegetables other than head lettuce. We offer the following collection of palatable, de-liciously flavored green vegetables, to supply greens from April through the Winter:

Cos Lettuce Corn Salad Endive

Chinese Celery Cobbage French Endive or Chicory

Water Cress

One pkt. of each for 35c, postpaid

HOT KAPS

Broccoli or Winter Cauliflower

1/4-oz. to 100 feet of drill-2 to 3 ozs. to the acre Ger.—Sparcckohl. Scand.—Broccoli-kaal.

(One ounce will produce about 3,000 plants)

Sow the first week in May in drills 2 to 4 inches apart, covering seeds lightly. When the leaves are about three inches broad, transplant to prepared beds 2 feet apart each way. Resembles Cauliflower; cultivation the same.

BROCCOLI-Snow White-150 Days-Pure white color; heads medium size, close and compact. Pkt., 10c; ½-oz., 30c; oz., 50c; ¼-lb., \$1.50.

BROCCOLI - Green Sprouting - This delicious Italian vegetable has become a great favorite in this country; does not make solid heads but produces an abundance of green, tender sprouts with loose flower heads at the ends which can be cut off and cooked like Spinach or Brussels Sprouts. The sprouting Broccoli provides delicious, healthful, boiling greens during Summer, Autumn and early Winter. A continuous supply may be had for a long time; cut when the buds begin to burst into flower. Sow in May. Pkt., 10c; ½-oz., 25e; oz., 45c; ¼-lb., \$1.50.

Broccoli—Green Sprouting

We Pay Postage on All Vegetable Seeds Up to 10 Pounds

BEANS

We Pay Postage on All Vegetable Seeds Up to 10 Pounds

(2 lbs. to 100 feet in drill, or 150 hills; 120 lbs. to the acre, in drills)

Beans require a light friable soil with plenty of moisture. In the garden, the soil should be made mellow and rich, and kept so. For garden, a succession of sowing can be made from the first week in May until the middle of June. Sow in rows 18 to 24 inches apart and cover from 1 to 2 inches deep, but not more. Keep the pods picked and the vines well watered and the Beans will continue bearing much longer.

DWARF, OR BUSH, WAX OR YELLOW PODDED VARIETIES THE SIX BEST YELLOW PODDED BEANS FOR MONTANA AND THE NORTHWEST

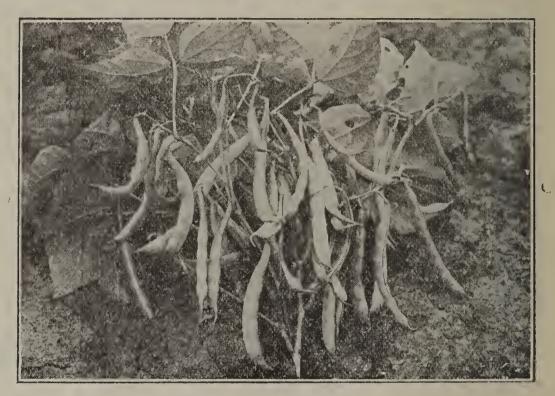

pods, five to seven inches long; flat, plump, handsome and meaty, of a clear, waxy yellow color. The pods are tender, brittle and of fine texture. We claim this is the earliest wax-podded Bean. Practically rust-proof; a bountiful yielder, in bearing for long season, It is an ideal Bean for the home and market gardener. It seems determined to yield a crop in good weather or bad. 55 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c! 5 lbs., \$1.20. Early Wonder Wax - It is loaded with

Improved Golden Wax—Probably the best known of all Wax Beans; it is an ideal Wax Bean; very prolific. Thick fleshed, Pods flat and stringless. 60 days. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.05.

Sure Crop Stringless Wax-The pods average 6 to 7 inches long, are very meaty, flat but thick through, and we have never found a stringy specimen. Sure Crop Stringless Wax is very hardy and may therefor be planted several days earlier than the light seeded varieties. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.20.

Davis White Wax—Extra Early—This is also called the Davis White Kidney Wax. It is a well known variety. The pods are flat and remarkably long, about six inches, sometimes longer. They are handsome, light yellow, crisp and tender. 55 days. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs.,

Black Wax—Pencil Pod—Has great clusters of beautiful straight yellow pods six to seven inches long, well rounded, deeply "saddle backed," meaty, and they are brittle, of rich, mild flavor,

Black Wax-Pencil Pod

and entirely stringless. An early sure cropper; of the finest quality. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.20.

Brittle Strigless Wax—"A very popular Bean"— Without a doubt the earliest of all Wax Beans, also a great cropper, very hardy and extremely prolific; the pods are round, fleshy and entirely stringless, often measuring 4½ to 6 inches long. They are of fine flavor, solid and tender. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.05.

BEANS---BUSH LIM

(One pound will plant 50 feet of row)

Lima Beans are very susceptible to cold and the seed must not be planted until the ground has become thoroughly warm. The end of May is usually safe. Plant the seed edgewise (eye down) 6 inches apart in the row and cover two inches deep with fine soil. They should be sown on well enriched ground.

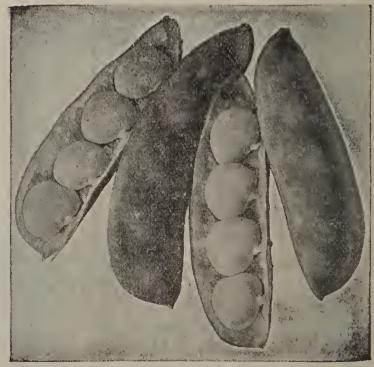

Henderson's Bush Lima—This variety belongs to the small Limas, known as Carolina or Sieva Lima Beans. On account of their hardiness they are worth growth in the North, where they will mature early and produce an enormous crop. The flavor is delicious and sweet; bear tremendously, each pod being filled with flat light green Beans. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40.

Burpee's Bush Lima—Each plant develops into a rounded bush from 2 to 3 feet in diameter and from 18 to 24 inches tall. Pods are uniform in size with an average of five large Beans to a pod. They are thin-skinned and of fine flavor, and immense yielders. The pods are borne in clusters and are easily gathered. Pkt., 5c; $\frac{1}{2}$ -lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.40.

Dwarf Shell Beans

Shell Beans are grown exclusively to use as dried Beans during Winter. The food value of dry Beans is very high. Sow 16 to 24 lbs. to the acre.

Great Northern Navy—This variety is especially adapted to Montana soil and climate, and is being grown in increasing quantity each season. In our opinion it leads all other varieties of Navy Beans. Its flavor and tenderness as a baked Bean are "par excellence." Pkt., 5c; ½-lb., 15c; lb., 25c; 2 lbs., 40c.

Henderson's Bush Lima

English or Broad Windsor—This Bean is very hardy. Plant as soon as the soil is in good condition. Plant four inches apart and 2 inches deep in drills three feet apart, to insure well filled pods; pinch off the tops as soon as pods begin to set. 65 days. Pkt., 5c; ½-lb., 40c; 1 lb.,

We will accept approved coupons issued by relief agencies at face value for seed orders at catalog prices.

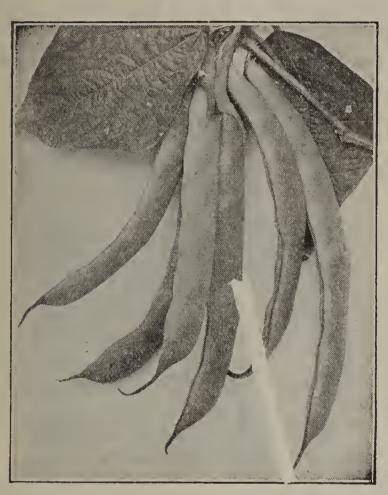

BEANS

DWARF OR BUSH; GREEN PODDED VARIETIES

(THE FIVE BEST GREEN PODDED BEANS FOR MONTANA AND THE NORTHWEST)

Bountiful

Bountiful—This excellent dwarf, green podded sort is similar in appearance to Early Yellow Six Weeks but is of much better quality. The vines are vigorous and productive. The pods are very long, six to seven inches, straight, broad, flat, light green, of handsome appearance and absolutey stringless. They are tender and brittle. 62 days. Pkt. 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.15.

Full Measure—A fine stringless Bean of splendid melting quality. The round pods are very fleshy, and dark green in color; 6 inches long, fine grained and of good flavor. Excellent for the table and for preserving; very prolific. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.05.

Stringless Green Pod—Remains tender and crisp a long time. Pods are pale green, long and round, meaty and of excellent flavor. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs.,

Extra Early Red Valentine—Is very hardy and early, germinates in cold ground where other sorts would rot; pods are round and fleshy and of good quality. The demand for a hardy early Bean of good quality has established a reputation for this excellent sort. 45 days. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.05.

BEANS—Pole or Running

Pole Beans yield more heavily than the dwarf varieties, bearing an abundance of floor, and wet Beans. They are more sensitive to cold and wet and should be planted later. About the middle of May plant four to six Beans around each pole, setting poles four feet apart each way.

Kentucky Wonder or Old Homestead—Green Pod-An early and productive variety bearing a fine crop of large green Beans 7 to 9 inches long. Pods are saddle backed, very fleshy, thick, tender and brittle and of good quality, hanging in large clusters from the top to the bottom of the pole. Very prolific. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

Kentucky Wonder Wax—Yellow Pod—The best pole wax Bean for Northern planting. It is similar in habit of growth to "Kentucky Green Pod" and bears as early. Pods are beautiful golden yellow, and so fleshy that often the thickness surpasses the width; make delicious eating. Pkt., 5c; ½-lb., 25c; 1-lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25.

SEE PAGES 4 AND 73 FOR NEW VEGETABLE NOVELTIES FOR HIGH ALTITUDE GARDENS

Feltham Prolific

"THE GREATEST PRODUCER YET INTRO-DUCED"—A MARVEL OF PRODUCTIVENESS

Feltham Prolific—Is a dwarf green Green and one of the heaviest croppers yet introduced. It produces a mass of medium sized, rich green fleshy pods which are very crisp, and stringless. "Feltham Prolific" is remarkably quick in growth. Try this sweet and delicious Bean. They are really wonderful. Pkt., 10c; ½-lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50.

Extra Early Red Valentine

Scarlet Runner-An English Bean of great merit; very tender and sweet; also grown as ornamental flowering vine for trellises. Pkt., 5c; ½-lb., 30c; 1 lb., 50c; 2 lbs., 90c; 5 lbs., \$2.00.

TABLE BEETS

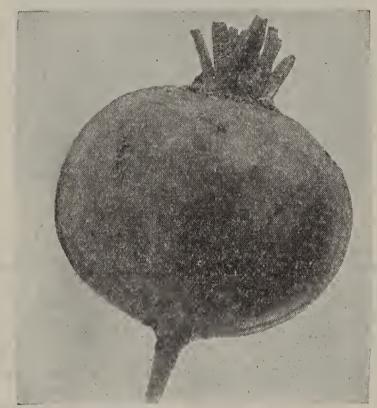

EAT WHEN YOUNG DIRECT FROM YOUR OWN GARDEN

Ger.-Rube.

Scand.—Rodebede.

HOW TO PLANT—The soil should be rich and deeply plowed. Sow in rows 14 to 20 inches apart and about 1 to 1¼ inches deep. As soon as the plants have the fifth and sixth leaf, thin to one plant each 3 inches apart. Then irrigate. Cultivate often and do not water again until absolutely necessary as the soil will dry from the surface down and the top roots will follow. Cultivate one a week for best results. Keep clean and remember that cultivation is the next thing necessary after the best seeds and the two are necessary for success. (One ounce to 100 feet of drill, 5 to 6 lbs. per acre, in drills; 15 to 20 lbs. to the acre broadcast.)

Early Wonder or Boston Crosby—(55 Days)—This new variety is extremely early, deep red, tender and sweet. One of the earliest and most perfectly shaped Beets. Its small-sized top and small, clean tap root, make it desirable. Its attractive appearance, uniformity of size, shape and color, and excellent keeping qualities have created a splendid demand for this sort. Grown very extensively for late Fall sowing, as it matures two weeks earlier than any other desirable Beet. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.10.

Beet-Detroit Dark Red

Detroit Dark Red-The roots are perfectly round and smooth with small tops. The skin is bloodred; flesh dark red, tender and decidedly sweet. A popular favorite for canning because of its extra deep dark red color. 65 days. Pkt., 5c; oz., 15c; 1/4-lb., 35c; 1 lb., \$1.25.

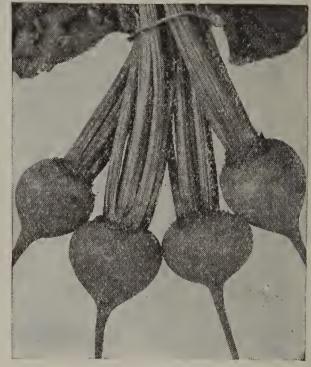

Early Blood Turnip-An extra selected stock of blood Turnip, having larger top and root than Detroit Dark Red and requiring a longer time to mature. The roots are dark red, slightly flattened. The flesh is deep red, zoned with lighter shade, sweet, crips and tender. This is an excellent market and home garden sort for Summer and Autumn use. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lbs., \$1.10.

Extra Early Egyptian—This is the best variety for forcing. It is also excellent for first early crop outdoors, being very early, with small tops. The leaves are dark green shaded and veined with dark red. The roots are very dark red, moderately thick, a little rounded on top, distinctly flat on the bottom and about two inches in diameter when mature. The flesh is dark red, zoned lighter shade; firm, crisp and tender. 58 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

Half Long Blood—An excellent main crop Beet. Roots deep red in color and always symmetrical and smooth. In quality it is sweet, crisp and tender, and is an enormous cropper and a reliable Winter keeper. It never becomes woody and is always good for table use or stock food, whether pulled young or old. 60 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 85c.

HOT KAPS

"WEE" HOT HOUSES NEW METHOD OF PLANT PROTECTION TO MARKET 3 WEEKS EARLIER

Beet-Good-for-All

Good-for-All—This is the most refined strain of Beet known. The roots are very smooth and very even in size and shape which is almost globular. The skin is smooth and very dark red. The interior color is a fine deep crimson vermilion. Good-for-All is a wonderful canning and pickling Beet, also crisp and tender and excellent market and garden variety. Pkt., 10c; oz., 15c; 1/4-lb., 40c; lb., \$1.25.

Swiss Chard

Ger.—Briskohl. kohl. Scand.—Bladbed. (One ounce to 100 feet of drill) Swiss Chard or Spinach Beet-Lucullus-Is a delicious vegetable and easily grown. Swiss Chard is used extensively as greens. Cook like Spinach. The outer leaves should either be cut off or pulled off when young, and may be picked continuously from June until frost, for when leaves are cut others take their places rapidly. 50 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.00.

Swiss Chard

SUGAR BEETS

5 to 6 pounds per acre in drills. 15 to 20 pounds per acre broadcast

Sugar Beets are not as heavy yielders as the Mangels but are of superior quality, containing a larger amount of sugar. They are excellent for feeding cows, improving wonderfully the quality and quantity of the milk. Sugar Beets require deep, well enriched soil. The seed should be sown in drills 2 to 2½ feet apart, and covered 1 to 1½ inches deep, any time during April, May or June. Thin the plants carefully to stand 8 inches apart in the row.

Klein Wanzleben Sugar Beet

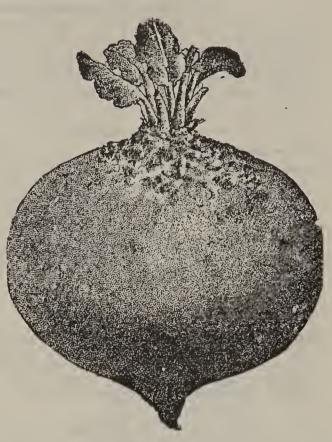

HOT KAPS "WEE" HOT HOUSES SEE PAGE 118

Klein Wanzleben-The most desirable beet for sugar manufacture; valuable for stock feeding. Roots medium large; 12 to 15 inches long, $3\frac{1}{2}$ to 4 inches at shoulder, tapered; white with a tinge of gray; very rich in sugar content; good keeper. Pkt., 5c; $\frac{1}{4}$ -lb., 25c; lb., 60c; 5 lbs., \$2.50.

Half Sugar and Half Mangel For Stock Feeding

The ground should be thoroughly prepared and made firm and mellow, same as for Mangels. Seeding and cultivation should be continued in much the same manner except that they should be thinned out 6 to8 inches in the row. The Giant Feeding Sugar Beets or Half Sugar Mangels are especially valuable for feeding stock as cially valuable for feeding stock as they give a feed of much greater nu-tritive value than Mangels.

Giant Half Sugar, Rose Top-Roots long oval, tapered; grayish-white with rose-colored shoulder; flesh white, rich in sugar. Pkt., 5c; ¼-lb., 20c; lb., 55c; 5 lbs., \$2.40.

Mangel Wurzel-Yellow Globe

Mangel Wurzel

5 or 6 lbs. to the acre

THE FOUR BEST MANGELS FOR STOCK FEEDING

Root crops are a great necessity for all kinds of stock, also chickens. Root feeding gives tissue building substance to the body, and acts as a tonic, keeping the digestive organs in a healthy condition. Root crops should be regularly fed to all stock. Results will show in appearance, also in increased weight, and will enrich and increase the milk. The ground should be thoroughly prepared, and made firm and mellow. Sow in April and May in drills 2 to 3 feet apart. When 4 to 5 inches high thin to 12 to 15 inches apart.

Mammoth Long Red—This- variety produces the largest yield of any kind of Mangel. The quality of the roots for feeding is high. The roots grow very large and keep well. They are quite long, light red in color and grow well out of the ground so are easily harvested. Pkt., 5c; ¼-lb., 20c; 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

Danish Sludstrup—Is considered the best of all Mangels. In color it is reddish-yellow. It contains the largest per cent of nutriment found in any sort. It is very hardy, grows well above the ground and is easly pulled. Pkt., 5c; ¼-lb., 20c; 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50. Golden Tankard-A distinct variety, particularly valuable on account of its richness in saccharine matter, and highly prized by dairymen for its milk-producing qualities. The flesh, which is of a distinct deep yellow, is very sweet and tender. The large roots are oval in shape, and therefore will pull easier. 90 days. Pkt., 5c; 1/4-lb., 20c; 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

Yellow Globe-An especially good variety to grow if one has a limited supply of water; a great favorits for dairymen, making a wonderful increase in milk; easy to pull; tops are small. 85 days. Pkt. 5c; ¼-lb., 25c; 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

Mangel Wurzel-Mammoth Long Red

Corn Salad

Ger.—Feldsalat.

Scand .- Vaarsalat.

(Two ounces to 100 feet of drill)

Corn Salada—(Or Fetticus)—A salad used as a substitute for Lettuce in salads or may be cooked like Spinach for greens. On rich soil the leaves renew rapidly after being cut. Pkt., 5c; oz., 20c; 1/4-lb., 50c; 1 lb., \$1.35.

Chives or Schnittlauch

(See also Vegetable Plants)

Chives—A vegetable of the Onion tribe, quite hardy everywhere. The leaves are slender and appear very early in the Spring, and may be shorn several times during the season. The Chives are equal to the Onion for flavoring soups and salads. Pkt., 10c; ½-oz., 35c; oz., 60c; ¼-lb., \$2.00.

Cress

Ger.—Garten-Kresse.

Scand.—Karse.

Cress, or Pepper Grass-This salad is used with Lettuce to the flavor of which its warm pungent taste makes an agreeable addition. 30 days. Pkt., 5c; ½-oz., 10c; oz., 15c; ¼-lb., 35c; 1 lb., 85c.

Cress—(Water)—Hardy perennial aquatic plant; sow seed along water's edge, preferably near running springs. 45 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.20.

Chicory

Whitloof or "French Endive"-Seed sown in May or June produces roots which, when taken up and placed in sand in a warm dark place, throw out tender white sprouts, which are used as salad. Pkt., 10c; oz., 25c; ¼-lb., 75c.

Chervil

Chervil-(Curled)-An aromatic herb. The young leaves are used in soups and salads. Pkt., 5c; oz., 40c; ¼-lb., \$1.25.

Brussels Sprouts

Ger.-Rosenkohl. Scand .- Rosenkaal.

Brussels Sprouts

Brussels Sprouts—Species of Cabbage. One ounce will produce about 3,000 plants. The Cabbage-like heads which grow upon the stem are improved by a moderate frost. Sow in hot beds in March or April and in the open ground in May; cultivate same as Cabbage.

Improved Half Dwarf—Grows about 20 inches high; produces sprouts in abundance; cut out head of plant when sprouts have formed. Pkt., 5c; oz., 30c; q-lb., 85c.

You can raise this fall luxury in your own garden as easily as cabbage.

CABBAGE

Ger.-Kohl-Kraut.

Scand.—Kaal.

1/4-oz. to 100 feet of drill, or 3,000 plants; 1/4-lb. will produce plants for one acre.

The soil should be deep and rich. For early crop grow plants in hot beds, transplanting to cold frames and then after danger of freezing to the open ground. Cultivate often and keep well watered. For late crops sow seed in open ground and transplant, or in hills where wanted and thin to one.

Extra Early Varieties

Earliest of All

Earliest of All-Is the earliest hard heading Cabbage in cultivation. It combines earliness with solidity, good size, delicious flavor, tenderness and productiveness. It has produced fine marand productiveness. It has produced fine marketable heads in 70 days from the sowing of the seed; very compact with few outer leaves, permitting close planting. It is a great money maker for the market gardeners and valuable for the home garden. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25; 1 lb., \$4.50.

Extra Early Winningstadt—A Medium Size Pointed Head which is firm and solid—A fine header; will stand more frost, drought, wet, insects and diseases than any other early Cabbage. Plants very compact, with short thick leaves. Heads regular, conical and very hard. It is the largest of the pointed varieties. 90 days. Pkt., 5c; ½-oz., 15c; oz., 20c; ¼-lb., 65c; 1 lb., \$2.25.

CABBAGE PLANTS—(See Page 47)

Early Jersey Wakefield—One of the finest types of early Cabbage. Produces uniform, pointed heads, The outer leaves form a protection for the heads which enables them to be set out earlier than other sorts. Usually matures in 80 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., \$65c; 1 lb., \$2.25.

Copenhagen Market—A very early variety. It is the finest large, round-headed early Cabbage in cultivation. The heads average about ten pounds each in weight, are hard and solid and with small core. The quality is extra fine and sweet, It matures as early as the Wakefield and will yield more to the acre in weight. It is a short-stemmed variety, the heads nearly resting on the ground. The leaves are light green, rather small, saucer-shaped and tightly folded, making it possible to set them close together in the field. 85 days. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., 85c; Pkt., 10e; ½-oz., 20e; oz., 35e; ¼-lb., 85e; 1 lb., \$2.50.

Cabbage-Copenhagen Market

Ger.-Kohl-Krant.

CABBAGE

Scand.—Kaal.

(4-ounce to 100 feet of drill, or 3,000 plants; 4-lb., will produce plants for one acre)

Golden Acre-An extra early variety; heads medium size, very solid and uniform. Matures even earlier than Early Jersey Wakefield. Produces a tightly folded round head of superb quality with few outer leaves, suitable for close planting. Pkt., 10e; ½-oz., 25e; oz., 35e; ¼-lb., \$1.10; 1 lb., \$3.25.

Second Early Variety

Early Summer—A reliable second early Cabbage, maturing about ten days after Jersey Wakefield. Makes a large, solid, flattish head, with short outer leaves, which enables close planting, and is a good keeper. It matures soon after the pointed head sorts, and is valuable for a second crop. It is suited to all sections. 110 days. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼-lb., 65c; 1 lb., \$2.25.

Late or Winter Varieties

Hollander or Danish Ballhead—(Medium Stem)—
Very solid, of fine quality. Plants vigorous, compact and exceedingly hardy in resisting cold and dry weather; leaves large, thick, bluish green.
Heads medium sized, round, very solid, and stands and stands are the standard of shipment better than any other late sort. 120 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., 80c;

Cabbage—Hollander or Danish Ballhead

Red Rock—The largest variety of Red Cabbage, and produces heads which are remarkably solid. The heads are round, very solid, will keep for a long time. It is the best and most attractive Red Cabbage grown. Fine for pickling. 120 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00; 1 lb., \$3.50.

Cabbage-Large Late Plat Ducca

Large Late Flat Dutch—Heads large bluish green, round, solid, broad and flat on top; an excellent, Fall and Winter variety, and a good keeper. It is a sure header. 120 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., 75c; 1 lb., \$2.00.

HOT KAPS

"WEE" HOT HOUSES NEW METHOD LF PLANT PROTECTION TO MARKET 3 WEEKS EARLIER SEE PAGE 118

Danish Roundhead—(Short Stem)—The heads of this variety are larger than the Danish Ballhead, grows larger and has a shorter stem; the interior leaves blanch white; very solid and exceedingly crisp and tender and of excellent flavor. 115 days. Pkt., 5c; 1/2-oz., 20c; oz., 35c; 1/4-lb., 85c; 1 lb., \$3.00.

Drumhead Savoy—The plants are vigorous, of medium size, with rather short stem and are sure heading; the outer leaves are medium large, thick, fleshy and uniformly crumpled; the heads are large, nearly round, sweet and tender. 110 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., 85c; 1 lb., \$2.50.

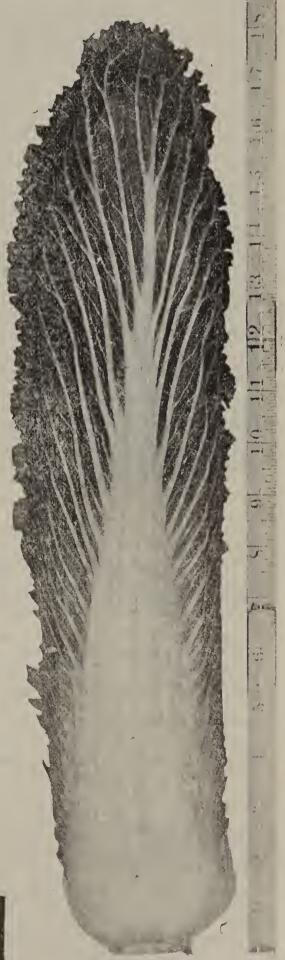

Chinese or Celery Cabbage Peking or Chihili

The head is long and compact, and all but the outer leaves blanch a creamy white. Very crisp and tender, and in every way adapted to the home garden.

Grows somewhat like the Cos Lettuce. Boiled and seasoned with butter it makes a most delectable dish, and is splendid for salads. Sow later than ordinary_ Cabbage, as too early sowings have a tendency to run to seed quickly. days. We have recently secured a much improved strain and recommend a trial. Pkt., 10e; ½ - oz., 15e; oz., 35e; ¼-lb., 75e; 1 lb., \$2.75.

Sprouting Broccoli and Chinese Cabbage are two most important newer vegetables which have become very popu-lar within a few years. They are easy to grow, tasty, palatable, and add good variety to the menu.

Chinese or Celery Cabbage

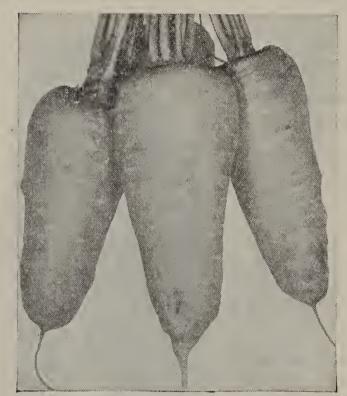

Carrots

Scand.—Gulrod. Ger .- Mochre. (One oz. to 100 feet of drill-3 to 4 lbs. to the acre)

Good sandy loam is best adapted for Carrots. The shorter varieties, however, can be sown on heavier soil.

Pride of Montana (Bunching Type)—A new type of Carrot: The roots are longer and more slender than the Danvers and wider towards the tips. The color, both exterior and interior, is a fine deep red with very small cores. It is a little slower in reaching maturity than Danvers, but remains in condition for use longer. Roots are six to eight inches long, smooth, free from hair roots and wrinkles. The shoulders are wellstumped and are excellent for bunching. Fine for market and home use. Pkt., 10c; oz., 20c; ¼-lb., 50c; 1 lb.,

Early French Forcing or Golden Ball-It is an excellent Carrot for forcing as well as for an early supply from the garden. Small roots, 1½ inches in diameter, tender and of fine flavor. Rich orange skin and flesh. 50 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.25.

Carrot-Oxheart or Guerande

Oxheart or Guerande—Medium early, bright orange color, fine grained and sweet; one of the best table varieties. Can be pulled by hand; well suited to heavy soils, but will thrive equally well in other situations. 70 days. Pkt., 5c; oz., 15c; in other situations. 74-lb., 35c; 1 lb., \$1.00.

Early Chantenay or Model—A most excellent medium early, half long variety. The tops are medium sized with small neck. The roots are thick, six inches in length, uniformly half long or stump rooted but tapering slightly; smooth, deep orange-red color. The flesh is very crisp and tender. Extensively used for hypothing, 65 days tender. Extensively used for bunching. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.10.

Danvers Half Long—A standard variety and one croppers. Color dark orange, heaviest very thick shoulder, of a most excellent quality. Length 7 to 7½ inches. 75 days. Pkt., 5c; oz., 15e; 1/4-lb., 35c; 1 lb., \$1.00.

Improved Long Orange—This is a variety of the largest size. The roots are uniform in size and largest size. The roots are uniform in size and largest size. Of gradually tapering shape, holding their thickness well throughout the length; rich, deep orange color. It is a good keeper of fine quality for Winter use. 80 days. Pkt., 5c; oz., 15c; ½-lb., 35c; 1 lb., \$1.00.

S. N. & S. Co's. New Red Cored Chantenay-This new Carrot meets the requirements of the home garden and market gardener. Tops are shorter than the regular Chantenay and considerably earlier, making bunching easy. The outstanding features are the smoothness of the roots, the excellent color, both exterior and interior; the tenderness of the core and the uniform and perfect stumping. Excellent for slicing, dicing in soups and salads. Roots tested for sugar average 10 per cent sweeter than any other Carrot. Pkt., 10c; oz., 20c; 1/4-lb., 50c; 1 lb., \$1.50.

Harvesting Early Snowball Cauliflower from Our Peerless Seed at the Capitol View Gardens, Owned by Joe Fisher

Early Scarlet Horn or Short Horn-One of the most popular early varieties for market or home. The roots measure 1½ inches in diameter and about 3 inches in length. They are a rich deep orange color and of sweet flavor. 55 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Cauliflower

(One ounce for 3,000 plants)

 $(\frac{1}{4}\text{-oz.}, \text{ to } 100 \text{ feet of drill}-4 \text{ ozs. to the acre})$

Culture—Cauliflower is a gross feeder, and well repays heavy manuring and high culture. It sucseeds best on well drained soil. For Spring crop, plant the seed in protected beds early in February and the plants will be ready to transplant probably early in April. Plant in rows two feet apart and eighteen inches in the row.

Early Snowball—Is the best all-around Cauliflower on the market for early or late use, for the family or the market garden. It heads where others fail. Its close and compact habit of growth permits one-third more to be planted on the same space of ground than can be done with other varieties. 90 days. Pkt. 15c; ¼-oz., 75c; ½-oz., \$1.10; oz., \$2.00; ¼-lb., \$7.50.

Dry Weather or Danish Giant—Is more resistant to unfavorable season than other sorts, particularly in dry weather. 100 days. Pkt., 15c; $\frac{1}{4}$ -oz., 85c; $\frac{1}{2}$ -oz., \$1.50; oz., \$2.25; $\frac{1}{4}$ -lb., \$7.50.

Extra Early Snowball or Danish Perfection-This new strain possesses all the good qualities of the best Early Snowball strains and has shown the best Early Snowball strains and has shown an unusually uniformity in maturing. The leaves closely enfolding the head give it a particularly attractive appearance, and as the inner leaves almost cover the snow-white flower the necessary early tying up as in the case of other early sorts is largely avoided. It is the earliest strain of its type. 80 days. Pkt., 15c; ¼-oz., \$1.00; ½-oz., \$1.75; oz., \$3.00; ¼-lb., \$9.00.

Carrots for Stock THE TWO BEST VARIETIES

Victoria-No yellow Carrot can approach the Victoria in size, in yield and in feeding qualities. It is the largest orange or yellow Carrot known. The roots are remarkably fine and of excellent quality, possessing high feeding properties; is a heavy cropper on all soils and grows nearly half again as much weight an acre as the ordinary varieties. The roots grow more above ground and it is easy to gather. 90 days. Oz., 10c; 1/4-1b., 30c; 1 lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.25; 10 lbs., \$6.25.

Mastodon—It is the heaviest Carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp and very sweet. It is a vast improvement on the white and green Belgian sorts and is much more productive. The roots are short and very heavy at the shoulder, rendering them easily harvested. Too much can scarcely be said of their size and great productiveness. The roots frequently measure 15 to 20 inches in circumference, and yield 20 to 30 tons to the acre. 90 days. Oz., 10c; ¼-lb., 30c; 1 lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.25; 10 lbs., \$6.25. We Pay Postage on All Vegetable Seeds Up to 10 Pounds

SWEET CORN

We Pay Postage on All Vegetable Seeds Up to 10 Pounds

THE SEVEN BEST VARIETIES OF SWEET CORN FOR MONTANA AND THE NORTHWEST

1 pound for 100 hills or 150 to 200 feet of drill; 15 pounds to acre; 1 pound is a little more than a pint; 2 pounds a little more than a quart.

Sweet Corn is very sensitive to frost and should not be planted until danger from freezing is past or about the middle of May in Montana. A rich, warm, good ordinary soil will raise excellent Sweet Corn, if it is deeply and thoroughly worked before planting. If planted in rows, make the rows three feet apart and 12 to 16 inches apart in the row; cover one inch deep with fine soil firmly pressed down. If planted in hills, make the hills three feet apart each way, and plant four to six kernels to the hill. Hoe frequently and when six inches high cut off all the suckers so as to leave three or four plants to the hills do not lot the plants overcovery. Cive frequent and thorough but shallow cultivation until the hill; do not let the plants overcrowd. Give frequent and thorough but shallow cultivation until the tassels appear. In cooking Corn use boiling water; do not cover the vessel and do not cook more than ten minutes. "Use no salt"—a pinch of sugar will add to the natural sweetness.

EXTRA EARLY VARIETIES

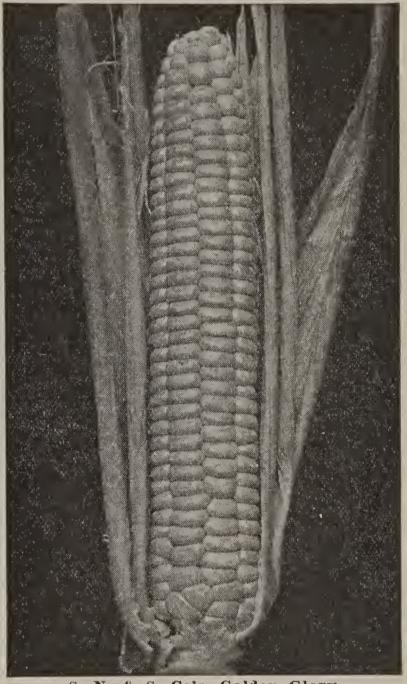

S. N. & S. Co's. Golden Glory, Earliest and Hardiest Sweet Corn in the World

Golden Glory—A Montana grown Sweet Corn of high merit; growth about 5½ feet, producing 2 or 3 ears to the stalk, and considerably larger than the average Golden Bantam. The illustration is a good average specimen of a 12-row, 8-inch ear. Sweet, creamy and tender, remaining in roasting ear stage a long time. With these qualifications this wonderful Corn can be grown to maturity wherever Golden Bantam can; we predict that it will be your first choice this season. In addition to its merits as a table Sweet Corn this variety is destined to be a popular variety on account of its extreme earliness, which is ten days to two weeks earlier than the Golden Bantam. Price: Pkt., 10e; ½-lb., 25c; 1 lb., 45e; 2 lbs., 80e; 5 lbs., \$1.75.

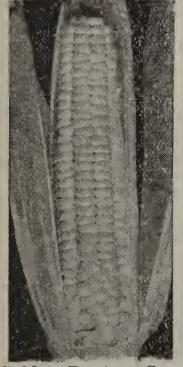

Early Golden Sunshine—An outstanding new variety of yellow Sweet Corn, of exceptional merit. The ears are bigger than those of Golden Bantam, are 16 rowed, and of deliciously rich flavor; light yellow in color. Sunshine is ready for use 6 to 10 days earlier than Bantam. The stalks are quite dwarf; usually 2 ears to the stalk. Those who tried it last year are highly enthusiatic, and say it is real Sweet Corn. Pkt., 10e; ½-lb., 20e; 1 lb., 30e; 2 lbs., 50e; 5 lbs., \$1.25.

S. N. & S. Co's. Extra Early Market—Is the earliest and sweetest White Sweet Corn in cultivation. It is extremely hardy, withstanding cold, wet weather to a wonderful degree. Ears are large for so early a variety. Kernels pure white, sweet and tender. It is very productive, producing two to three ears to the stalk; we can highly recommend this variety for home use, and as a market sort it is a money-maker, especially adapted for the Northern States. 60 days. Pkt., 5e; ½-lb., 15c; 1 lb., 25e; 2 lbs., 45c; 5 lbs., \$1.00.

> Treat Your Seed Corn with SEMESAN, Jr., for Large Yield—See Page 111

S. N. & S. Co's. Golden Glory

Golden Bantam Corn

EARLY VARIETIES

Golden Bantam-The well known variety. Some of our customers are now planting this Corn at regular intervals during the season, so that they may have it for table use continually and prefer it to all other sorts. Ears medium size, thickly set with delicious yellow kernels. Golden Bantam has a flavor distinct from any other sort. A very early variety. 70 days. Pkt., 5e; ½-lb., 15e; 1 lb., 25e; 2 lbs., 45c; 5 lbs., \$1.00.

Golden Early Market—A most outstanding early Sweet Corn and is a money maker for gardeners. It is indeed a fine corn with ears 4 inches long containing 12 to 14 rows of large sweet creamy yellow kernels. Stalks grow 4 to 5 feet tall and matures a week to ten days ahead of Golden Bantam. ½-lb., 20e; 1 lb., 30c; 2 lbs., 50c; 5 lbs., \$1.05.

Black Mexican—When cooked becomes white, with bluish tinge near kernel base. Often remembered only as the black Corn that was so very sweet. 75 days. Pkt., 5e; ½-lb., 20c; 1 lb., 35e; 2 lbs., 60e; 5 lbs., \$1.25.

Pop Corn—Japanese Hulless—Also known as Tom Thumb, Australian Hulless. Japanese Hulless is a dwarf-growing variety, a heavy yielder, and is ready for popping soon after it is husked. It has no hull or shell or hard center, is most tender, and of a delicious flavor when popped. The best all-around variety. 140 days. Pkt., 5e; ½-lb., 25e; 1 lb., 35e; 2 lbs., 55c; 5 lbs., \$1.20.

SPECIAL COLLECTION OF FLOWER AND VEGETABLE SEED

For your convenience in ordering vegetable seed we have made up collections suitable for different size gardens. These collections are put up in the dull season from our choicest seeds, and the collections cannot be changed. By taking advantage of the different collections you will make a handsome saving. See Page 74.

Celery

Ger.—Sellerie.

Scand.—Selleri.

(One ounce will produce 7,000 plants)
(4-ounce to the 100 feet of row; 2 ounces to acre)

Sow seeds in a hot bed or cold frame. As soon as the plants are about 3 inches high, transplant to a well prepared bed, setting them 4 to 5 inches apart. When some 8 inches high, and the plants stocky, set them in trenches. Earth up a little during the Summer, keeping the leaf stocks close together so that the soil cannot get between them. Finish earthing up in Autumn. Never hoe or earth up in moist weather. Keep the seed bed moist to insure quick germination and vigorous growth.

Golden Plume or Wonderful—This new variety is similar to Golden Yellow Self Blanching. It matures fully as early and has been found to be more resistant to attacks of blight and rust. The plants are semi-dwarf, stocky and vigorous growing with very full heart which bleaches quickly to a rich golden yellow color. Of very attractive appearance, superior quality and fine nutty flavor. A very profitable variety for market and the home garden. Pkt., 15c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.35; 1 lb., \$4.50.

Golden Self Blanching—A remarkable early sort, entirely self blanching, with beautiful large golden yellow heart; crisp, solid and of a nutty flavor. 110 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ½-lb., \$1.25; 1 lb., \$4.50.

white Plume—Is a truly be a u t i f u l type. Not only does the stem whiten, but the leaf itself assumes the attractive white color. This makes the White Plume one of the most showy that can be put upon the Thanksgiving or Christmas dinner table. As to succulence, crispeness and quality, the White Plume is all that can be desired. Fit to eat in 110 days. Pkt., 5c; 1/2-oz., 15c; oz., 25c; 1/4-lb., 85c; lb., \$3.00.

To succeed with Celery you must keep your plants growing constantly while young; if you allow them to stand still they will run up to

Celcry-White Plume

seed later. Always cultivate as soon after watering as the ground is dry enough to work well. Fertilize heavily in the Spring—and use nitrate of soda later if needed. See page 121.

Easy Blanching—A most valuable Celery with a remarkable natural tendency to blanch. Those who have never been successful in growing good Celery can depend on this variety. Valuable both for early use and for its Winter keeping qualities. Of very quick growth, thick stalks, very tender and brittle, and rich flavor. 115 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.00; 1 lb., \$2.75.

Winter Queen—Unsurpassed for Winter Use—Probably the most desirable Winter keeping Celery. It is short, stout, thick and heavy with double the amount of heart of any other Celery. The flavor is sweet, nutty and delicious. It bunches up handsomely. The leaves are light green, and blanch to a cream white. Matures in 140 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; lb., \$2.50.

CELERY PLANTS-(Sec Page 47)

Celeriac

TURNIP ROOTED CELERY

Ger.—Knoller Schlcrie.

Scand.—Knopselleri.

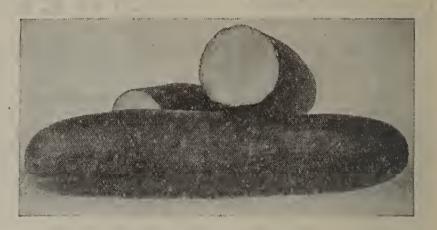

Giant Prague—This vegetable is used for two purposes; the leaves are cut when young and used to flavor soups and meats; the roots are boiled, sliced, cooled, and served as a salad. 125 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; 1 lb., \$2.50.

Celery Sced—For Flavoring—Excellent to use for flavoring soups, pickles, etc. 1/4-lb., 20c; 1 lb., 60c.

HOT KAPS—(See Page 118)

Cucumbers

Ger.—Gurken. Scand.—Haurk. (One ounce will plant 50 hills; 2 pounds to an acre)

Cucumber-Long Green

Long Green—The most popular and one of the best for the home garden; particularly desirable for slicing. Fruits rich dark green; black spined; 12 inches long; 2¼ to 2¾ inches thick; straight; cylindrical; with few seeds. 72 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; lb., \$1.35.

Earliest of All—An extra early prolific Cucumber; the fruit full and uniform, tapering slightly at both ends. Color, deep green; 10 days earlier than Early White Spine, and is a very desirable variety for the home garden and the market. 50 days. Pkt., 10e; oz., 20e; 1/4-lb., 50e; lb., \$1.50.

Early White Spine—The most popular white spined cucumber for the home garden; extensively grown for shipping. Fruits medium dark green; remain in good condition remarkably long; 7 inches long; 2½ inches thick; slightly tapered; 60 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Early Fortune—The rich dark green fruits average 7½ to 8 inches; flesh firm, with a small seed cavity, making it a good market sort. As a pickling sort it produces an enormous quantity of uniform well-shaped pickles. 52 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.10.

Davis Perfect—Long and slender, average length 10 to 12 inches. Color very dark green, of fine flavor, very tender and brittle. A choice variety for forcing under glass or for outside culture. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 40c lb., \$1.25.

Windermoor Wonder—An ideal cucumber for the market gardener and greenhouse man as it always demands top notch market prices. Beautiful in appearance, of dark bluish green color. The fruits average 14 inches in length by 2½ inches in diameter and are very symmetrical. Pkt., 10c; oz., 25c; ¼-lb., 70c; lb., \$2.25.

Japanese Climbing—A strong and vigorous grower, this variety can be grown on trellises, fences or poles. The fruits, from ten to twelve inches in length, are of excellent quality either for slicing or pickling. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.30.

Lemon Cucumber—Very productive, with round fruits of creamy yellow color; of distinctive flavor; desirable for slicing or pickling. 55 days. Pkt., 10c; oz., 25c; ¼-lb., 70c; lb., \$2.25.

Salad and Pickling Varieties

Everbearing—Small size, very early and enormously productive and valuable as a green pickler. It continues to flower and produce fruit whether the Cucumbers are picked off or not. Remarkably solid with very few seeds and of fine quality. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

Early Russian—Bright green, crisp and tender flesh; excellent for table use or pickling. 55 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; lb., \$1.25.

Cucumber—Extra Early Green Prolific or Boston Pickling

Extra Early Green Prolific or Boston Pickling—A very prolific variety used principally for pickles. Fruit medium sized, bright green, flesh firm and very crisp and tender. Gather the fruit when small and it will bear all Summer. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.25.

Egg Plant

(1/8-ounce to 100 feet of row-1/4-pound to acre) (One ounce will produce 1,000 to 1,500 plants)

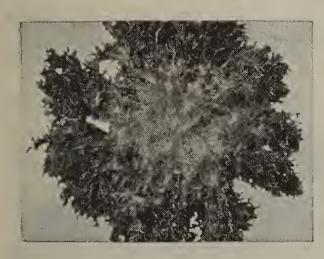

Improved New York — This selection is vastly superior to the old type. The habit of the plant is low and branching, and is quite free from spines. 140 days. Pkt., 10c; $\frac{1}{2}$ - oz., 25c; oz., 45c; 1/4-lb., \$1.35.

Egg Plant-Improved New York

Endive

Scand.—Endive. Ger.—Endiven. (1 ounce to 100 feet of row—4 pounds to acre)

Endive-Green Curled

White Curledpale Leaves green; should be used when young. 35 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

Green Curled-For Fall and largely used for Winter use; also gar-nishing; crisp and curly; easily blanched. 40 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb.,

Broad Leaved Batavian or Escarolle-A very wide leaved variety. Leaves with straight edges, thick and fleshy, of a dull green color. Quality excellent. 45 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; lb., \$1.25.

Gourd

Both Useful and Ornamental

Climbers with curiously shaped and colored fruit; of rapid growth; fine to cover old fences, trellises, stumps, etc. Ten to twenty feet high.

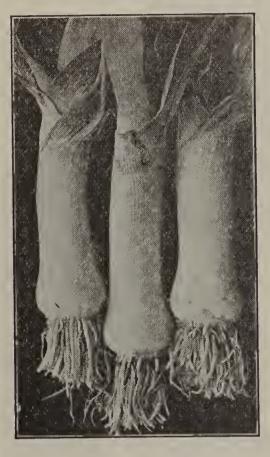

Gourds-Mixed-Pkt., 5c; oz., 25c.

Garlic Sets

Garlie-Lb., 40c; 5 lbs., \$1.75; postpaid. Write for price on larger quantities.

Kohl Rabi-White Vienna

Kohl Rabi

(4-ounce to 100 feet of row)

Purple Vienna — An early variety with a bright purple bulb, the leaves and stems being green and tinged with purple. 70 days. Pkt., 5c; oz.. 20c; ¼lb., 65c; 1 lb., \$2.00.

Early White Vienna --Turnip rooted; small, white, very tender and delicious when young. 50 days. Pkt., 5c; oz., 20c; ¼-lb., 65c; lb., \$2.00.

Leek

Ger.—Lauch. Scand.—Purre.

 $(\frac{1}{2} - oz., to$ 100 feet of drill: 4 lbs. to acre)

American Flag - A strong growing variety, producing large, thick stems of sweet flavor when properly blanched. Leeks are hardy and flavor is improved by frost. 80 days. Pkt., 5c; oz., 25c; ¼-lb., 75c; lb., \$2.50.

Leek—American Flag

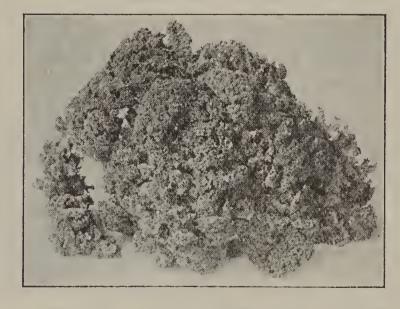

Kale or Borecole

Ger.—Blatter Kohl. Scand.—Groenkaal.

\(\frac{1}{4}\)-oz. to 100 feet of row—2 pounds to the acre)

Dwarf Curled Scotch-Kale makes excellent greens for Fall and are improved when slightly frosted. Cultivate same as Cabbage. Beautifully curled, very hardy. 55 days. Pkt., 5c; oz., 10c; 4-lb.,

30c; 1 lb., \$1.00. Tall Green Curled Scotch—Always a favorite. 60 days. Pkt., 5e; oz., 10e; 4-lb., 30e; 1 lb., \$1.00.

LETTUCE

Ger.-Gartensalat.

Scand.—Salat.

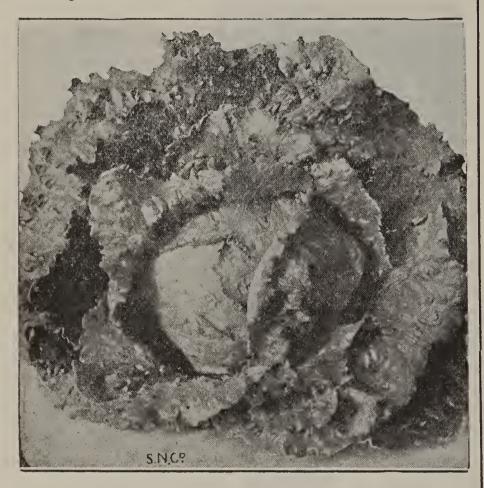

EVERY GARDEN CAN GROW THIS FINEST OF HEALTH FOODS

(1/4-ounce to 100 feet of drill - 3 pounds to the acre)

Heading Varieties

Varieties which head should be started early and pricked out in the frame to get room and root system. As soon as the ground is mellow, set in open and encourage rapid growth by liberal feeding (nitrate of soda) and cultivation. Sow common sorts for a succession.

All varieties of Lettuce are also excellent for sowing in the home garden. Sow out of doors early in the Spring or in late Summer. Lettuce develops best during cool weather.

Lettuce—New York

New York Head—Also Called "Los Angeles" and "Wonderful"—A popular variety for Summer planting. The heads are solid, 2 to 3 lbs. each. Creamy white with dark green outer leaves; tender, crisp and sweet, is a hardy, rapid grower, days rooted and resistant to drought; a slow deep rooted and resistant to drought; a slow seeder and sure to head. Matures in 65 days. Does remarkably well in all sections. Pkt., 10c; oz., 25c; ¼-lb., 75c; 1 lb., \$1.85.

Creamy Heart—Is a new variety very similar to the California Cream Butter, without brown spots or edges; nice large heads of a rich golden yellow inside but with bright green leaves; an excellent variety for late Spring and early Summer crop; easy to grow and a good shipping variety. Pkt., 10c; oz., 20c; ¼-lb., 65c; 1 lb., \$1.75.

New York No. 12-This improved strain has been bred for earliness, larger size, increased solidity. and dependability of heading. The tightly folded heart is well blanched to a beautiful silvery white. Crisp, juicy, and sweet. Pkt., 10c; oz., 25c; ¼-lb., 70c; 1 lb., \$2.25.

Salamander or Black Seeded Tennisball—The most popular variety for withstanding the hot weather. The golden yellow heart is protected by crumpled outer leaves of medium green color and forming a close sure head; very solid, of medium size and excellent quality. 85 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

California Cream Butter or Royal Cabbage—Produces a large solid head and withstands most adverse weather. The leaves dark green, tinged with brown and spotted. The interior of head is rich golden yellow and quality very fine. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

Iceberg—Is very crisp and withstands the heat remarkably well and very slow to shoot to seed. The head is extremely hard, the leaves tightly overlapping each other. The color is light green, excepting for the faint brown tinge along the extreme border. The quality is good, crisp and firm; very sweet. 75 days. Pkt., 10c; oz., 20c; 1/4-lb., 50c; 1 lb., \$1.50.

Early May King—It grows very quickly even in the cold weather. Very compact; in fact, the plant is about all head. Outer leaves light green, inner leaves bright yellow and of a fine, rich, buttery flavor. Heads weigh from 12 to 16 ounces and are solid. 50 days. Pkt., 10c; oz., 20c; 1/4-lb., 50c; 1 lb., \$1.50.

Improved Hanson—This is the earliest maturing of the Crisp-Head Lettuce. Grows into a quite broad, slightly flattened head of a beautiful light green color. It is excellent for midsummer planting and can be depended upon to head well. Of the highest quality—crisp, mild, tender, juicy, and well blanched. 50 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

Big Boston—Very popular. Especially valuable for Summer and Fall use out-of-doors, and for hotbed and cold frame culture. Glossy, plain edged leaves tinged brown, forms a firm, well folded head, buttery-yellow at the heart and of excellent quality. 75 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25.

Paris White Cos — Trianon, or White Paris Self-Blanching—Distinct variety of upright growth; leaves should be tied together near top when they will blanch to a beautiful creamy-white; crips and delicious as Celery stalks, and eaten in the same manner. 65 days. Pkt., 5c; oz., 15c; ½-lb., 40c; 1 lb., \$1.25.

Loose Leaved Varieties

Loose Leaf seed, sown in rich soil in cold frame in March, can be cut (just above the center bud) in 45 to 60 days and will grow new leaves or can be moved to the open ground later at 8 to 12 inches in the row.

Lettuce—Grand Rapids

Grand Rapids-A popular variety for general planting and will make a quick growth under adverse conditions. Its upright habit permits close planting. 40 days. Pkt., 5c; oz., 20c; 1/4-lb., 45c; 1 lb.,

Early Curled Simpson or Silesia—(White Seeded)—A very extensively used early loose leaved variety. The leaves are light green in color, slightly frilled, crisp, sweet and tender. Adapted for sowing thickly and cutting when the plants are young. Does not wilt easily. 40 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.35.

Early Prize Head — This Lettuce forms a large, tender, crisp, loose head of bright green crimped leaves tinged with brownish red; of superior flavor, long remaining sweet and slow to run to seed. 50 days. Pkt., 5c; oz., 15c; 1/4-lb., 40c; 1 lb., \$1.25.

Semesan

Place a little Semesan with seeds in a jar and shake vigorously; bacteria and fungus adhering to the seeds will be killed. 20zs., 50c; 1 lb., \$2.50.

GROW EARLY VARIETIES AND HAVE PLENTY OF LETTUCE ALL SUMMER AND FALL

MUSKMELONS

Ger.-Melone.

Scand.—Melon.

(One ounce will plant about 50 hills-2 to 3 pounds in hills per acre)

Culture—A rich, deep, sandy loam, well worked and highly manured with old rotten compost, is of the first importance. Plant when all danger of frost is over, in hills 5 to 6 feet apart each way; scatter a dozen seeds to a hill and thin to 3 or 4 plants. When they have 4 or 5 rough leaves pinch off the end of the main shoot, which will cause the lateral branches to put forth fruit sooner.

Green Fleshed Varieties

Extra Early Hackensack — Fruit round, heavily ribbed; skin is light green, of delicious flavor, rich and sugary, and exceedingly productive. The earliest of all large netted melons. 70 days. Pkt., 5e; oz., 15e; ¼-lb., 35e; 1 lb., \$1.00.

Rockyford or Netted Gem-The flesh is green and so sweet that it may be eaten close to the rind. The Melons weigh about 1½ pounds each. The vigorous vines produce an abundance of slightly oval fruits. 80 days. Pkt., 5c; oz., 15c; 1/4-lb., 35c; 1 lb., \$1.00.

Early Nutmeg or Montreal—Valuable on account of its extreme earliness, hardiness and productiveness. The skin is green, becoming yellowish at maturity. The flesh is light green, very thick and of delicious flavor. 65 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Honey Dew-The sweetest Melon of all. The skin is smooth, of creamy yellow color when ripe. The flesh is very thick, of a bright emerald green, very fine grained, of very sweet, sugary flavor, and can be eaten to the rind. 125 days. Pkt., 10c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.10.

Salmon Tinted Varieties

netting; flesh very thick, salmon color, shading into green as it nears the rind. Perfecto has the deepest flesh and more salmon-colored flesh than any other Melon. Recommended for its hardiness, prolificness, deep flesh and excellent eating qualities. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.25. Edward's Perfecto-Fruit nearly round with gray

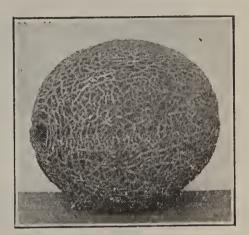

Gold Lined Rockyford—This variety is one of the largest of the Rockyford type. It is very prolific, of uniform size, very thick flesh, of a rich golden yellow next to the seed cavity, fruit very thickly netted. Very fine in every respect. 70 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.25.

MUSKMELON COLLECTION This collection contains one packet each Hale's Best, Barling's Montana, Edward's Perfecto, Rockyford Value 35c; postpaid for 25c

Orange or Yellow Fleshed Varieties

Emerald Gem—Is one of the earliest to ripen and of most delicious flavor. Unequalled for home use. Very prolific. The skin is smooth and free from netting. The fruits are heavily ribbed. Flesh very thick; small seed cavity. 85 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Hale's Best (The Earliest Maturing of All Muskmelons)

Salmon Fleshed Varieties

Hale's Best, Extra Early—This new variety has become popular because of its extreme earliness. 68 days, tests made in sections, where the season was remarkable for its coldness. It is a salmon flesh Melon of exceptional thickness. The shape is oval. Average size is $8x4\frac{1}{2}$ inches with very heavy netting and fairly prominent ribs; very valuable, as it leads the list in earliness. Pkt., 10c; oz., 20c; ¼-lb., 50c; 1 lb., \$1.50.

Barling's Montana—Ideal in size for family use, oval shape, flesh salmon-pink, thick fleshed, with small seed cavity; originated in Montana and matures with the earliest. Pkt., 10c; oz., 25c; 1/4-lb., 75c; 1 lb., \$2.00.

Osage or Miller's Cream-A favorite salmon flesh variety. Large, oval, slightly ribbed and netted; skin is very dark green. Flesh is very thick and sweet, flavored most deliciously to the rind. The fruit is extra heavy. A great favorite for market and the home garden. 80 days. Pkt., 5c oz., 15c; ¼-lb., 35c; 1 lb., \$1.00.

Of all Vegetable Fruits, the Melons are the most delicious. Be sure to plant some Melons in your

WATERMELONS

(One ounce for 30 hills—4 to 5 pounds to an acre) Ger.—Wassermelone.

Scand.—Vandmelon.

The hills should be dug about 2 feet square, 8 inches deep and half filled with well-rotted fertilizer, which must be thoroughly mixed with the soil. Plant in May, 10 seeds to a hill, and when the plants are well up, thin out to three, and pinch the ends of the growing shoots to induce early fruiting. Some of the sweetest and best Melons we have seen were produced in the latitude of 45 degrees north; consequently, while the Watermelon is a tropical fruit, yet our Northern friends can grow them successfully.

Cole's Early—This is a fine variety for the family and market and is particularly adapted, on account of its earliness to Northern latitudes. For early marketing it is superior. The bright red flesh is cool— crisp and produced in generous numbers. 80 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 85c.

Fordhook Early—One of the earliest large-fruited Melons. Fruits are of good size. Skin dark green, with faint stripes of lighter green. Rind quite thin, but skin tough, making an excellent shipping variety. Flesh bright red, crisp, sweet, and of splendid quality. Does exceptionally well in the Northern States. White seed. 80 days. Pkt., 5c; oz., 10c; ¼-lb., 30c; 1 lb., 85c.

Kleckley Sweet or Monte Cristo—This is a very popular Watermelon. ark green skin, thin rind; flesh bright scarlet; solid, very sweet and crisp; not a good shipper for long distance. The fruits are oblong and uniform in size. Average weight, 25 lbs. 100 days. Pkt., 5c; oz., 10c; 4-lb., 30c; 1 lb., \$1.00.

Stone Mountain-This Melon is medium dark green, round and of excellent quality. The flesh is beautiful deep crimson, very solid, with few seeds. The rind is tough enough to stand long-distance shipping. We have found this somewhat earlier than other large varieties. It produces an abundant crop. Pkt., 10c; oz., 15c; ¼-lb., 35c; 1 lb.,

Harris Earliest— Owing to its extreme earliness it is extensively grown in the Northern States where it is a fa-We have vorite. known this Melon to mature as far north as Canada. It is the Waterearliest melon on the market and the sweetest. These are sweeping

Harris Earliest statements, but they are true. 70 days. Pkt., 5c; oz., 15c; 4-lb., 35c: 1 lb., \$1.00.

Phinney's Early—One of the best early maturing Melons of medium size, oblong shape. The red flesh is very sweet and tender; a sure cropper. Does exceptionally well in the Northern States. 80 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 90c.

Citron—For Preserves

Citron-Red Seeded-A small round Melon used for making preserves. 100 days. Pkt., 5c; oz., 10c; 1/4-lb., 30e; 1 lb., 90e.

Citron-Green Seeded-Same as above with green seeds. Pkt., 5c; oz., 10c; 1/4-lb., 30c; 1 lb., 90c.

S. N. & S. Co's. Peerless Onion Seed

(One ounce for 100 fect of drill; 4 to 5 pounds in drills per acre)

Sow in rich soil in drills one foot apart as early as possible in the Spring. Cover with fine soil and firm well. When plants are strong enough thin out to 3 or 4 inches. The largest Onions are produced by sowing the seed in a hotbed early in January or February and transplanting seedlings to the open ground 6 inches apart. When the bulbs have reached maturity bend the top down to hasten ripening.

Onion-Mountain Red Globe

Red Varieties

Mountain Red Globe-Grown at a very high altitude, where the seasons are short and where an ordinary strain of Southport Red Globe will not mature. It has a good globe shape, is dark red, ripens evenly, has a small neck, keeps well and ships well. It is a good mate for Mountain Danvers, which means that it is a mighty good Onion. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; 1 lb., 2.50.

Red Wethersfield—A very large, deep red Onion that matures early and succeeds well everywhere. The bulbs are flattened, very large around, solid and of fine quality. A good keeper. One of the best red Onions for home use or market, where a globe-shaped Onion is not required. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; 1 lb., \$2.50.

Extra Early Red Flat—An extra early red Onion, which yields abundantly, keeps well and is of mild flavor. The bulbs are of medium size and rich red in color, very close grained, solid and heavy. This variety will form bulbs in cold soils where others fail to ripen. 100 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; 1 lb., \$2.40.

Brown Skinned

Australian Brown—An early and very hardy variety. These Onions have been kept in perfect condition the year around. They are of medium size, somewhat flattened, and of a light reddish brown color. The flesh is always crisp, mild and juicy. They mature very early. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 65c; 1 lb., \$2.00.

White Varieties

Southport White Globe-A beautiful type of an almost round Onion, growing to an enormous size. The flesh when cooked is of a rich milky color, of tender and delicious flavor and in the raw state it is one of the mildest. 120 days. Pkt., 5c; 1/2oz., 20c; oz., 30c; ¼-lb., \$1.00; 1 lb., \$3.50.

White Portugal or Silver Skin—The most widely used white Onion. It might be called an allpurpose variety, as it is excellent for sets, as a pickler, for green bunching, and for storage. Bulbs medium sized, thick, flat, clear white, hard, fine grained, and of pleasing flavor. It is a dependable cropper. Pkt., 5c; ½-oz., 15c; oz., 25c; ½-lb., 90c; 1 lb., \$3.00.

White Pickling-For early bunching, picking, etc. Small, hard, round; keeps well, does not turn green when exposed to sun. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 90c; 1 lb., \$3.00.

Long White Bunching—This variety does not form bulbs and it is grown exclusively for green onions. Sow the seed thickly in rows and earth up gradually to blanch the stalks as far up as possible. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 90c; lb., \$3.00.

Yellow Varieties

Onion is extensively sown by the private and market gardener on account of its keeping qualities. A dark straw color and produces a good crop. Large size. Pkt., 5c; ½-oz., 20c; oz., 30c; ¼-lb., 90c; 1 lb., \$3.25. Yellow Globe Danvers-This almost round-shaped

Mountain Danvers (Yellow)—(Special Strain)—A very early maturing strain. The Onions are fine globe shaped, deep yellow color and very firm. They ripen two or three weeks earlier than Yellow Globe Danvers. These Onions have remarkable keeping qualities and can be safely stored all Winter. Pkt., 10c; ½-oz., 20c; oz., 25c; ½-lb., 75c; 1 lb., \$2.65.

Prizetaker or Mammoth Yellow Spanish—Large yellow globe Onion. Excellent keeper of finest flavor, handsome shape and enormous size; many single Onions weigh 3 pounds and over. It is of the same type as those immense imported Onions commanding a high price. 130 days. Pkt., 5c; ½-oz., 15c; oz., 25c; ¼-lb., 75c; 1 lb., \$2.50.

Sweet Spanish ("Special Riverside Strain")—This Spanish Onion grows very large and is perfectly globe shaped, light yellow skin and small top. The flesh is pure white, firm and crisp. A great favorite because of its size and quality. Ships well. Not intended for Winter storage. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 85c; 1 lb., \$2.75.

Yellow Bermuda—The most widely grown of all Bermuda Onions, with straw-yellow skin and pure white flesh. Pkt., 10c; ½-oz., 15c; oz., 25c; ¼-lb., 90c; 1 lb., \$3.25.

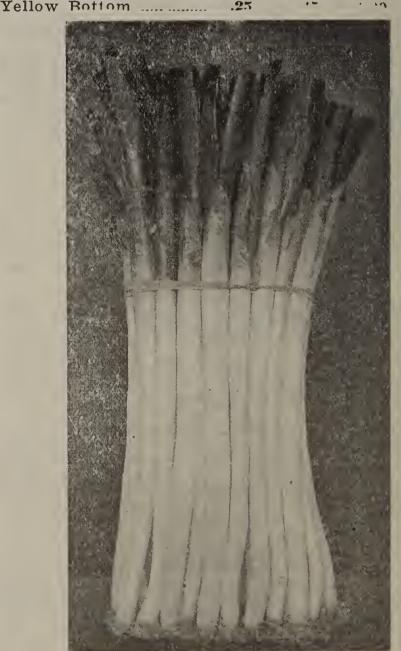

Onion Sets

(One pound to 75 feet of row—300 pounds to acre)

If the sets are set out early in the Spring, nice green Onions can be pulled in a few weeks. A little later the bulbs grow large and are then ready to use. Plant about 2 inches apart and covered an inch deep. A pound equals about one quart.

Please write for quotations on larger quantitles. Postpaid Prices 2 lbs. Lb. 5 lbs. 10 lbs. \$.65 \$1.50 \$2.75 White Bottom\$.35 By Express or Freight 5 lbs. F. O. B. Helena 2 lbs. 10 lbs. White Bottom\$.30 \$.55 \$1.25

1.75

Onion-Long White Bunching

Mustard

(4-oz. to 100 feet of row-2 to 3 lbs. to the acre) White or Yellow—The green leaves are used as a salad when a few inches high. If sown in a warm place or in a hotbed, will be ready to cut in a few days; sow frequently for a succession of crops. Pkt., 5c; oz., 10c; 1/4-lb., 25c; 1 lb., 65c.

Giant Southern Curled — Large variety, forming great mass of beautiful leaves, ruffled and finely curled on edges; used for salad. Hardy, vigorous, and highly recommended. 35 days. Pkt., 5c; oz., 15c; 4-lb., 30c; 1 lb., 75c.

> Mushroom Spawn Grow Your Own Mushrooms

Practically no capital is required in the mushroom business, and the profits are most satisfactory. All that is required to grow mushrooms is almost any building or cellar, some manure, loam, and last and above all, good spawn. Our Pure Culture Mushroom Spawn is full of vigor, the kind used by the best com-mercial growers of the United

States. One brick to ten square feet. Leaflet-"How to Grow Mushrooms"-free for asking.

American Grown Pure Spawn—Per brick, 40c; 5 bricks, \$1.75, postpaid. By express or freight, per brick, 35c; 10 bricks, \$3.00; 25 bricks, \$6.75.

Okra or Gumbo

(One ounce to 100 feet of drill-8 pounds to acre) The long tender pods of Okra are very delicious when sliced and cooked in soups. While this is the chief use, it is also boiled and served like other vegetables. The dwarf sorts may be planted in hills or in rows about three feet apart. Plant in any good soil about May 15. The pods should be gathered when very young, as they are then very tender.

Dwarf Green-An early dwarf prolific variety with thick green pods. 65 days. Pkt., 5c; oz., 10c; 1/4-lb., 25c; 1 lb., 85c.

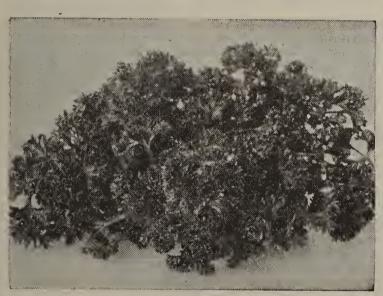

White Velvet—Very tender pods, long, smooth and white. 60 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 85c.

Parsley

Ger.—Petersillie.

Scand.—Persilie.

(One ounce for 150 feet of drill)

Parsley-Moss Curled

Parsley succeeds best in rich, mellow soil. As the seed germinates very slowly, it should be sown quite early in the Spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart and half an inch does in rows a foot apart and half an inch deep.

Moss Curled-There is no more attractive variety than this when well grown; it is hardy and slow to run to seed; every gardener's favorite. days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., 95c.

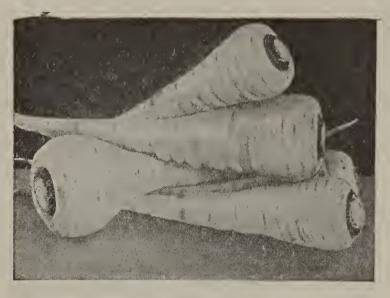

Extra Double Curled-In shape of leaf, color and taste this new variety is perfect. It stands heat, drought and cold better and will yield better than any other of the numerous varieties of Parsley we have ever had. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 40c; 1 lb., 95c.

Hamburg or Turnip Rooted—Turnip rooted variety. The roots as well as the leaves are used for flavoring soups, etc. The roots are stored like Carrots for Winter Use. 100 days. Pkt., 5c; oz., 15c; ¼-lb., 45c; 1 lb., \$1.15.

Parsnip

Ger.—Pastinake. Scand.—Pastinak. (One ounce for 200 feet of drill-5 to 6 pounds in drills per acre)

Sow in the Spring when weather permits, in drills 15 inches apart, covering half an inch deep. It is usual to take up in the Fall a certain quantity for Winter use, leaving the rest in the ground till Spring to be dug up as required.

Parsnip—Hollow Crown or Guernsey

Hollow Crown or Guernsey—An excellent variety for the table. The roots are long with white skin, uniform in shape, tender and of the best quality. This variety is easily distinguished by leaves growing from the depression on top of crown or root. 85 days. ..Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 75c.

Long White or White Dutch Sugar—This variety of Parsnip is very hardy and will keep well through the Winter without protection. The roots are long, white, smooth, tender and of most excellent flavor. 100 days, Pkt., 5c; oz., 10c; 1/4lb., 25e; 1 lb., 75e.

Peppers

Ger.—Pfeffer.

Scand.—Spankspebr.

(One ounce will produce 1,000 to 1,200 plants)

Peppers are growing in popularity among cooking experts for seasoning pickles, sauces and various dishes. Plant seed ¼-inch deep in a hotbed, and frame or how in the house get in news obed, cold frame or box in the house, set in rows about 1¼ feet apart each way in the garden.

Large Bell

Large Bell or Bull Nose-Flesh thick, hard and less pungent than most other varieties; excellent quality for use in salads or for stuffed Peppers. Sometimes three to four inches in length. days. Pkt., 10c; 1/2-oz., 25c; oz., 40c; ¼-lb., \$1.15.

Harris' Earliest-The earliest Pepper in cultivation and therefore adapted for the North, as it matures before danger of

frost; of dwarf, compact growth; about 18 inches tall, bearing a wonderful crop of scarlet fruits of good marketable size; 3½ inches long and 2½ inches thick. The flesh is thick, Blet 100: ways mild; matures in 125 days. Pkt., 10c; 1/2oz., 30c; oz., 50c; ¼-lb., \$1.65.

Cayenne Long Red-Pods are small, cone-shaped and red, hot and pungent; used for pickling. 130 days. Pkt., 10e; ½-oz., 20e; oz., 35e; ¼-lb., \$1.20.

Pimiento — The Mildest Flavored of All Peppers-Its productiveness makes it desirable for market gardeners as it yields heavy crops. Its smooth, thick flesh and uniform shape make it an excellent shipper. Should be planted in every garden where a delicious sweet-flavored Pepper is wanted, both for salad and for stuffing. 135 days. Pkt., 10c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.25.

California Wonder-Stocky upright plants laden with large, broad, deep green Peppers which turn to a bright crimson when ripe. The fruits are 4½ inches long and 3½ to 4 inches thick. The flesh is firm, thick, sweet, and of most agreeable mild flavor. It is a splendid large variety, which has proved valuable to both market growers and home gardeners. Pkt., 10c; 1/2-oz., 35c; oz., 55c; 1/4-lb., \$1.70.

MUSHROOMS ARE EASY TO RAISE—OUR SEEDS MAKE BETTER GARDENS

Ger.—Erbsen.

PEAS

Scand.—Dan.-Nor.

(1 pound to 100 feet of drill-80 to 100 pounds to the acre)

NOTICE-If ordered alone add for mailing, 8c per 1/2-pound, 10c per pound, and 15c per 2 pounds.

Peas are quite hardy and for early crop sow as soon as the ground can be worked. Then sow in succession every two weeks until the first of August. They require moderately rich soil but not excessively rich or wet, or they will run too much to vine and will not bear heavily. The varieties can be planted in rows 12 to 18 inches apart, and the tall varieties 3 feet apart. The tall varieties should be staked by brush or tied up. By using the various classes of Peas and making several sowings of each, good Peas can be had for a long season. The pods should be kept picked; the plants will then continue to bear longer. For late sowing, use Early Dwarf varieties.

YOUR OWN GROWN PEAS ARE THE SWEETEST

Extra Early Round Seeded Varieties

Alaska or Earliest of All

Alaska or Earliest of All—The earliest Pea on the market, height 2½ feet. It produces a large crop of well filled medium size pods completely filled with small round Peas. 45 days. Pkt., 5c; ½-lb., 20c; 1 lb., 30c; 2 lbs., 55c; 5 lbs., \$1.20.

Extra Early Dwarf Wrinkled Varieties

Carter's Daisy or Early Dwarf Telephone — The vines grow about 18 inches in height. They are strong and always bear a good crop. The pods measure from 4 to 5 inches and contain 7 to 8 large light green Peas, a favorite garden and market variety. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.30.

Little Marvel—A productive, wrinkled, seeded variety, growing about 18 inches tall; pods average 2½ inches in length. They are well filled with 6 or 7 large Peas of exceptionally fine quality. 60 days. Pkt. 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65a: 5 lbs. \$1.25 65c; 5 lbs., \$1.35.

Extra Early Dwarf Wrinkled Varieties

Peas-Laxton's Progress

Laxton's Progress—A new Peas and one of the best of the large podded, early, wrinkled sorts. Planted same time as Laxtonian, it is ready to pick a week earlier. The pods are 4 inches long and are filled with 7 or 8 large Peas of fine quality; height 18 inches. 60 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35.

Little Gem—An early dwarf variety; height 12 to 15 inches. The pods measure 2½ to 3 inches long and are well filled with large Peas of a delicious flavor. 60 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35.

American Wonder—A fine, extra early wrinkled variety, well suited for the private garden and quite productive. The flavor and quality are excellent and its dwarf habit makes it a desirable sort; height 12 inches. 55 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35.

Inoculate Peas For Good Yield

Peas, Beans and Sweet Peas belong to the Legume family - plants that bear their seed in a pod. All legumes form a partnership at the roots with bacteria that are able to secrete nitrogen and give it to the plant. They form on the roots in colonies looking like lumps, called nodules. To stimulate these germs it is necessary, to "inoculate" the seed. All agricultural authorities advise inoculation of legumes.

PEAS

Scand.—Dan-Nor.

(1 pound to 100 feet of drill-80 to 100 pounds to the acre)

NOTICE—If ordered alone add for mailing, 8c per 1/2-pound, 10c per pound, and 15c per 2 pounds.

Early Wrinkled Varieties

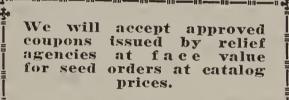

Gradus or Prosperity—Extra early wrinkled Pea. This remarkable Pea is not only large and of the best quality, but is within two or three days as early as the small round extra early sorts. Gradus is a wrinkled Pea, growing about 30 inches high; the holds are of a bright grown color measuring inches high; the bods are of a bright green color measuring 4 inches with luscious Peas, 8 or 9 in a pod. The Peas are of the highest table quality. A grand Pea in all respects. 60 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35.

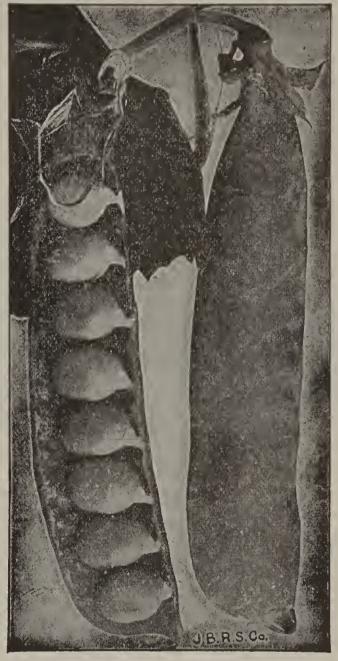

Laxtonian—The largest podded of the early dwarf wrinkled varieties. Has no superior for either quality or productiveness. Ready to use within a very days of the very earliest types. Height about 18 inches. The pods, four inches or more long, slightly curved, contain eight to ten wrinkled luscious Peas of finest flavor. Almost double the size of any other early dwarf wrinkled Pea. Vines are vigorous, foliage dark green, which enable it to resist the extreme conditions to which Peas are subjected in many sections of the United States. A good Pea for the market grower or the home garden. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35. 5 lbs., \$1.35.

Main Crop Varieties

Dwarf Champion—A desirable main crop sort for the market or home garden. The vines are of a medium height, about two and one-half feet; stout, vigorous and hardy, and are unusually productive. The pods are large, often four inches long, broad, quite straight, deep green in color, handsome and very well filled with large Peas which are tender and unsurpassed in quality. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; in quality. 5 lbs., \$1.35.

Telephone-Tall-Medium late. This fine Pea is vigorous growing, about four feet high, and producing an abundance of large pods and filled with immense Peas, which are tender, sweet, and of excellent flavor. It has sterling merit, which gardeners appreciate. 75 days. Pkt., 5c; ½-lb., 25c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.35.

Pea-Laxtonian

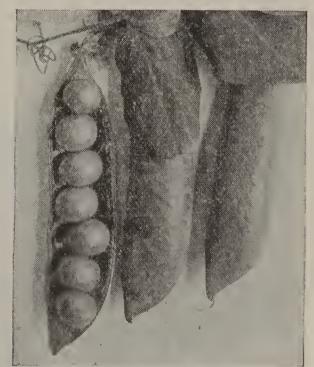

Roosevelt—This splendid Pea is of the same podded type as the Telephone but the pods are larger and the Peas sweeter. The Roosvelt Pea surpasses all other large-podded varieties in productiveness. In other words a pint of Roosevelt Pea pods will yield as many shelled as a quart of most other sorts. Quality is always to be preferred to quantity, but a Pea which will give better quality and larger quantity is the Pea to plant—that Pea is the Roosevelt. A very popular variety. Height, 3 feet. 65 days. Pkt., 5c; ½-lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50.

Melting Sugar—(edible pods). We consider this the best of the edible podded sorts, in which the pods are used when half grown and are cooked in the same way as snap beans. The pods of Melting Sugar are very large, four to five and a half inches long, very tender and finely flavored. Very prolific, strong growing; about four or five feet high, with large, light-colored foliage. 85 days. Pkt., 10c; ½-lb., 25c; 1 lb., 45c; 2 lbs., 75c.

Large White Marrowfat—The vines of this tall variety are about 4 feet high and of strong growth. pods are large, about three inches long. Seed large, smooth, round and light creamy yellow. It is desirable for Summer use but is not as sweet and tender as most sorts, although undoubtedly one of the most productive. Grow this variety for your supply of dried Peas for Winter use. Pkt., 5c; ½-lb., 15c; 1 lb., 25c; 2 lbs., 40c; 5 lbs.,

S. N. & S. Co's. Peerless Radishes "SERVE RADISHES THE SEASON THROUGH"

(1 oz. will sow 100 ft. of drill—8 to 10 lbs. per acre)

Being a root crop, good brittle Radishes require light, well-worked soil, made very rich and mellow to insure quick growth. If permitted to grow slowly, they become tought and pithy. They are easy to grow and frequent planting will insure a constant supply for the table. Thin the very young plants somewhat. Summer varieties can be sown all Spring and well into Summer. Winter varieties, however require some time to mature; plant in June or July.

Early Round Varieties

Early Scarlet Turnip, White tipped—A splendid early Radish; very attractive appearance: its white tip and deep scarlet are always pleasing to the eye. Very tender and of good flavor. 25 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1 lb., 85c.

Extra Early Saxa—The earliest of all Radishes and slow to run to seed. We recommend it for the first planting in the garden, and also for forcing in hotbed and greenhouse. Round, and greenhouse. Round, bright scarlet, with the smallest possible tops. Exceptionally crisp and tender and of fine flavor. 20 days. Pkt., 10c; oz., 15c; ¼-lb., 40c; 1 lb., \$1.15.

Early Scarlet Turnip—A wellknown Radish for early home and market use. Matures quickly; crisp and of good flavor. 25 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1 lb.,

Carco

Vegetable Spray Controls Radish Maggots, Etc. Crimson Giant Globe Crimson Giant Globe -- Early globe-shaped and grows to an unusually large size; is always tender and of mild flavor. It remains in perfect condition a remarkably long time and, unlike other forcing varieties, does not become pithy even when twice their size in diameter. 32 days.

Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., 85c. Early White Turnip—A very quick-growing, small, turnip-shaped variety. Color, clear white; very mild flavor. 35 days. Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., S5c.

Early Scarlet Globe—One of the earliest; flavor mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy. 25 days. Pkt., 5c; oz., 15c; ½-lb., 30c; 1 lb., 85c.

French Breakfast or Half Long — Medium size, olive-shaped Radish; small top, scarlet except at the tip, which is white; a splendid table variety for either forcing or outdoor culture. Makes rapid growth. A great favorite. 30 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1 lb., 85c.

Be sure to sow Spring Radishes at 10-day intervals from early spring until May 15 and again in August to have a regular supply for your table. To enable you to do so we recommend the following: French Breakfast, Early Scarlet Turnip, and White Icicle.

Radish—Early Scarlet Turnip

Summer Radishes—Long Varieties

Grow larger than early varieties and remain in good condition longer.

White Icicle—The finest of all long white radish. Grows about six inches long, are of transparent whiteness and make their growth very quickly. It is of excellent flavor, mild, crisp and tender. Valuable for home use and market gardeners. 30 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., 85c.

White Strasburg—The skin and flesh are white and agreeably mild, being crisp and refreshing; keeps crisp and tender a long time. 40 days. Pkt., 5c; oz., 15c; 4-lb., 30c; 1 lb., 85c.

Radish—Icicle

Long Scarlet Short Top—This bright scarlet short topped sort is about 5 inches long; is uniformly straight and smooth, crisp and brittle; an excellent variety for private gardens or market. 35 days. Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., 85c.

Winter Varieties

Make your first planting the middle of June, a second the middle of July. Sow thinly in rows 15 inches apart between the rows, and thin out to 6 inches apart in the row; firm and well-drained soil is essential. Winter Radishes are easily stored in any frost-proof cellar in damp sand.

China Rose—One of the best Fall and Winter varieties; firm, white flesh. 60 days. Pkt., 5c; oz., 15c; ¼-lz., 30c; 1 lb., 85c.

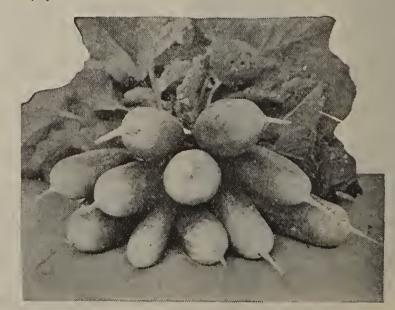

Mammoth White China or Celestial—Flesh solid and brittle; pure white; flavor mild or slightly pungent. A splendid keeper for Winter use. 70 days. Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., 85c.

Long Black Spanish—The latest and hardiest of all the Winter Radishes; roots black, long, large and good keeper; pull before severe frost and store in damp sand in root house. 70 days. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1 lb., 85c.

Round Black Spanish—A round form of above. 60 days. Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., 85c.

Sakurajima or Mammoth Japan-A mammoth variety, and is said to be the largest variety that is obtainable in Japan. Very tender, and round Pkt., 10c; oz., 20c; 1/4-lb., 60c; 1 lb., \$1.75.

Nerima or Mikado-A wonderful product of the Orient, with snow-white flesh; very tender and under good conditions growing from two to three feet in length. Pkt., 10c; oz., 20c; 4-lb., 60c; 1 lb., \$1.75.

Radish-French Breakfast

Pumpkins

Ger.-Melonen-Kaubis. Scand.-Gracseker. (One ounce for 25 hills-3 pounds to the acre)

Culture-The common practice is to drop two or three seeds in every third or fourth hill in the corn field, but if cultivated on a large scale, the seed may be sown in hills 8 feet apart each way, four plants to each hill.

Pumpkin-Early Small Sugar or Pie

Early Small Sugar or Pie—For pies this cannot be excelled; fruits round and small, with deep yellow skin, plainly ribbed. Flesh sweet and fine grained. 70 days. Pkt., 5c; oz., 15c; 4-lb., 30c; 1 lb., 85c.

Japanese Pie — A Large, Dark Green Crookneck Sort—The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Of medium size. early, very productive and a good keeper. Highly desirable for pies. Ripens in 70 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; 1 lb., \$1.25.

Large Cheese or Kentucky Field—A large, round, flattened Pumpkin with broad ribs; the skin is of rich cream color, flesh yellow, tender and of excellent quality. Extra fine quality for family and market use; fine for pies and rich food for stock. 90 days. Pkt., 5c; oz., 10c; 1/4-lb., 25c; 1

"Jumbo" or "King of Mammoth"—Fruits grow to enormous size. Salmon-orange skin; very thick, bright yellow flesh, which is fine grained and of excellent quality for pies. 90 days. Pkt., 5c; oz., 20c; ¼-lb., 50c; 1 lb., \$1.50.

Winter Queen or Winter Luxury - Medium size, nearly round; skin a beautiful deep orange-yellow, finely netted. Very productive, sweet, tender, and an excellent keeper. 80 days. Pkt., 5c; oz., 20c; ¼-lb., 45c; 1 lb., \$1.25.

Pumpkin—Connecticut Field

Connecticut Field -The Best Yellow Field Sort-Also known as Big Tom. A large round or slightly oval shaped Pumpkin. Skin reddish orange color, with rich or ange yellow flesh. Extensively grown for stock feeding, and generally planted with corn, producing enormous crops in 90 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 70c.

Tobacco

Grow Your Own Smoking Tobacco

...Cultural Directions—The plants should be started in a hotbed, or in pots or boxes in the house, and transplanted outdoors, three feet apart each way, when danger of frost is past. 1 ounce per acre.

Connecticut Sced Leaf—The hardiest variety in cultivation. Pkt., 10c; ½-oz., 30c; oz., 50c.

New Guinea Butter Bean

One of the Most Delicious of All Vegetables

The New Guinea Butter Bean is a wonderful vegetable. Grows to enormous size, one fruit often weighing 15 lbs., and from 3 to 5 feet long. In growth it is similar to the squash, and can be grown in the same manner or can be trellised up. It is more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and stand more neglect and abuse than any other vegetable vine we know of. The fruits should be eaten when small, while the fuzzy small, while the fuzzy growth is yet on. It can be cooked like squash and fried like egg plant. When cut up in small pieces and cooked with cream or fried it is most delicious. If trellised up the vines take up so little space, no garden is tle space, no garden is too small for at least two or three plants. Pkt., 10c; 3 pkts., 25c; oz., 50c.

New Guinea Butter Bean

Rhubarb

Scand.—Rhababer. Ger.-Rhababer. (One ounce to 125 feet of drill—1 pound to acre)

Seed should be sown early in the Spring in shallow drills 1 foot apart; thin out to stand 4 to 5 inches apart in the row. The following Spring the roots should be transplanted into permanent beds and placed 3 feet apart each way; the year following that or two years after sowing the seed lowing that, or two years after sowing the seed, the Rhubarb may be used. Do not cut Rhubarb; pull it so that it comes out whole from the crown.

For forcing, take up some of the larger roots and plant in a dark corner of the cellar. Cultivate Rhubarb frequently, even after the cutting season is over, and top-dress with fertilized in the Fall at least every other year.

Victoria—A variety with large, dark red stalks with plenty of juice. The most popular variety. Pkt., 10c; oz., 20c; ¼-lb., 50c; 1 lb., \$1.50.

Salsify or Oyster Plant

Ger.—Hafer-Wurzel.

Scand.—Havrerod.

(One ounce will sow 100 feet of drill)

(8 pounds to the acre)

Culture—Sow the seed in light, deep soil early in Spring, in drills 12 inches apart and 1 inch deep, thinning out the young plants to 4 or 5 inches. roots can be stored like Carrots for winter use. Those remaining will suffer no injury by being left in the ground till Spring, but should be dug before growth starts.

Mammoth Sandwich Island—We consider this the largest and most profitable Salsify in cultivation; roots are two to three times the size of the ordinary Salsify, and of more agreeable flavor. It is pure white in color, and invaluable to market gardeners. 90 days. Pkt., 10c; oz., 20c; ¼-lb., 60c; 1 lb., \$2.00.

Salsify

Тореро

The Topepo is of excellent flavor, combining the delicious qualities of the pepper and the tomato. Topepo is a cross between tomato and pepper.

Its gorgeous color of vivid red makes a hand-some table decoration. The flavor resembles the Bell Pepper but it is sweeter, not so peppery and has the zest of the tomato flavor.

Excellent for stuffing and baking. Also used for slicing in salads or dressings. Wonderful keeping quality. Pkt., 15c; 5 pkts., 60c; 1/8-oz., \$1.10; $\frac{1}{4}$ -oz., \$2.00.

Squash

Ger.—Kurbiss. Seand.—Squash-Graeskar. (One ounce to 25 hills—3 to 4 pounds to the acre)

There are two distinct types. The Summer varieties are cultivated for the tender young fruits which are used in the green or growing stage during the Summer months. The Winter Squashes produce larger hard-shell fruits, which are gathered in the Fall before frost, and stored in a warm, dry place for Winter use. Be sure and leave part of the stem attached to the fruits.

Summer Varieties

Early White Bush-One of the best early maturing varieties. The fruit is a beautiful waxy white of superior quality, somewhat flattened, scalloped along the edge and of medium size. It has a lasting delicious sweetness. 55 days. Pkt., 5e; oz., 15c; ¼-lb., 35e; 1 lb., \$1.00.

Vegetable Marrow-The favorite English Long White sort. The fruit is very desirable in size, from 9 to 19 inches in length and 4 to 6 inches in diameter. Skin white, flesh white, and of rich flavor. Distinct from all other varieties of Squash. 65 days. Pkt., 10e; oz., 25e; 1/4-lb., 60e; 1 lb., \$2.00.

Early Summer Crookneck

Early Summer Crookneck - Very early medium sized, about 15 inches long and matures in 70 days. Flesh has a deep golden yellow color, is dry and of most agreeable flavor. Is the most highly esteemed of all Summer varieties. days. Pkt., 5e; oz., 15c; 4-lb., 35c; 1 lb., \$1.00.

Giant Summer Straightneck - The convenient straight shape of this squash makes it superior to the old crookneck. However, it has the warty, creamy-gold skin, the large size, the fine quality, and the earliness of the parent squash. Plants bushy, vigorous growing, and productive. days. Pkt., 10e; oz., 15c; 1/4-lb., 40e; 1 lb., \$1.35.

Squash-Improved Hubbard

Fall or Winter Varieties

Improved Hubbard-This old and popular favorite is still one of the very best Winter Squashes. Always richly flavored. Very productive. Of dark bluish green color, weighing often 10 to 25 lbs. each. Properly stored it may be kept from September to May. Pkt., 5c; oz., 15c; 1/4-lb., 45c; 1 lb., \$1.40.

Red or Golden Hubbard-Almost identical to the Warted Hubbard. The heavily warted skin is of a rich orange yellow, turning to a deep salmon red when ripened. Of attractive appearance and fine quality. Pkt., 5c; oz., 15c; 1/4-lb., 40c; 1 lb., \$1.25.

Delicious-This Fall and Wanter Squash is more delicious than the well known Hubbard. The color of skin is green; weighing from 5 to 10 lbs. The flesh is thick, bright yellow, fine grained and of splendid quality. It cannot be excelled. 110 days. Pkt., 5c; oz., 20c; 1/4-lb., 60c; 1 lb., \$1.50.

Warted Hubbard—It is similar in size and quality to the Hubbard. The large, dark, olive-green fruits are rather more heavily warted. Very handsome in appearance; an excellent keeper and of splendid quality. 110 days. Pkt., 5e; oz., 15c; 1/4-lb., 40c; 1 lb., \$1.25.

Table Queen-Sometimes called Des Moines, Acorn, Individual, and Danish Squash—Cut in half and baked for twenty minutes, it will give you a de-licious meal you will long remember, and fine for pies. The fruits are a nice size to handle, 6 to 7 inches long and 4 to 5 inches in diameter. The shell is hard and smooth, so that they keep well. The color is dark green, acorn shaped, makes an ideal individual Squash. Ripens in the Fall. Pkt., 10c; oz., 15c; 1/4-lb., 40c; 1 lb., \$1.25.

SCIENTISTS SAY SQUASH ABOUNDS IN VITAMINS - SQUASH ARE HEALTHFUL - GROW PLENTY

SPINACH

Ger.—Spinat.

Seand.—Spinat.

(One ounce for 100 feet of drill—10 to 12 pounds in drills for one acre)

Sow early in the Spring and make succession sowing every ten days until the end of May. For late Summer crop sow September 1st. No Spinach except the New Zealand will stand July and August heat without shooting to seed.

Round Thick Leaved—This variety grows quickly, has slightly wrinkled leaves of deep green color and good quality. The leaves are broad arrow-shaped but sometimes rounded. This is an extensively used medium early sort for the market and home garden. 45 days. Pkt., 5c; oz., 10c; 1/4-lb., 25c; 1 lb., 60c.

Long Standing-The best variety for family use, as it remains in good condition longer without running to seed than the round leaved sorts. Thick. Well-flavored leaves. 45 days. Pkt., 5c; oz., 10c; 1/4-lb., 25c; 1 lb., 60c.

Bloomsdale Sayoy Leaved-One of the best of the savoy leaved type, with thick, heavily curled leaves. Very succulent and tender. 40 days. Pkt., 5c; oz., 10e; 4-lb., 25e; 1 lb., 60c.

King of Denmark—This remarkable new Spinach is far superior to any of the other sorts. Its principal advantage is that it stands two weeks longer before running to seed than any other variety. The leaves are large, rounded. Savoy or crumpled of deep green color. Ready to cut in 48 days. Pkt., 5c; oz., 10c; 4-lb., 25c; 1 lb., 60c.

New Zealand — (The Hot Weather Spinach) — The stems and leaves of this variety are soft, thick, fleshy and crystalline in appearance. early in the Spring, the plants will resist heat and make strong growth during the Summer. 55 days. Pkt., 10c; oz., 15e; 4-lb., 30c; 1 lb., 75c.

Gcr.-Liebcsapfel

S. N. & S. Co's. TOMATOES

Scand.—Tomat

(One ounce will produce 2,000 to 3,000 plants)

Culture—Sow early in hotbeds, and as soon as they have four leaves transplant into shallow boxes. Harden off, and set out as soon as danger of frost is past.

Break O'Day-This new Tomato was developed by the U. S. Department of Agriculture. The beautiful scarlet fruits are of medium size, deep, solid, smooth and almost seedless, with very little foliage. Matures in about 80 days. From present indications it will be the most popular extra early Tomato. Pkt., 15c; ½-oz., 25c; oz., 40; ¼-lb.,

John Baer—This is a hardy and very prolific extra early variety. The fruits are of large size, scarlet in color, nearly round, smooth, firm and of excellent quality. One of the first varieties to ripen and continues to bear a long time. 85 days. Pkt., 10c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00; 1 lb., \$3.50.

Bonny Best—An extra fine early variety; a few days later than Earliana. The color is bright red; ripens evenly to the stem; very productive. 100 days. Pkt., 5c; ½-oz., 20c; oz., 35c; ¼-lb., \$1.00; 1 lb., \$3.50.

Earliana (Selected)—Plants are of compact growth. Yields well and fruit is solid and of fine quality; bright red, of good size. 90 days. Pkt., 5c; ¼-oz., 20c; oz., 30c; ¼-lb., 95c; 1 lb., \$3.25.

Marglobe—This fine second early produces large, smooth, meaty, globular red fruits, which ripen evenly, and are free from cracks. An extremely heavy cropper. Pkt., 10c; ½-oz., 25c; oz., 35c; ½-lb., \$1.00; 1 lb., \$3.50.

Golden Queen—Fruit of good size, smooth, solid and mild in flavor. Color, bright yellow; early and a prolific bearer. Many consider this yellow Tomato to be of a better flavor than the red varieties; it is less acid. 100 days. Pkt., 5c; ½-oz., 25c; oz., 40c; ¼-lb., \$1.20; 1 lb., \$3.50.

Small Fruited Varieties

(For Pickling, Preserving and Garnishing)

Pkt., 10c; ½-oz., 30c; Yellow Cherry oz., 50c; 1/4-lb., \$1.50 Yellow Plum Red Pcach Red Plum

Novelty

ASGROW SCARLET DAWN—(See Page 73)

Pritchard or Scarlet Topper—Large, smooth, and extremely solid. Of intense scarlet color. Most productive and very attractive. Of a solidity that is truly remarkable, with very small seed pockets and no core. Its productiveness, particularly on rich soil, is amazing, and individual plants will bear 70 to 80 fruits each. It will yield 15 tons and more per acre. Pkt., 10c; ½-oz., 30c; oz., 50c; 1/4-lb., \$1.50.

Tomato—Earliana

Winter Cherry, or Purple Husk Tomato—Makes fine sauce. Pkt., 10c; ½-oz., 40c; oz., 75c; ¼-lb.,

Ground Cherry, Strawberry, or Yellow Husk Tomato—The small yellow fruits are each inclosed in a husk. Pkt., 10c; ½-oz., 30c; oz., 45c; ¼-lb.,

TOMATO NOVELTIES—(See Page 4)

Turnips---Rutabagas

Ger.—Steckrube.

Scand.—Turnips.

(1 ounce will sow 150 ft. of drill—2 pounds to acre) Culture—For early use, sow as soon as the ground can be worked in Spring, in drills 15 inches apart, and thin to 8 inches apart as soon as plants are large enough to handle. The sowing should be made just before rain, if possible, a rapid growth being important.

White Milan—Extra Early—The clear white roots are very smooth, symmetrical and beautiful; Turnip for early bunching; fine grained, tender and sweet. 45 days. Pkt., 5c; oz., 10c; ¼-lb., 30c; 1 lb., 85c.

Early Snowball—A medium globe-shaped variety of pure white. Very solid and of the finest quality for table use. Pkt., 5c; oz., 15c; ¼-lb., 30c; 1 lb., 85c.

Purple Top White Globe-The most popular variety grown. Round, globe-shaped, with smooth, white skin; flesh pure white, firm and crisp. A good keeper and fine for market. 60 days. Pkt., 5c; oz., 15c; ¼-lb., 25c; 1 lb., 75c.

Purple Top Strap Leaf—A very popular variety. It is a quick grower, the flesh is pure white, very fine grained and sweet flavored. The roots are flat, marked with reddish purple on the upper portion. 55 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 65c.

Early White Egg-An old favorite, egg-shaped, perfectly smooth, firm and mild. 50 days. Pkt., 5c; oz., 15c; 1/4-lb., 30c; 1 lb., 70c.

Golden Ball—A rapid grower; yellow-fleshed; of medium size; firm, hard and of superior flavor. Valued highly as a table variety. 70 days. Pkt., 5c; oz., 15c; ¼-lb., 35c; 1 lb., 75c.

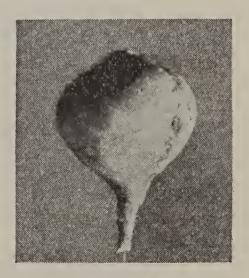

For feeding stock in Fall and Winter there is nothing superior to Turnips and Rutabagas, as they are liked by all kinds of stock and serve to keep them in good condition. Rutabaga—Winter Turnip

These require a longer season in which to grow than do other Turnips; the seed should be sown about the first to the middle of June.

American Purple Top—Is a purple top yellow variety. Excellent for table use and also for stock feeding. A most desirable variety. 95 days. Pkt., 5c; oz., 10c; ¼-lb., 25c! 1 lb., 65c.

Large White or Sweet Russian—This variety is most excellent either for table or stock. It has a green top, flesh white, solid, sweet and rich; keeps well. 90 days. Pkt., 5c; oz., 10c; ¼-lb., 25c; 1 lb., 75c.

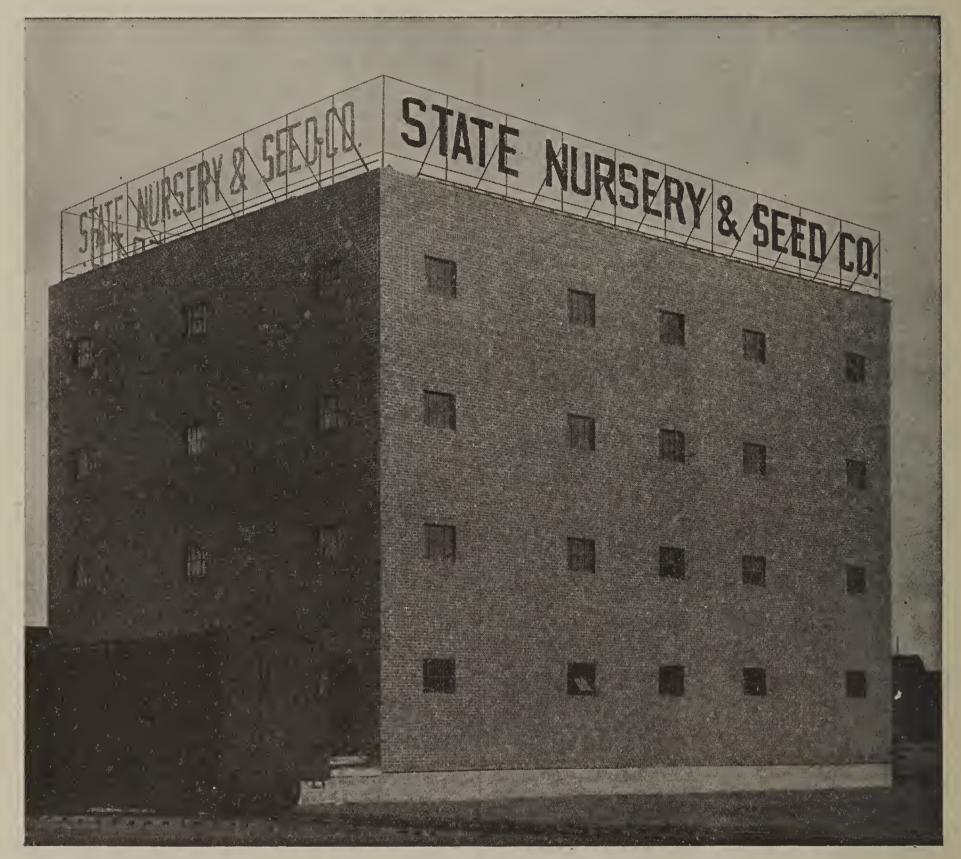

Rutabaga American Purple Top

Early Neckless—The greatest improvement in Purple Top Yellow Rutabaga in a generation. Three weeks earlier, entirely neckless, free from sideroots, round and uniform. The flesh is fine grained and of a beautiful yellow color. Pkt., 10c; oz., 15c; ¼-lb., 30c; 1 lb., 75c.

Have a supply of Vegetable Seeds on hand to replace the varieties used up. Beans, Beets, Lettuce, Radish, and Spinach are all suitable for filling in. Keep your garden producing — n 1 —— n 2 —— n 1 —— n 1

FIELD SEEDS

The Home of Peerless Montana Tested, Recleaned Field Seeds

SEND US A LIST of Your Field Seed Requirements We Will Be Glad to Offer You Quotations in Quantity Lots That Will Interest You

Nothing is more important to the farmer than that the seed he sows should be clean, of high purity and germination, and matured, so as to insure a good crop. Our peerless Montana Tested Seed is the highest quality Seed money can buy. Heavy, plump Seed germinates better and will produce a greater number of strong plants. With our 46 years of experience in Montana and the Northwest and knowledge of the seed business, also our up-to-date cleaning machinery, we are in a position to furnish you Seeds that will satisfy every requirement at a reasonable price.

BUY YOUR SEEDS EARLY

You will gain a distinct advantage by arranging for your Seed supply early. Oftentimes great saving in price can be made by placing your order early.

IMPORTANT

Our pink sheet Field Seed price list is publi shed at regular intervals throughout the planting season. When ready to purchase your Field Seeds send for our latest price list on same. Field Seeds will be sent equivalent to the mone y received, figuring the order at current prices.

HOW TO SHIP

Always state how you want heavy Seed shipped, by freight, parcel post or express, and if your station is a prepay point, add enough money to take care of the charges. We don't charge for bags.

Nothing is more important to the farmer than that the seed he sows should be clean, of high purity and germination, and matured, so as to insure a good crop. Our Peerless Montana Tested Seed is the highest quality Seed money can buy. Heavy, plump Seed germinates better and will produce a greater number of strong plants. With our 46 years of experience in Montana and the Northwest and knowledge of the seed business, also our up-to-date cleaning machinery, we are in a position to furnish you stand that will setting a continuous requirement at a reasonable price. Seeds that will satisfy every requirement at a reasonable price.

Peerless is our best brand and only the best Seed obtainable is so branded. It is always 99% pure and usually higher, no noxious weeds, and of the highest germination. We recommend this brand.

Placer grade is equal to, and in many cases has a higher purity and germination than other so-called "best" bands. Tests 98% or better.

-Although lower in purity and germination than our other two grades, our Quartz grade is good seed, 97% or better pure.

BUY YOUR SEEDS EARLY

You will gain a distinct advantage by arranging for your Seed supply early. Oftentimes great saving in price can be made by placing your order early.

IMPORTANT

Owing to fluctuations in market prices, it may be necessary to change some of the prices quoted herein during the season. Should prices change and orders be received at prices named, Seeds will be sent equivalent to the money received, figuring the order at current prices.

HOW TO SHIP

Always state how you want heavy Seed shipped, by freight, parcel post or express, and if your station is a prepay point, don't forget to add enough money to take care of the charges. Should you not receive the goods you ordered within a reasonable time, write us regarding the matter and we will gladly put a tracer after your shipment.

ALFALFA SEED—OUR SPECIALTY A SHORT STORY OF GRIMM ALFALFA SEED

The original source of perhaps 95% of all the Registered Grimm in the state can be traced back to our house. We were the first to introduce and distribute this Seed in quantity and without ego we can justly claim to be the foster father of a great industry within the state. Records and history substantiate this claim and we are still endeavoring to serve and distribute to our customers a first class quality of pedigreed stock in any quantity and at any time desired. To register fields for seed production in Montana the Seed must be Montana grown.

Montana Grown PEDIGREED COSSACK ALFALFA SEED Blue Tag "Fancy"—Sound, plump Seed, purity at least 99.25, no sweet clover or dodder. Noxious weed free.

Montana Grown PEDIGREED GRIMM ALFALFA SEED Blue Tag "Fancy"—Sound, plump Seed, purity at least 99.25, no sweet clover or dodder. Noxious weed free.

PEDIGREED GRIMM

True Grimm Alfalfa has in every respect proved itself a most wonderful variety and its reputation has been so well established that the registered and sealed Seed always commands a top price. Our stock is the best that can be produced; fully registered; inspected; tested and sealed under regulation of Montana Seed Growers' Association.

PEDIGREED COSSACK
Introduced by Professor Hansen in 1906. Many farmers have found by their own experience that Cossack is the heaviest and best seeder of any Alfalfa Seed they have tested. The past dry seasons have demonstrated the value of Cossack and Grimm.

PEDIGREED LADAK

This variety originated in Ladak, Northern India, being originally obtained through the efforts of the United States Department of Agriculture. This variety has come into the limelight particularly because of its resistance to bacterial wilt. Ladak blooms early and continues as a general rule for more than a month and sets its seeds well. Makes an exceptionally heavy first crop and is especially valuable where one good cutting is normally obtained. An extremely hardy Alalafa. We offer Montana Registered Blue Tag Ladak.

VARIEGATED ALFALFA SUPERIOR

In tests which have extended from 1919 to the present time, variegated Alfalfas, such as Cossack, Grimm and Ladak, have shown definite superiority in yield and Winter hardiness over common Alfalfas.

QUALIT MONTANA SEED GROWERS ASSOCIATION

Montana common varieties, however, have been definitely superior in yield and Winter hardiness to other common Alfalfas.

AFFIDAVIT GRIMM Raised From Registered Stock

We have to offer a quantity of unregistered Grimm. This Seed was from originally registered Seed on unregistered fields; unregistered because registration was not applied for.

While this quantity lasts it will afford the hay producer an opportunity to plant Grimm at a seed cost considerably under the registered seed price.

Write for Samples and Quotations, Stating the Quantity You Desire

Montana Hardy "Selected" Alfalfa

OUR SPECIALTY Some Facts Worthy of Your Attention

Montana Alfalfa Seed is now recognized everywhere as being the hardiest of all Alflafa and therefore the most consistent high yielder in hay tonnage.

Results of an eight-year test at the Michigan Agricultural Experiment Station show that Montana Alfafa Seed leads in hay production in competition with seed from the country's leading Alfalfa producing states.

Every prospective purchase of Alfalfa Seed should bear in mind that Montana Alfalfa Seed is now in demand in every state and country where poor yields and Winter killing are important factors.

Can you afford to plant other seed when the Montana Seed is available?

The "Peerless Brand" on Our Seeds Means—Highest Quality

We consistently prepare our Seeds to represent the best that the crop affords. Bags are all tagged and comply with the requirements of your State Pure Seed Laws. Uniform throughout the season.

Alfalfa

Extra No. 1 or Peerless Grade Hardy Montana Alfalfa

Is heavy, uniformly plump and bright as is characteristic of healthy Seed carrying a strong germ and high productive qualities. Peerless grade is always at least 99% pure and usually above 99.50%.

Placer Grade Hardy Montana Alfalfa

Placer is our No. 1 grade. Not as uniform in color or quite as high in purity, although this is consistently around 99% pure and carries practically no weeds, noxious or otherwise.

Equal to most Alfalfa Seed offered under fancy grade.

Quartz Grade Hardy Montana Alfalfa

Quartz is our No. 2 grade, therefore more variable in color and purity than either of the other two grades. However, for those who want hardy Montana Seed at a low price, this Seed very often fills the bill. The demand and repeat orders on this grade are convincing evidence that it has a place in our list.

The purity and germination on this grade often runs as high or higher than that of our Placer grade and even though from a producing standpoint this Seed is perfectly good, it has to be separated into a lower grade at a lower price principally because of color alone.

Look through our catalogue—you will find Alfalfa, Clovers and Grasses listed and described. If you have any questions write us and we will be glad to give you any information that we can.

Our Alfalfa Seed is raised in the high mountain valleys and is dry land seed. These strains have proven the hardiest and will withstand the severe Winters of our surrounding country. All lots are tested for purity and each sack is tagged showing the purity and germination.

FOR PRICES SEE PINK INSERT

CLOVERS

Alsike Clover

ALSIKE CLOVER (Sow 8 lbs., per acre)

Cultural and Soil Conditions—Alsike prefers lo-calities with plenty of moisture in soil. The most suitable soil is moist clay loam or clay with good lime content. It can be grown to advantage where soil is too wet for Red Clover, and with poor drainage; where Red Clover is a failure, Alsike will flourish. It has a rather shallow root system.

Uses—When grown for hay it is usually best mixed with Timothy or Red Top, thus producing finer quality. A popular mixture for Montana is about 80 per cent Timothy and 20 per cent Alsike. Cut for hay when in full bloom.

It produces usually one crop of hay a season but the tonnage is very heavy.

Greatly esteemed for pasture because of its high feeding value. Sow about eight pounds per acre

feeding value. Sow about eight pounds per acre.

MEDIUM RED

Cultural Conditions—Being a resident of the temperate zone, Red Clover succeeds best where Summers are not too hot nor the Winters too severé. Most parts of Montana, probably with the excep-

tion of the northeastern part of the state, are pretty well adapted to Red Clover production.

Soil Requirements—Red Clover can be grown on many kinds of soil, the most suitable being clay loams with a certain amount of lime and plenty of organic matter; generally prefers the heavier soils soils.

WHITE SWEET CLOVER (Sow 10-15 lbs. per acre)

When young it is succulent and quite palatable for hay and pasture. For hay purposes in Montana it might better be considered an insurance crop than a competitor of Alfalfa. It is sure to make a good crop of hay or roughage under conditions which might cause an Alfalfa crop failure.

It is quite popular for pasture purposes, both for cattle and sheep, and cannot be excelled for green manure, furnishing quick and abundant nitrogen to the soil.

YELLOW SWEET CLOVER (Sow 10-15 lbs. per acre)

Yellow Sweet Clover is not far different from

White, except that it has a yellow flower.

The plant does not grow as rank as White, has more of a spreading growth habit and finer texture, thus making it a consistent gainer in popularity over the White for pasture purposes.

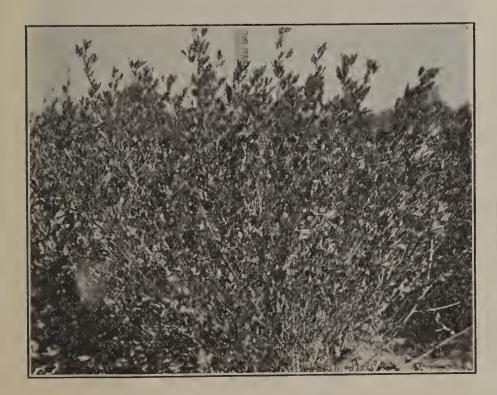

We know of an instance where 30 acres of Yellow blossom offered abundant pasture for 700 ewes

and lambs, continuing for three months.

WHITE BLOSSOM "ARCTIC" OR GRUNDY COUNTY BIENNIAL

This is a white blossom biennial SweetClover that grows from 31/2 to 4 feet high; matures an abundance of seed that ripens three weeks ahead of common white biennial. The outstanding advantage of this Clover is that it grows to a good height for harvesting, but does not require clipping, thus getting away from the hazard of killing the Clover by clipping improperly. It ripens early ahead of weeds and is ready to thresh and hull before small grain. It is very hardy and will withstand dry Summers and hard Winters. The seed is a little higher in price than the other varieties, but well worth all you pay for it. Fine for hay.

Cultural and Soil Conditions—Grows readily in nearly any soil or climate.

Alpha Sweet Clover

NEW ALPHA SWEET CLOVER

(Sow 8-12 lbs. per Acre)

If a legume crop could be made to order, like a suit of clothes, we would probably specify that it should be fine stemmed and leafy like Alfalfa, but with the biennial character and prolific seed production and soil improving qualities of Sweet Clover and lastly that the characteristic flavor of Sweet Clover be omitted.

The qualifications most desirable in a legume of the Alfalfa Sweet Clover type appear to be just those which this new sensational Alpha Clover form possesses. The characteristic Sweet Clover taste is still present but not nearly so pronounced. It is a very hardy type, fine stemmed and leafy, showing much the same type of growth as Alfalfa. We offer fancy Montana grown Seed of which the supply is limited again this year.

FOR PRICES SEE PINK INSERT

Meadow Fescue

Kentucky Blue Grass

(Smooth Stalked Meadow Grass)
(Sow 20 lbs. per acre)

Botanical Description—Kentucky Blue Grass is a perennial with a widely creeping rootstock. It is able to live under the most trying conditions. The runners are underground stems carrying colorless scales instead of green leaves. They creep under the ground surface and produce upright stems from their ends. The upright leafy stems arise in bunches from their base. The stems are from one-half to three feet high and perfectly smooth. The stem leaves are compartively short.

Uses—If grown for hay is should be cut when in

Uses—If grown for hay, is should be cut when in flower. Its feeding value is best at that time. The second crop consists chiefly of leaves.

MEADOW FESCUE

Botanical Description—Meadow Fescue is a perennial with long, strong roots. It has short rootstocks and is therefore tufted but not so much as Orchard Grass.

Stems are from 18 to 36 inches high, smooth and slender. Leaves are long, broad and slight in texture. Brome and other grasses have panicles similar to that of Meadow Fescue.

Cultural and Soil Conditions—It does best in a soil rich in organic matter. It is well adapted to clay soil, although not quite so well as Orchard Grass. It can also be grown successfully on sandy land if sufficient moisture is available and the soil is not too shallow. It is better fitted for medium wet soil than Orchard Grass, especially in pasture, and stands tramping better. On the other hand, its deep root system makes it fairly drought resistant. It stands the cold exceptionally well.

Uses—Hay from Meadow Fescue is nearly equal to that from Orchard Grass. Its nutritive value is higher and it should be cut at flowering time.

N. Z. Chewing Fescue—A small hardy low growing grass producing very fine dark green leaves rarely over 8 inches in height. It is a permanent grass and its turf improves with age. Hardy and rugged.

CLOVERS—(Continued) ALTASWEDE CLOVER

Altaswede is a product of artificial and natural selection from the late Swedish Red Clover which was introduced from Sweden in 1914 by the Dominion Seed Branch, Ottawa.

In the Spring of 1917, steps were taken to make an exhaustive study of the merits of this Clover. Seed was collected regularly until 1920.

From the data derived from the University of Edmonton and elsewhere in the province of Alberta, Altaswede has amply demonstrated its Winter hardiness and superior merits for fodder and seed production.

WHITE OR DUTCH CLOVER

White Dutch Clover—Is a perennial. The stems are creeping and root at the joints. A single plant may thus spread over a wide area. From the stems, trailing along the ground surface, are developed upright leaves and flower heads, both provided with long stalks.

White Clover was first developed in Holland; therefore the name Dutch Clover.

We are offering both domestic and a fine lot of German imported Seed this year.

Cultural and Soil Conditions—White Dutch Clover grows naturally in meadows and pastures, does well in valleys and on mountains. It will grow in a great variety of soils from sand and gravel to rich loam and clay. It does best, however, on moist, well drained loams which contain lime and humus and is especially adapted to the most medium warm climate. When other conditions are favorable, however, it will endure severe cold without injury and will stand drought providing the subsoil is somewhat moist, because while most of the roots are rather superficial, the main taproot penetrates to a considerable depth.

Uses—Because of its low growth it is not used to any great extent as a hay plant. Its chief value is for pasture, and in pasture and lawn grass mixtures.

It covers the ground quickly, has high nutritive value and stands tramping and close grazing exceptionally well.

White Dutch Clover

BROME GRASS (Bromus Inermis)

Brome is a (top) grass. Persistent. Withstands drought that kills all other grasses, is not sensitive to cold and dry weather and in regard to this is unexcelled. It does best on rich, fresh, humus-holding soils, loamy sand and sandy

Habits of Growth-Produces a close sod, a single cutting the year of sowing; two cuttings the second year. It becomes useful the second year and lasts twelve to fifteen years; second cutting almost equals first.

Seed and Seeding—Good seed should test 90 per cent to 92 per cent purity and the same for germination.

To sow an acre requires We are offering Fancy from 15 to 25 pounds. Quack or Couch Free Seed.

Uses-Develops a good sod, makes excellent pasture grass and fair hay. For hay it should be cut just before flowering for nutritive value.

See Our Pink Sheet for Prices on Field Seeds. If You Must Order Later Write for Our Latest Pink Sheet.

RED TOP (Solid Seed)

Botanical Description-There are several varieties of Red Top, varying in height from two to four feet. The only ones of importance to agriculture are the taller varieties. Red Top has a creeping rootstock and runners. It does not grow in tufts but forms a dense sod as a result of its joint rooting habit. The leaves vary in size and The flowers are arranged in panicles number. with numerous branches.

Cultural and Soil Conditions — Red Top grows naturally in most localities. However, it is best adapted to light, wet soils where its roots can develop freely. Wet bottom land not suited for other grasses is often the ideal place for growing Red

Uses - Red Top makes good growth the same year it is sown and continues growth late in the Fall. It makes a very fair quality of hay and especially has a place in grass mixtures for hay purposes.

It is very palatable and is relished by livestock in hay or pasture form.

PERENNIAL OR ENGLISH RYE GRASS

Botanical Description—This grass is a perennial with a creeping rootstock which develops bunches of leafy stems and shoots. The plant grows in spreading tufts. The stems are upright, more or less elbow bent ascending and are smooth and slender, growing from one to two feet high. The leaves are dark green and folded together when in the bud. The flowers are arranged in a spikelike inflorence composed of flattened spikelets in two rows. They turn their narrow side toward the main stem differing from Western Rye, which the main stem. differing from Western Rye, which turns its broad side toward the stem.

Cultural and Soil Conditions—It prefers moist, rich clay loams. It can be successfully grown on marshy land or any good well drained soil. Almarshy land or any good well drained soil. Although it is quite drought resistant, it is not recommended for districts where the Summers are too hot and dry. It reaches its best yield at the second year but continues to give good yields for sev-

Uses-It is one of the oldest forage plants. It is very useful for hay and pasture purposes and sometimes is used in lawn mixture. Its greatest nutritive value is immediately before flowering.

TALL MEADOW OAT GRASS

This grass is particularly adapted to warm, dry climates, where Timothy will not grow. It is quite productive, stands pasturing well and remains green until quite late. It forms a very valuable mixture with Orchard Grass and Red Clover. It may be sown in the Spring at the rate of two to two and a half bushels per acre, or where sown with Orchard Grass and Red Clover blended, proportionately portionately.

SLENDER WHEAT OR WESTERN RYE GRASS Improved Bunch Type

Botanical Description—Western Rye Grass is a perennial with a short rootstock, not creeping. The stems and shoots are rather crowded and the plant grows in dense tufts. Stems and shoots are upright, the stems being from two to four feet. high. The foliage is somewhat variable. The spikelets are always strongly appressed to the main stem, making the whole inflorence narrow and slender—hence the name Slender Wheat Grass.

Cultural and Soil Conditions—It grows naturally in dry soil and thrives best where water supply is limited. It does fairly well even on alkali ground, and the root being deep and strong, it is drought resistant and resistant to extreme cold. It is easy to grow, establishes itself the first year and gives its heaviest crop the third year. Starts early in the Spring.

Uses-It is one of the most valuable of western native hay grasses.

See Page 103 for the New Akali Resisting Legume. Also Page 104 for the New Black Millet

Perennial Rye Grass

Harvesting Our Fancy Registered Blue Tag Crested Wheat Grass on Parker Bros. Farm

CRESTED WHEAT GRASS

(Broadcast 6-10 lbs. per acre) (Drill 2-3 lbs. in rows 3 feet apart)

This is the hardiest and most drouth resistant grass yet discovered and it is in great demand all over the Northwest. Introduced by the U. S. Department of Agriculture and highly recommended by them, also state and county officials. It has undersided ability to grow during the coult and late. limited ability to grow during the early and late cool seasons making considerable growth early in the Spring and late in the Fall when other crops are not making much headway. The demand for the seed will again exceed the supply this year. We are offering a selected standard strain of high purity and germination seed this year, quack free and also Registered Blue Tag Crested Wheat from Parker Bros. farm which is the best that money can buy.

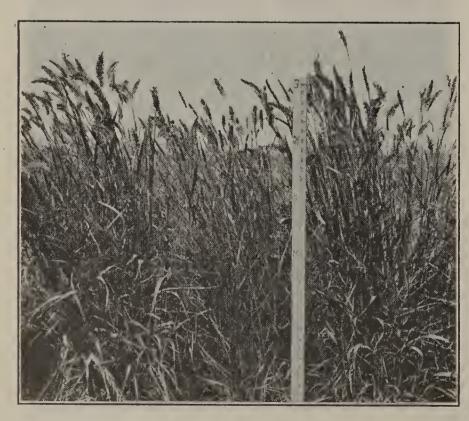

NEW FAIRWAY CRESTED WHEAT

A selected strain of this popular grass which is a leafier and more low growing type. Has great possibilities for farm lawns, golf courses, etc., as well as its value for hay and pasture. The true Fairway strain is still very, very scarce. We are offering fancy seed grown on Parker Bros. famous Crested Wheat Farm. This seed shows a purity of 974% with no weeds. 97.4% with no weeds.

Write for our Free Leaflet on Crested Wheat

ORCHARD GRASS

Orchard Grass is a top grass with thick, bushy, little spreading tufts. It has quick and plentiful second growth and can be cut several times, the first cut before the bloom. When heavily seeded with other grasses gives good pasture and sends its roots deep into the soil. Grows quickly in the Spring and is adapted for alternate farming.

Crested Wheat Grass Fairway

TIMOTHY

Timothy is a top grass; persistent. Especially adapted to mountainous regions and does best on humus loams and clays, also on well drained swamp lands; does not do well on soil poor in lime or sour soil. It is a nutritious and tender hay when young, liked by all stock.

Cultural Conditions-Quite hardy, not sensitive to climate, roots penetrate deep, making it with-stand drought fairly well. It is especially useful for hay and pasture. Seed from 8 to 12 pounds per acre. We have an exceptionally fine lot of Timothy to offer this season with a purity test of 99.7%.

SUDAN GRASS

We recommend broadcasting Sudan, 20 to 25 pounds of seed to the acre.

It is an annual and requires replanting each year; has no root stalks (as Johnson Grass) and dies with the first frosts in the Fall; is closely related to the Sorghums (Milo Maize, Kaffir Korn, etc.), but yields far more abundantly than any of these and the hay has more fattening properties. THERE IS NO OTHER FORAGE CROP KNOWN THAT WILL RESIST DROUGHT LIKE SUDAN and it is therefore particularly adapted to semi-arid regions, yet it yields immense crops under irrigation and in rainy climates.

REED CANARY GRASS

Is one perennial grass that will thrive in marshy places, stand under water for weeks without injury, yield enormous tonnage of hay with a feed value equal to wheat bran. Until seed is more plentiful we suggest to seed alone after the land has been worked and weeds killed off, using 10 to 12 pounds per acre, any time before June 20th. Make your low land grow profitable crops.

Timothy

Pasture and Meadow Mixtures

In proper proportions of adaptable grasses and clovers are becoming more and more important all over Montana and the Northwest.

They may be a selection of individually selected mixtures or they may be recommended mixtures (as suggested below) which have been consistently used and proven the best for many conditions.

In either case we can furnish the mixtures or the varieties for home mixing by the purchaser or if he has any special soil or climatic condition to combat we will, upon receiving proper information from him, offer advice and suggestions.

New Improved Peerless Pasture Mixture

(Seed 20-25 lbs. per Acre)

A special blend of grasses that have been proven A special blend of grasses that have been proven to stand the many varied soil and weather conditions of Montana and the Rocky Mountain region, including such drought resisters as Crested Wheat Grass, Slender Wheat Grass and Brome. It also contains Orchard Grass, Perennial Rye Grass, Timothy, Tall Meadow Oat Grass, Alsike and Medium Red Clovers and others in the proper proportions to give splendid results for those who want the best in a pasture mixture containing fancy clean seed of high purity and germination. seed of high purity and germination.

The Huntley Mixture

Recommended by the Federal Experiment Station at Huntley, Montana.

Brome Grass Kentucky Blue Grass

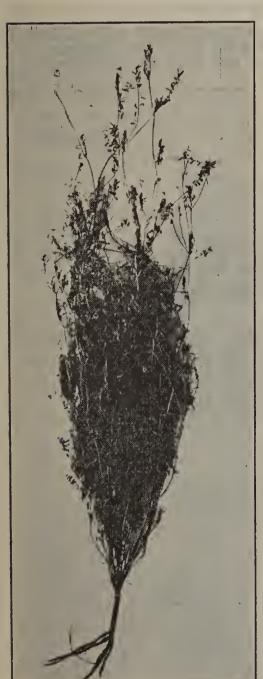

20% Orchard Grass

20% Meadow Fescue 10% Alsike Clover 10% White Dutch Clover

Can be seeded at the rate of 20 to 24 lbs. per acre. For the most part the heavy seeding is the more practical.

(Ask Us for Suggestions to Improve Your Native Pasture Lands)

New Alkali Resistant Legume

Astragalus Rubyi

ASTRAGALUS

RUBYI This new legume discovered six years ago and since has proven to thrive on a high lime soil on moist bottom land containing more or less alkali. It makes an abundant growth from the crown of a woody root. It spreads over the ground for 2 or 3 feet and crowds out other vegetation, thus forming relatively pure stands. stems The slender grow to four feet in length and bear many leaves 3 to 5 inches long. The roots are similar to alfalfa and bear many nodules. flowers are small, purplish in color and nke a pea nower. It has been cut and cured like alfalfa with great success and has materially increased the production of forage on ranches where it occurred. Thrives on land where alfalfa will not grow and the hay is of high quality and all kinds of stock seem to relish it. It also eontains a high percentage of phosphorous which is very desirable in feeding. It will undoubtedly have an important economic place in reclaiming low damp

bottom land and may be used as either a forage or soiling crop. Price 1-25 lbs., per lb., \$1.00, F. O. B. Helena. Write for prices in larger quantities. We have secured the original Masolo seed stock of this new legnme.

Spring Vetch (Gray)

Vetches

Like all leguminous crops, Vetch gathers nitrogen out of the air and deposits it in the tubercles on its roots. The seed should be inoculated or the young plant will not grow as healthy and vigorous as otherwise. Although many of our customers report, they are able to grow without inoculating.

Winter Vetch—Known also as Sand or Hairy Vetch. Although called Winter this variety must be Although called Winter this variety must be sown in Spring in Montana as it will not withstand our Winters; its advantage is that usually it produces a heavier tonnage per acre than the Spring Vetch. This variety requires a variety requires a good soil is fre-

good soil, is frequently sown with oats or barley, with which it makes excellent feed.

WINTER VETCH

Spring Vetch — This is a very valuable forage plant and is rapidly becoming popular each year as the farmers are learning more of its great value for forage and fertilizing purposes. It succeeds well on nearly all soils and thrives surprisingly on poor light land. It improves the soil, being a nitrogen gatherer. It belongs to the pea family, but the vines are much longer and the foliage is more abundant. May be sown with about half bushel of rye or oats for support. It grows rapidly and is particularly valuable in sections where clover does not thrive.

This fine newer type Millet grows around 48 inches tall under favorable conditions. The seed is very valuable feed but it is perhaps grown more extensively for its valuable straw. The seed will be entirely ripe and the stalks or straw will still be green and cures up and holds its color as easily as alfalfa and is greatly relished by stock. The seed is rather limited as yet. We are offering some fancy seed of this new Millet. You will want to try some of it. 5 lbs., 75c; 10 lbs., \$1.35; 25 lbs., \$2.75; 50 lbs., \$5.00; 100 lbs., \$8.50.

White Wonder—The most striking feature of White Wonder Millet is the size of the heads. A single head will have as many as 15,000 seeds.

Golden or German—In the North German Millet is sown almost altogether for hay and for that purpose Southern-grown seed is much the best. It grows taller than does that from Northern seed, and that means more hay.

Siberian or Kursk Millet—This variety was first introduced into the United States from Kursk. Russia, in 1898. Extensive experiments were conducted at both the South Dakota trial stations, which demonstrated the superiority of this new variety. As both a hay and seed producer it ranks very high.

Japanese — "Billion Dollar Grass" — Entirely distinct from all other Millets. It grows from 6 to 9 feet high, stands up remarkably and yields enormous crops. When cured it makes good hay and in quality is superior to corn fodder. It is relished by all kinds of stock.

Proso Type Millets

Proso or Hog Millet type is in especial favor for mixture in poultry foods. One of the surest crops in the Northwest, especially valuable for late planting.

Hog or Broom Corn—This is grown for the same purpose for which other Millets are sown, but makes inferior hay unless cut very young. It yields enormously of seed, even 60 to 70 bushels to the acre, and this seed is very advantageously used for fattening swine and other stock.

Field Beans

(Sow 16-24 lbs., per acre)

Great Northern Navy—This variety seems to be especially adapted to Montana soil and climate. In our opinion it leads all other varieties of Navy Beans—when the real test comes—at the table. 16 to 24 lbs. per acre.

Small White Navy—The popular Bean a few years ago which now seems to be coming back to its own, being of small size. Use only 10 to 12 lbs. per acre. Splendid cooker and yielder.

Soy or Soja Beans

Valuable for silage, hay, for hogging off and as a soil improver. They resemble the Navy Bean in appearance but grow considerably taller. When planted with corn for silage the total yield per acre is increased and the feeding value of the silage improved. For hay they are valuable as an emergency leguminous crop where clover has been Winter killed; equal to clover in feeding value. Like clover they gather nitrogen from the air.

For hay, plant 60 to 90 lbs. per acre in rows 20 to 36 inches apart.

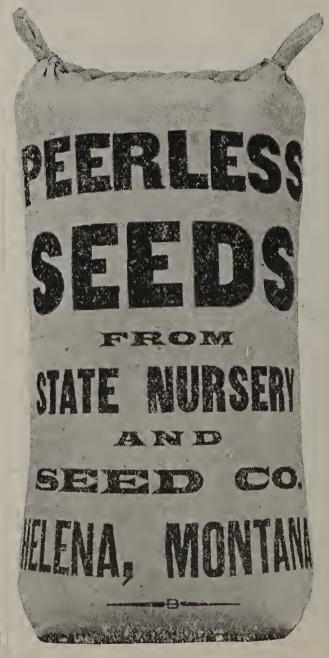

The Manchu—Is a good yielder and hence is popular with the farmers. The yield runs around 20 bushels to the acre and the oil content is from 18 to 24 per cent. The Manchu is low branching. A splendid medium early variety.

Illini — A variety which has proven itself to be adapted to Montana soil and climate. Fields of large acreage sown in widely separated districts have given quite satisfactory returns. An early variety, yields heavily with heavy foliage.

Sorghum or Sugar Cane

Early Amber Cane — A selected strain for the North, producing a fine quality of fodder and a fine yielder. For fodder sow 50 to 60 lbs. broadcast or 15 to 20 lbs. in drills. Makes an excellent catch crop also. For silage cut when the seeds begin to harden. This cane has proven well adapted and is the most popular sort with us.

Plant Your Prosperity Crop This Year With PEERLESS MONTANA TESTED SEEDS Grown and Selected for You for 46 Years.

Feterita

3 to 4 lbs.
per acre
(in drills)

Feterita

A wonderful grain which has attracted considerable attention.

Matures from
15 to 20 days
earlier than
Kaffir Corn.
The seed is
larger and
heads well
filled.
Thrives with

Thrives with less moisture than most other farm crops.

STANDARD SEED GRAINS

A Field of Our Victory Oats

Oats

Victory—This variety is very highly recommended by the Montana Experiment Station because of its consistent high yield performance on both dry and irrigated land. It is the best dual adapted Oat, in respect to either dry or irrigated conditions, known. We are offering an extremely fancy lot of Victory Oats this season. See back cover.

Swedish Select—These originated in Sweden and for years have been one of the dependable standard varieties over the entire Northwest. stocks are selected from the best and purest obtainable, are of exceptional quality, thoroughly recleaned and graded.

Montana White—A large, plump, early maturing, very good yielding, White Oats of splendid appearance and grade. A sample will convince you of their quality.

Gopher—An early maturing Oat with a good stiff straw and highly recommended for Montana. It it a good yielder and forms a compact head of grain.

Spring Wheat

We want to especially call your attention to the fact that the Spring Wheat varieties offered below are something superior to the ordinary standard varieties commonly offered.

Marquis—Our Marquis seed offered is grown from a pure, high yielding, early maturing strain. Its chief characteristics are that it is beardless, good straw, fine milling qualities and highest yielding and earlier maturing than ordinary Marquis.

Federation — In sections of the Northwest where White Spring Wheat is used we strongly recommend Federation. It has a medium short strong straw, is a good stooler and beardless. H. L. Cram, our grower, who has produced Federation seed for several years and was formerly a producer of Club Wheat, says that it averages ten days earlier than Club Wheat, yields as heavily and requires less water.

Soft Spring Wheat—Strong straw and heavy yield-in gvariety, particularly well adapted to most of the irrigated districts of the Northwest. Absolutely pure Soft Spring is practically impossible to obtain but our stock has an exceptionally low percentage of other wheat. We have an exceptional lot of plump seed with high purity and germination.

Winter Wheat

Before seeding time write us for recommendations on new adapted varieties and prices.

Can sow fifty acres in a tenhour day—seed-ed evenly, thoroughly and easily. Use it with any seeds that can be sown broadcast or with ground ashes or zer. Its bone, fertilizer. distribution will make three bushels do the work of four. The Sower that satisfies. Each, \$2.35, postpaid,

PREPARE NOW FOR SPRING

The demand for good seeds is insistent. The Department of Agriculture, at Washington, and State Experiment Stations, are of constant benefit to farmers. Watch them—they will advise well. They consistently advocate good seeds of known origin. Our business is to supply the best. WE DO. The accumulated endeavor of years, as represented in our business, is at your service. Thousands of customers year in and year out can testify to our high grade seeds and to our service.

A Field of Our Soft Spring Wheat in the Helena Valley

Buckwheat

(35 to 40 pounds to the acre)

Buckwheat, because of its rapid growth, is used in many places as a weed preventive and while more commonly grown for milling purposes it finds quite common use in the Northwest as an added variety to grain mixtures for poultry feeding.

Kaffir Corn

Kaffir Corn

Kaffir Corn-White Seeded - An excellent fodder plant, yielding two crops of fodder during the season. It grows 4 to 5 feet high, making a straight upright growth. The stem or stalk bears enormous wide leaves. The stalks are brittle and juicy, not hardening like other varieties of Sorghum. It makes excellent fodder, either green or dry, which is highly relished by cattle and all kinds of stock. The seed crop is also heavy, sometimes 50 to 60 bushels to the acre. For grain, sow in rows 3 feet apart, 3 to 5 lbs. to the acre. For fodder, sow 40 to 50 lbs. either broadcast or in drills.

Flax

Bison—The most outstanding wilt and rust resistant Flax ever developed. Never has a new variety met with such instant and widespread acceptance and popularity. A large kerneled variety developed by Professor Bolley from a sample of commercial Flax received from Ghent, Belgium, in 1910. This sample was planted in trial rows and single head selections were continued until the type became thoroughly fixed. By process of elimination the final strain selected produces unusually sturdy plants with stiff straw and generous root system able to withstand adverse weather conditions as well as attacks of insects and disease.

Reserve—This Flax has proven itself to be the best yielder of any straight variety at the Bozeman Experiment Station, giving an average yield over three years of 27.8 bushels per acre on irrigated land against the eight trials. Good results and wields are produced on irrigated land when the eight trials. yields are produced on irrigated land when sown with Spring Wheat or if sown alone on non-iri-gated land following Sweet Clover, or a cultivated crop such as Corn, Beets, Potatoes.

If you have some poorly drained alkali land you will want to try the new Legume for Montana.

ASTRAGALUS RUBYI—See Page 103

Sunflower

(10 pounds to the acre)

Sunflower is often used as a fodder crop but more particularly for silage. For those who feed ensilage or have silos, Sunflower is perhaps the most practical crop to grow where quick growth, early maturity, and large tonnage are factors.

Sunflower ensilage is practically equal to corn ensilage in food value, and the tonnage per acre is invariably much greater. Mammoth Russian is the variety most in demand for feeding purposes.

Rape

(Sow 2 to 3 lbs. to the acre in drill-5 lbs. broadcast)

Use of Dwarf Essex Rape-Dwarf Essex Rape Use of Dwarf Essex Rape—Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slough lands are excellent. This plant may be grown successfully in the following ways, viz.:

1. In the early Spring to provide pasture. 2. In June or July, on well prepared land, to provide pasture. 3. Along with grain, using 2 lbs. of seed an acre, to provide pasture for sheep after harvest.

4. Along with peas, oats, clover seed, to provide pasture and to get a catch of clover. 5. As a cover in the orchard for Winter protection to avoid root-killing. 6. In corn, sowing the seed with the root-killing. 6. In corn, sowing the seed with the last cultivation; the succulent feed produced may save the loss of cattle by cornstalk disease. Prevention is better than medicine in regard to this fatal disease. 7. Along with rye, sown in August, in sheep pasture. 8. On early plowed fields to shade the land and so that the soil will not bleach, wash or drift. 9. To plow under as a green crop, adding humus to the soil, an element needed in grain-growing sections.

Old Priest's Pass over the Continental Divide just 7 miles from our Nursery and the home of Peerless Montana Tested Seeds

Spring Rye

(Sow 50 lbs. per acre broadcast)

Rye produces a crop that can be relied upon regardless of drought, wet, cold, or excessive heat conditions and many weed-infested farms have been cleared by growing this grain. As a fertilizer it is a wonder; it can be grown on thinner land than other cereals; as a feed for growing pigs, you cannot beat rye. If you have any thin clay points on your farm, there is the place to plant rye.

Prolific Spring Rye—This is a new Spring Rye which greatly outyields the common sort. The supply of a true strain of Prolific Rye is limited. We are offering a fancy lot of ergot free seed.

Montana Standard Spring Rye—We are offering a high quality lot of this seed grown at extremely high altitude and of high purity and germination.

Rosen Rye—A heavy yielding, large seeded, high quality variety. The most popular Fall Rye.

Amber Rye-A well known popular variety for Montana.

SEED BARLEY

TREBI BARLEY-A bearded six-rowed hulled variety which has proven to be the highest yielder under irrigated conditions. At Bozeman this Barley has consistently produced more feed grain per acre than any other variety or kind of crop grown. It is rapidly displacing all other Barley varieties in the irrigated sections of Montana and Idaho. It is a good performer under dry land conditions in the more favorable seasons. This Barley is a pedigreed selection made by the Minnesota station from stocks originating in Turkey.

(PEDIGREE NO. 38) — MALTING WISCONSIN BARLEY-This is the best type Malting Barley. It is a smooth awned type. Does not lodge as readily as the oderbrucker types and outyields them. There is considerable preference for the smooth awned types of malting or brewing bar-leys. We have a fine lot of fancy Montana grown seed of Wisconsin Pedigree "38."

FAUST'S BLUE HULLESS AND BEARDLESS BAR-LEY—Is the latest improved strain of the Blue Hulless varieties. Besides the added characteristic of being beardless it has proven itself to be far the highest yielding of all Hulless types. The feed value of this variety is the highest of all Barleys and 35 to 40 bushel yields are very common.

Giant White Hulless

A big hog fattener. Earlier than the bearded varieties, six rowed, and in threshing, the kernels shell out without the hulls and look like big wheat kernels; when grown for hay, it should be cut before it is ripe, while the straw is still green. It is a heavy yielder and can be thrown to the hogs in bundles and they will eat every kernel of it. Sow 2½ bu. per acre.

Field of Our Spring Rye

Speltz

SPRING SPELTZ OR EMMER is very similar to Barley in appearance and growth, and is especially adapted to the semi-arid districts of the Northwest and can be relied upon to produce a fair crop even under the most adverse conditions. It produces heavy yields of grain, and straw which is equal in value to oat straw. Its extreme hardiness and drought resisting qualities, together with yielding qualities that surpass any other cereal, make it a grain of the utmost importance to the farmers in the North and Northwest.

Our seed stock has been bred up from the most hardy, high yielding strains, and has been carefully recleaned and graded and we believe that we are in a position to furnish you with the best that can be produced, and we know that it will prove to be the cheapest and best feed which you have ever grown upon your farm.

Anaconda Treble Super Phosphate

A soil survey reported in Bulletin No. 259 of the Montana State College Experiment Station shows 60.9% of Montana soils to be deficient in AVAIL-ABLE phosphate. In 1933 over 3,000 tons of Anaconda Phosphate were used by Montana farmers. Profitable cropping cannot be maintained over a profited of years without replacing the plant foods. period of years without replacing the plant foods in the soil.

Try Anaconda Phosphate on Your Fields This Year. Prices: 125-lb. bag, \$3.15; ton, \$50.40. Ask for Prices in Car Lots

Corn Trials on Our Seed Grounds

S. N. & S. CO'S. PEERLESS SEED CORN

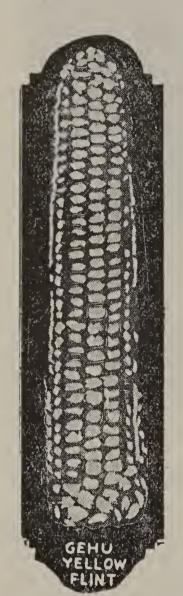

HIGHLY YIELDING-DEPENDABLE - SELECTED - ADAPTED STRAINS - HIGH GERMINATION

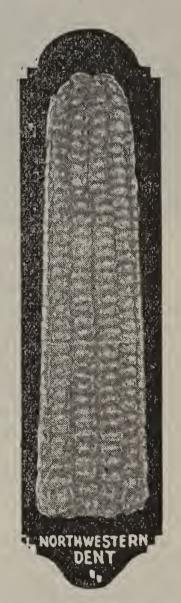

The past season saw an excellent yield where good adaptable corn was planted, and we are offering seed of high germination and purity at reasonable prices.

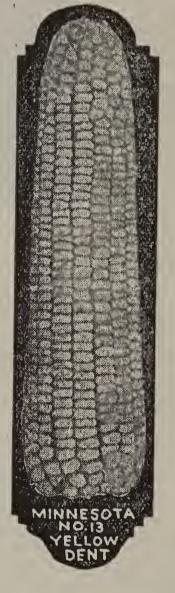

We have taken special care and have spared neither time nor effort in the selection of our Seed Corn stocks.

We pay particular attention to selecting the earliest strains of each variety offered. Especial emphasis is given to type, yield and germination.

We thus reduce your risk, increase your yields and for ourselves obtain a booster and a customer for years to follow. The benefit becomes mutual.

Dent Corn

NORTHWESTERN DENT — Northwestern Dent is generally conceded to be the most popular variety in the semi-dent class. It is not only early maturing but is an excellent yielder in grain production or from a silage standpoint in tonuage per acre; under average conditions it will mature in from 85 to 100 days.

PIONEER WHITE DENT, or RUSTLERS WHITE DENT—This is now recognized under the general name of Pioneer White Dent and is the earliest of the true dent varieties, maturing in from 85 to 95 days under average Montana conditions. It is not only a dependable grain producer but also a fair silage producer if desired for that purpose.

MINNESOTA 13—Minnesota 13 has rightfully earned its high rank as a Montana Corn. It yields well and matures early, although not quite as early as the other dents or semi-dents mentioned, its average being from 90 to 105 days, which makes it safe as a Montana Corn under anything like normal years. The strain we offer has been a remarkable yielder and for the past seven years has matured at an altitude over 3,400 feet.

proves more and more its very great value to the Northwest. Acclimated by forty years of growing, and carefully selected, it improves each year. It is earlier than any of the dents, and heavier, being a descendant from the original native Indian Corn, and it has consistently outyielded all other sorts year in and year out with us. The color is a somewhat uneven yellow, rows eight to twelve, and ears very large. It grows tall enough on the stalk to be handled with a corn binder. 85 to 95 days maturity.

Early Flint Corn

GEHU—The best known of our native early flints, might well be called the Universal Corn. It has been carefully bred by us for nearly forty years and shows the effect of this breeding. Its feeding qualities are the highest of any variety of Corn; it is leafy and produces a tremendous amount of excellent fodder, since there is no heavy stalk and every part of the plant is utilized. It is drought, frost and hail resistant to a wonderful extent in addition to its great earliness. In good soil and under favorable conditions it may be cut with a corn binder.

THE ORIGINAL DAKOTA SQUAW OR RAINBOW FLINT—This is a mixed form of the early flint. It has retained its popularity through many years, on account of its extreme earliness and unusual hardiness. It is very resistant to both drought and frost and fully as heavy a yielder of mixed colors, yellow, white, blue and red predominating; ears long and slender, mostly eight rowed.

semesan JR.—This modified form of the patent product, Semesan, is exclusively a dust disinfectant used principally for the ear, root and stalk rots of field and sweet Corn but also for the treatment of cereal infections. Under Government-conducted field tests, Semesan Jr. increased the crop yields from diseased field Corn seeds by approximately twenty bushels to the acre and from similarly diseased Sweet Corn by as much as 47.7% with an average of practically 12%.

All Prices on Field Seeds on Pink Sheet in back of catalog and no charge for Bags.

SEED POTATOES

WE OFFER MONTANA CERTIFIED BLUE TAG SEED STOCK ONLY

The demand for Certified Seed Potatoes has rapidly increased for either home use or commercial planting because it is economy to know you are getting tubers in the best physical shape, freedom from the dreaded virius diseases and stock that transmits strong characteristics of type. Only by getting Certified Blue Tag Seed Potatoes are you sure of the above protection and tests all over the Nation show 10 to 25 per cent greater production from Certified Seed Stock.

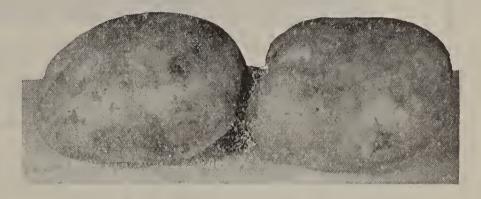

New Early Pride of Wisconsin

Early Pride of Wisconsin

This is a fine new long white potato that is meeting with popular favor as an early variety. It attains a splendid size, thriving better on the lighter soils. It is a very heavy yielder. We offer Montana Certified Blue Tag Seed Stock only.

Early Bliss Triumph THE MOST POPULAR EXTRA EARLY

The Early Triumph is a roundish, red Potato, somewhat earlier than the Early Ohio and a very good yielder on good soil with fair moisture conditions. It is a great favorite at the present time, and many carloads of seed from our state are shipped south where they are used to produce the early crop for the large markets. We offer Montana Certified Blue Tag Seed Stock Only.

Katahdin

Katahdin

This is one of the new U. S. Government seed-lings and has proven exceptionally adapted to dry land conditions in Montana. It is a fine, smooth, white, round potato, slightly flat with few shallow eyes grouped mostly at the seed end leaving the main body smooth. Not as early as the Bliss or Pride of Wisconsin but it has distinctly outyielded all other varieties under dry land conditions. We offer Montana Certified Blue Tag Seed Stock only only.

Netted Gem

Sometimes called the Russet Burbank. A splendid main crop late Potato with brownish russet skin, flesh with yellow eyes, rather long shape. Netted Gem is an excellent yielder, very regular in size, and is unsurpassed as a baking Potato. The tubers present an excellent appearance, and are splendid shippers. We offer Montana Certified Blue Tag Seed Stock only.

We Are Offering a Lot of Red McClure Potatoes, Graded Seed Stock but Not Certified. See Our Special Offer on Our Pink Sneet in Back of This Book.

DR. WILSON'S DUST AND SPRAY MASK

Don't breathe poisonous and irritating dust and spray. Dr. Wilson's Mask protects the throat and lungs. Whenever you have to work with dust or sprays wear this efficient health protector. Highly recommended. Price, \$2.00. postpaid. Extra filters, 10 for 25c, postpaid.

OUR PEERLESS Poultry and Dairy Foods

Peerless Feeds are made of the finest and cleanest ingredients obtainable. Our Feeds contain no screenings; we use only ingredients that come up to a high standard in all scratch and mashes

Our Feed Department is ready at all times to help you with your poultry and dariy problems.

We issue a Feed Price List several times during the year and your name on our mailing list will place each issue in your hands. Do not delay; write in and get your name on this special list today.

PEERLESS HEN SCRATCH FEED A combination of seven varieties of grain in the proper proportions to make a well balanced ration.

PEERLESS DEVELOPER SCRATCH For Chieks from 8 Weeks to Maturity

A combination of the best grade of carefully cleaned grains prepared for growing birds from about eight weeks old to maturity.

PEERLESS GROWING RATION SCRATCH FEED

For Chicks 3 to 7 Weeks Old Similar to Little Chick Scratch but a size larger.

PEERLESS LITTLE CHICK SCRATCH FEED For Chicks from 1 to 3 Weeks Old

A good clean wholesome ration of finely milled grains, attractive and appetizing, the necessary factors to stimulate and encourage exercise.

PEERLESS. CHICK STARTING MASH

Peerless Chick Starter contains enough milk for the chicks without feeding any in liquid form.

Peerless Chick Starter contains all the essential feeds necessary for the chick, when fed with a good grade of chick scratch.

ANIMALICK

This product contains 43% available phosphoric acid and will greatly better the condition of your cattle. 25-lb., bag, \$1.25; 100-lb. bag, \$3.95; F. O. B. Helena.

PEERLESS GROWING MASH

Peerless Growing Mash is made to build muscle, bone and feathers. Every ingredient is included in the right proportion and is pure, clean and wholesome.

PEERLESS EGG MASH

Properly balanced for egg production and containing the proper amount of cod liver oil. We guarantee its satisfaction and comparative food value with any mash on the market.

PEERLESS FATTENING MASH
A good fattening food contains a high percentage of nitrogen—free extract—which is the real fattening material.

PEERLESS DAIRY FOOD

This is a scientifically and properly balanced food made from recleaned ground grains, molasses, linseed meal, cottonseed meal, gluten and minerals. This feed is a real milk producer.

BOOKS THAT TELL YOU HOW --- "MAKE PRACTICAL GIFTS"

SPRAYING, DUSTING, AND FUMIGATING OF PLANTS, by A. F. Mason

Tells what pests to expect and how to identify and control them, how to choose the right spray materials, how to select spraying and dusting machinery, and other details for the pest control of fruit, vegetables, and garden plants; 237 illustrations; 570 pages.—\$3.00.

THE OUTDOOR LIVING ROOM By L. W. Ramsey, and Charles H. Lawrenec

Pictures and text show how home owners everywhere may enjoy the benefits of an outdoor garden room, designed for living and for the enjoyment of the family and friends. This book tells just how to make such a room to be livable, artistically correct, and delightful. Profusely illustrated with photographs and drawings; frontispiece in color. Cloth, 8vo.—\$2.50.

THE GARDENER, by L. H. Bailey Beginning with A and running through to Z, this book lists and tells how to plant and care for all the common flowers, vegetables, and fruits from the time they are planted through to maturity. 116 illustrations; 260 pages—\$2.00.

PRINCIPLES OF VEGETABLE GARDENING by H. L. Bailey

Full information on growing 70 vegetable crops makes this book worth several times its price to every grower. Includes practical pointers on hotbeds, cold-frames, weeds, insects and diseases, marketing, storing, and drying; 250 illustrations, 490

THE HOME VEGETABLE GARDEN By E. M. Freeman

A book which shows how to grow fresh, crisp vegetables in your own garden and cut down on the grocer's bills. Full of practical details for laying out the garden, planting, and growing vegetables successfully; 8 illustrations, 214 pages—\$1.75.

PERENNIAL GARDENS, by H. S. Ortloff

Following the simple directions in this book insures a perennial garden crowded with bloom, in which the colors make a perfectly blended picture; 90 pages—\$1.25.

GARDEN POOLS: LARGE AND SMALL

By Ramsey and Lawrence
Nothing else can add so much to your garden as a pool. How to have one is fully explained in this new book. Its text is so complete and its illustrations are so numerous and practical that you can easily find the type of pool that fits in your garden and learn all about designing, planting and caring for it; 41 illustrations, 122 pages—\$2.50.

THE HOME GARDEN HANDBOOKS By F. F. Rockwell.

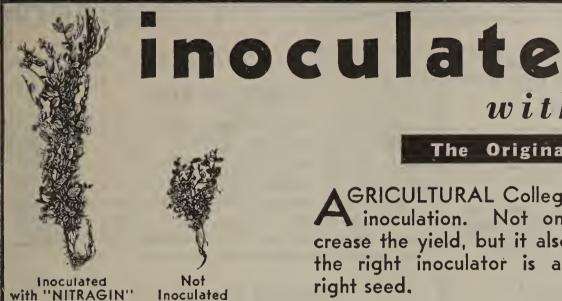

A series of pocket-size books, now nine in number, that it is a pleasure for us to recommend because each volume covers its ground so well and concisely. Each volume has from 30 to 70 illustrations and contains about 90 pages. Strong cloth binding, four-color jackets. Price, \$1.25 per volume. The titles now published are:

Dubay Seed Disinfectants

INCREASE CROP PROFITS BY STOPPING DISEASE LOSSES

NEW IMPROVED CERESAN—For Wheat Oats and Barley

New Improved Ceresan is unusually effective for controlling bunt or stinking smut of wheat, and seedling blight caused by seed-borne scab. It costs but 1% to 2% cents a bushel of seed as only ½ ounce of dust is used. It is easily and quickly applied. One pound treats 32 bushels bushels.

It increases wheat profits by reducing losses from smut. **Prices:** 1 lb., 75c; 5 lbs., \$3.00.

CERESAN—For Grains, Flax, Millet, Peas. Sorghums and Narcissus Bulbs

Ceresan controls seed-borne stripe disease and smut of barley, oats, sorghums, and millet; in reducing foot-rot diseases of peas; and for preventing certain seed-borne flax diseases and seed rotting. Dust it on before planting time—no soak-ing or wetting. Only 3 ounces needed per bushel of barley, peas and oats; and 2 ounces for flax, millets, or sorghums. Prices: 1 lb., 75c; 5 lbs., \$3.00; 25 lbs., \$12.50.

IMPROVED SEMESAN BEL—For Potatoes

Improved Semesan Bel gave an increased yield of 35.4 bushels an acre by controlling seed-borne scab and rhizoctonia, reducing seed rotting and improving the stands. This quick dip has cut treating costs to 1½c to 3c per bushel of seed and gives better control of seed-borne rhizoctonia and scab than the old soak treatments. One pound treats 60-80 bushels. Prices: 4 oz., 50c; 1 lb., \$1.65; 5 lbs., \$7.00; 25 lbs., \$31.25; 100 lbs., \$120.00. 25 lbs., \$31.25; 100 lbs., \$120.00.

SEMESAN JR.—For Field and Sweet Corn

Four bushels more corn can be expected by any farmer that treats Experiment Station corn, tests show. Field or sweet corn seed dusted with Semesan, Jr., is protected from the destructive Diplodia, Gibberella and Basisporium root rots carried by the seed and from rotting in cold, wet soil, consequently better germination, stands, and yields of improved quality are obtained. Use 2 ounces per bushel. Costs 2½ to 3c an acre. Prices: .4-oz. tin, 35c; 1-lb. tin, \$1.00; 5-lb. tin, \$4.75.

TREAT BEFORE PLANTING WITH FOR DISEASE PROTECTION

Semesan may be applied in dust or liquid form to the seed, bulbs and corms, before planting. It is harmless to the seed, but deadly to disease organisms. Semesan is rediculously low in cost, from 4c to 1c per pound of seed. One ounce treats 15 pounds of seed. Effective in controlling damping off, hard rot, scab, etc. Prices: .20z., 50c; 1 lb., \$2.50; 5 lbs., \$11.75.

Pratt's POULTRY AND ANIMAL REMEDIES We Recommend Them as the Best That Money Can Buy. Try Them.

PRATT'S R-P TABLETS (Formerly Called Roup Tablets)

"Prevents Colds"

A wonderful remedy used in every civilized country because it cures. For fowls that sneeze, gasp and wheeze, also for those having a watery discharge from the nostrils and eyes. Prevents colds. Excellent for turkeys.

Prices, 25c, postpaid, 28c; medium size, 50c, postpaid, 56c; large size, \$1.00, postpaid, \$1.10.

PRATT'S CHICK TABLETS (Formerly Called Diarrhea Tablets)

"The Baby Chick Life Saver"

Pratt's Chick Tablets in the drinking water kills the specific organism which causes white diarrhea and saves the hatch. Use as a preventive when hens are laying, because it will prevent this deadly organism from developing in the egg. Price, 25c, postpaid, 27c; large size, 50c, postpaid, 53c.

PRATT'S FLY CHASER

Why let your animals suffer needless torment from flies? Food energy used to fight flies is wasted as far as milk production is concerned. Horses, too, will do more work when relieved from fighting flies. Fly Chaser does not injure hair or animal wheni used as directed. Fly Chaser should be used in every stable, and every barn.

PRATT'S POULTRY WORM POWDER "Powerful-Efficient"

This is the product to use for worming an entire flock at one time. Pratt's Poultry Worm Powder gets Round Worms, Tape Worms, and other Intestinal Worms of poultry and turkeys. One chicken saved will pay for sufficient powder to treat a large sufficient powder to treat a large flock. Powerful, efficient, easy Blackhead is usually to use. caused from worms.

100 hen size, 60c, postpaid, 67c; 500 hen size, \$2.00, postpaid, \$2.13; 1,000 hen size, \$3.50, postpaid, 6 \$3.65.

PRATT'S LICE KILLER POWDER

The world's champion lice killer powder for poultry, hogs, cattle, rabbits and pets.

Price-14-oz., 25c, postpaid, 36c; 2 lbs., 50c, postpaid, 63c.

PRATT'S ROOST PAINT

"Kills Poultry Lice"

A new, improved, nicotine sulphate formula—will kill lice and start your flock toward profits. It makes it easy, convenient and inexpensive to delouse every bird. You merely paint the roost and a small can goes a long ways.

Lice die over night while your flock rests in undisturbed sleep.

Now you can afford to delouse your birds. low costs and efficiency of Pratt's Roost Paint makes it true economy—"just paint the roost."

 $\frac{1}{2}$ -piut, 85c, postpaid, 95c; pint, \$1.50, postpaid, \$1.63; quart, \$2.25, postpaid, \$2.32; by express or freight, gallon, \$7.00.

PRATT'S POULTRY REGULATOR "Helps Hens Lay"

A perfect, natural food for laying hens. Makes more eggs from the same feed and keeps layers in the pink of condition through even the heavy production strain. Its mineral and vegetable tonic content is not found in feeds, yet they are necessary for heaviest egg production. Contains all the necessary elements in accurate and scientific proportions that hens need for egg making. Builds vitality and stimulates egg production. Used by the most successful poultry raisers everywhere. Perfectly pure and free from harmful substance.

Price: 4 lbs., 60c, postpaid, 75c; $12\frac{1}{2}$ -lb. sack, \$1.75, postpaid, \$2.06. By express or freight, 25-lb. sack, \$3.00; 100-lb. sack, \$10.25.

PRATT'S N-K CAPSULES "For Worming Poultry"

Pratt's N-K Capsules (Nicotine and Kamala) can't fail to get the worms. Each tablet consists of the proper dose of nicotine and kamala encased in a special airtight coating. Authorities are agreed that these ingredients are the most effective known and will give positive results.

There is no simpler, safer, surer or more practical way to treat a bird for worms than by the use of Pratt's N-K Capsules. The advantages of individual treatment of poultry for The advantages of indiworms lie in the fact that this method permits giving each fowl a definite, positive and proper dose. The results are sure and prompt.

Price, 25c, postpaid, 27c; large size, 75c, postpaid, 78c.

PRATT'S INHALANT

New Water Soluble Inhalant Gives Better Control of Colds, Just Spray

A new principle in the treatment of colds and simple catarrhal conditions in poultry has been discovered.

It does what other poultry inhalants are supposed to do penetrates the watery secretions in the respiratory passages reaches the irritated membranes and actually coats the tissues with a healing film.

Ordinary poultry inhalants have an oil base, while the secretions of the respiratory tract are watery.

Oil and water will not mix.

The oil will float on top. It cannot penetrate down through the watery secretions and carry the medication to the inflamed tissues.

The medicines in the ordinary oily base poultry inhalants are shed like water from a duck's back. They leak right out of the nasal tract without ever contacting the infected areas.

Pratt's Poultry Inhalant being "water soluble" dissoles in the watery secretions of the respiratory tract. Its germ killing, antiseptic and healing medicines are held in a base that mixes readily with these secretions. Just spray.

Price: 1 pint, 65c, postpaid, 76c; 1 quart, \$1.10, postpaid, \$1.25; 1 gal., by express, \$3.25.

PRATT'S ANIMAL REGULATOR

"A Wonderful Conditioner and Stock Tonic"

Builds up health and vigor of livestock. A wonderful conditioner and stock tonic. Stimulates health and quick growth of young. Helps hard working animals to thrive and stay in the pink of condition under the heaviest working schedule. working Pratt's Animal Regulator is a combination of vegetables and minerals not found in feeds but which sharpens the appetite, improves the digestion, regulates elimination and builds up health, growth and energy—all at very little cost.

Price-Large pkg., 60c, postpaid, 73c; 7-lb., pkg., \$1.20, postpaid, \$1.43. By express or freight, 25-lb. pail, \$3.25.

PRATT'S COW TONIC

Increases milk flow and makes it rich in butterfat. Enables the cow to turn more of the feed into milk and keep up the full flow for a longer period. A positive remedy for scours. A wonderful all-around tonic.

Price—2 lbs., 65c, postpaid, 77c; 2-2-lb. cans, \$1.20, postpaid, \$1.30.

HAND SPRAYERS-For Pratt's Disinfectant. (See page 122).

ps CONCENTRATED Cattle Spray Saves One-Third the Cost

Sheps Concentrated Cattle Spray is easy to use. Just mix with distillate, tractor fuel, or kerosene in the proportion required and you have the most economical, most effective cattle spray on the market. Laboratory tests show 76% kill at 15-1. 72% kill at 30-1.—Peet-Grady method.

Mix 4 to 8 Ounces to the Gallon

It is the only Scale equipped with double graduation. It shows instantly the exact weight of the egg as well as the weight per dozen. Dial graduated in half ounces—16 to 32 ounces per dozen eggs and from 1\% to 2\% ounces per egg. The Mascot conforms to the grading laws in all sections of the country. Grade your eggs and secure the top market price. Quick and accurate. Will last a lifetime.

Price, \$1.35, postpaid. Pam-

phlet on request.

Black Leaf 4 Kills Poultry Lice

When chickens perch upon roosts that have been "painted" with "Black Leaf 40" the heat from their bodies causes a slow release of fumes which penetrate the feathers and kill the lice, with no discomfort to the birds. The process goes on during the night, as the birds are sleeping, and furnishes the most desirable form of poultry lice control ever known.

Field Seeds
Before You
Order

Mr. T. E. Mills looking over one of our fields of seed oats.

When you are in Helena you are invited to visit our large Seed Cleaning Plant and Warehouse and go through our extensive seed testing grounds, Nursery and Greenhouses.

A vegetable garden from our Peerless Montana tested seeds in the Helena Valley.

NO FLOWER GARDEN IS COMPLETE WITHOUT THIS WONDERFUL COLLECTION
